BriskHeat®

Heat Tape

- Suitable for electrically conductive surfaces
- Optional Benchtop Temperature Controllers sold separately

Provide fast, efficient direct-contact heating on any surface or body. CE Certified and RoHS Compliant.

Fiberglass Heat Tape—Heavy insulated tape is exceptionally flexible and durable and provides rapid thermal response. Has power leads on same end. High-temperature tie-downs for easy installation.

HSTAT Silicone Rubber Heating Tape—Include adjustable thermostat control. Rapid heat-up and thermal response.

Temperature Controllers

- Accuracy: ±1% FS
- On/Off control
- 120VAC input

No. 13P844

Benchtop—Digital controllers offer adjustable upper and lower setpoint limits. Factory-installed Type J or K thermocouple sensors. 5-ft. input and output power cords have NEMA 5-15 plug and receptacle.

Outdoor—Mount vertically for outdoor use. Features audible alarm, Type K thermocouple, and 6-ft. input power cord.

No. 21TV79

DryTemp Bath

- Temp. range: ambient +5° to 150°C
- Thermal uniformity (with lid): ±1.0°C at 95°C

DryTemp Bath with Bead Block

Dry bath features digital temperature control. Combine with a bead block for optimal temperature uniformity and accuracy while incubating common lab vessels, including microfuge tubes, test tubes, microplates, and slides. Single bead block holds 0.25L of beads. 3¾"L x 3"W x 3"H. Double bead block holds 0.5L of beads. 3¾"L x 6"W x 3"H.

Bath with Beads
No. 12L046

Bead baths are more energy efficient than water baths and provide precise, uniform temperature control. Protect samples from contamination and easily hold vessels upright in place. Safely incubate multiwell plates and petri dishes without water wicking under their lids.

Julabo Heating and Refrigerated Circulators

Open Heating Bath Circulators—Quiet running units are designed for internal applications in the circulator bath tank. Circulator can be removed for easy cleaning of the bath tanks. Include bright, white, and easy-to-read display.

Heating Circulators with Open Bath—For internal and external temperature applications with transparent or stainless steel bath tanks and pump connections.

Refrigerated and Heating Circulators—Designed for routine work and standard tasks in laboratories and industrial environments. Run quietly and feature a bright, easy-to-read display, external pump connections, and USB connection. Cooling coil utilizes a design that yields more usable space in the bath tank.

Julabo Chillers

Feature splashproof keypad and large, bright LED display. Easy to fill and drain.

F Series—Designed with filling level indicator. May be used with water, water/glycol, and Julabo Thermal EG bath fluid.

FC Series—Have adjustable ratio for feed/return temp., upper/lower temp. warning function with interval tone, and integrated protection from freezing and dry running. Designed with self-test, reciprocal sensor monitoring, and pump motor and compressor overload protection. RS232 interface for online communication (LIMS capability).

FL Series—Feature microprocessor PID temperature control, filling level indicator with alarm, and powerful immersion pumps for continuous operation. Include integrated stainless steel bath tanks and front drain. RS232 interface.

LW Scientific PolyScience® Baths and Circulators

Provide exact, stable temperature control.

Water Baths—Ideal for heating and maintaining temperature-sensitive samples. LW Scientific models include touchpad digital controller and red LED display. Polyscience general purpose water baths feature digital display, timer modes, and memory function.

MX (Basic) Controllers—Have 3 control buttons, alarm, and fault indicators.
- Closed-loop external circulation
- Single pump speed

Standard Digital Controllers—LCD touchpad, alarm, and fault indicators. RS-232 connectivity.
- Closed-loop external circulation
- 2 pump speeds

Benchtop Autoclaves

Self-contained design eliminates external plumbing and hardwiring. 316 stainless steel chamber ensures high corrosion resistance. Fast exhaust allows quick cycle time of solids and slow exhaust prevents media and liquid boil-over. Closed-door drying system maintains sterility. Drying cycle removes residual moisture after sterilization. Continuous pressure purge eliminates air pockets. Large-capacity water reservoir helps avoid frequent fill-ups. Auto shut-off feature saves energy. Standard safety features include a heat-insulated, double locking door; automatic low-water level shut-off; over-temperature cut-off; and over-pressure valve. UL Classified.

Analog—Manually-operated sterilizers include a 60-min. cycle timer, temperature selection from 100°C to 134°C (212°F to 273°F), and combination pressure and temperature gauge with peak indicator.

Electronic—Digital display shows temperature, pressure, and running time. Up to 59-min. sterilization time and temperature selection from 105°C to 137°C (221°F to 279°F). In-line particle filter protects valves. Low-water alarm sounds when reservoir needs refilling. Feature electronic pressure and temperature sensors. Standby heating keeps chamber warm for quicker cycles. Models with printer meet GLP requirements. EA models have preloaded cycles for sterilizing packs, pouches, pipette racks, and instruments.

BioClave™ Research Benchtop Autoclaves

No. 9V391

Provide automatic, full-cycle operation—fill, sterilize, exhaust, dry—at the push of a button. Self-contained reservoirs for clean and used water do not require direct hookup to water service. Chamber pressure, temperature, and cycle state/remaining time are shown on large, clear digital displays. Safety interlock keeps door closed until pressure reaches 0 psi. Include stainless steel rack, trays, tray handle, draining hoses, and spare door gasket and fuses.

Standard 4-cycle options are preset for sterilizing liquids, wrapped instruments, or unwrapped instruments/plasticware, and can be adjusted as needed for special applications. 5th option, Dry Only, can extend drying time at the end of a cycle. A USB drive can be inserted and used as a method for storing a report of the cycle. CE Certified.

LABCONCO

Glassware Washers

- 115V washers
- Programmable drying time up to 250 min.
- 7 preset and 2 custom cycles
- 3/8" FNPT hot tap water connection
- See Grainger.com® for accessories

Dual washing and draining pumps reduce cross-contamination risk. Purified water pump brings nonpressurized or pressurized purified water into the tank for rinsing. 96 gpm recirculation rate. Fine-mesh drain filter traps debris. 304 stainless steel construction. Steam cycle penetrates and removes dried residue.

FlaskScrubber®—Includes lower spindle rack for direct-injection cleaning and forced air drying for up to 36 pieces of narrow-necked glassware.
- Rinse temp.: 180°F (82°C)

SteamScrubber®—
Designed to wash and dry beakers and other wide-mouth or specialized glassware. Includes upper and lower open rack.
- Rinse temp.: 180°F (82°C)

ScrubAir™—Thoroughly washes and dries pipette inside and out. Percolating compressed air and water clean the interior while water and detergent wash down the outside. Compressed air dries pipettes in about 4 hr. compared to up to 17 hr. with traditional overnight oven drying. No. 39GA84 has a built-in heater that decreases the drying time to 2 hr.
- 3 preset cycles and user-set delayed start
- Rinse temp.: 140°F (60°C)

Benchtop Ultrasonic Cleaners

LSS®

High-efficiency, tabletop units use high-frequency sound to safely clean instruments, parts, equipment, and other items. Models have display, digital timer control, heater with max. water temp. of 176°F (80°C), and a removable basket. Ideal for cleaning lenses and other optical parts, dental and surgical instruments, electronics, tools, pens, firearms, jewelry, and golf clubs.

BRANSON RAYTECH Elma SHIRACLEAN

Ultrasonic Cleaners

- Operation requires a basket or tray for both Branson and Elma Ultrasonics models, sold separately. Search on "Branson Baskets" or "Branson Trays" or "Baskets for Elma Ultrasonics" on Grainger.com®

Inaudible ultrasonic vibrations safely clean metal and plastic instruments, machinery, and parts. Size, timing, and heat options are available for a variety of industrial and laboratory cleaning tasks, and models include a cover.

Branson models can be used for cleaning, degassing, and sample preparation. Feature 40 kHz sweep frequency, industrial transducers, and a set time or hold feature for continuous cleaning. Digital models have Hi/Low power, temp. control, and automatic programming. Just set the temp. and timer for degassing and cleaning cycle. Model will start when it reaches set temp., then shutoff when timer reaches zero.

Elma® models feature multimode operation for standard and more demanding jobs. Digital units have dual 37 and 80 kHz frequency, Normal/Pulse/Sweep/Degas/Power Control settings, and Pause current application. 1- to 60-min. timer. General Purpose models have 37 kHz frequency, Pulse/Sweep settings for cleaning and mixing. 1- to 30-min. timer. No. 36C021 also offers 37 kHz frequency, Degas/Heat/Sweep Control settings, adjustable temperature plus auto-start feature.

BRANSON ALCONOX Critical Cleaning Experts

Ultrasonic Cleaning Concentrates

Designed for maximum effectiveness with ultrasonic cleaners.

OPTICAL CLEANER

Removes polishing compounds from glass and optical surfaces before coating deposition. Also removes soils, fingerprints, cerium oxide, pitch, and blocking waxes.

METAL CLEANERS

Metal 1 works on copper, brass, and steel substrates. Removes cutting and polishing oils and makes soils easy to remove.

Metal 2 and 3 work on ferrous metals, copper, and stainless steel, plus alloys of copper, steel, and titanium. Metal 3 acts as an emulsifier to prevent soil from redepositing.

GENERAL-PURPOSE CLEANER

Removes soils, fingerprints, dust, light oils, and greases.

INDUSTRIAL-STRENGTH CLEANER

Removes grease, oils, and particulates from mechanical components. Cleans shop oils and light carbon deposits from valves and fittings.

ALCONOX®

Concentrated powder removes soil, grease, oils, solvents, chemicals, blood, and tissue. Use on glass, metals, ceramics, plastic, and fiberglass.

CITRANOX®

Contains acid ingredients for removing scale, metal oxides, salts, and inorganic residues. Phosphate-free.

LUXO MICROSCOPES by UNITRON

Digital Microscopes

MIDAS® Color handheld inspection system captures and documents images using a polarizing filter and 5.0 MP USB 2.0 camera. Has a monocular eyepiece and is used for inspection, verification, and examination in criminology, restoration, currency, and gemstone and mineral applications. ESD-safe. Each includes Windows® and Mac® software plus instructions.

Microscopes

Instruments for use in research laboratories, industrial processes, clinical analysis, and educational configurations.

Clinical—Can magnify up to 1000X with 100X oil immersion lens. Includes dispersion filter and blue/yellow/green filters. Used for diagnosis and to identify pathogens in hospitals, medical and veterinary clinics, research laboratories, and universities.

Zoom Stereo—Gives two paths of light, allowing a 3D view of the specimen and provides focus and clarity for critical applications, such as dissection, microwelding, examining fossils and minerals, and in medical and biological applications.

OHAUS ADAM LSS

Analytical and Precision Balances

Adventurer® Series—Color touchscreen lets you access 9 application modes including weighing, parts counting, percent weighing, animal/dynamic weighing, and density determination. Analytical model has 2 draftshield doors that open wide on both sides for sample placement. USB ports in front for loading data and in back to connect the balance to a PC. Include AC adapter.

EX Explorer Series—Large 5.7" full-color touchscreen display is removable. Has 13 application modes, 21 weighing units. Frameless draftshield offers antistatic glass, flip-top and large side entry doors on top-mounted bearings on 3 and 4 place balances. 4 programmable touchless sensors for hands-free operation.

Adam Equipment HCB Series—Features capacity tracking, weighing, parts counting, percentage weighing and accumulation/totalization modes. Internal calibration with built-in mass and overload protection withstand up to 200kg. USB and RS-232 with cables. Stackable. Built-in rechargeable battery and AC adapter.

Lab Safety Supply®—Features application modes for weighing, percent weighing, parts counting, check weighing, display hold, accumulate, and totalize.

CR Series—Balance provides basic weighing functionality. Built with slim, stackable design, and an enlarged platform. Also features stability indicator, mechanical and software overload/underload protection and auto shut-off. 3 AA batteries included.

CX Series—These balances have a battery life of up to 1,000 continuous hours, allowing for uninterrupted operation. They feature slim, stackable, and lightweight design. The streamlined 2-button operation means that the balance can be operated easily, and large backlit LCD display enables easy viewing of weighing results. 3AA batteries are included.

Scout SPX Series—Portable balances feature easy-to-use button operation, mechanical and software protection against shock and overload. Operate on AC adapter (included) or 4 AA batteries (not included) with auto-shutoff.

Moisture Analyzers

Instruments provide quick moisture content measurements for pharmaceutical, chemical, food, beverage, wastewater treatment, and research applications. GMP/GLP data output.

Ohaus—No. 8MZ63 nonglass infrared heating element for drying samples. No. 49WD15 has halogen heating and is easy to set up with press/hold time buttons to set drying parameters. No. 49WD17 ensures data safety with set-up and lock temperature settings and method parameters with administrator access. Has 4.3" TFT color touchscreen display.

A&D—Feature timed or auto shut-off modes with process temperatures up to 200°C. RS-232 port. Has WinCT Moisture Software standard for Nos. 3KWP9 and 9LE54. Optional for No. 3KWP6.

Weighing Dishes and Paper

Round Weighing Dishes—Ideal for general purpose weighing, dispensing, storage, drying, and evaporating. Made of light gauge aluminum, no coating, and oil-free. Crimped sides.

Hexagonal Weighing Dishes—Designed for nonslip handling when weighing, dispensing, or pouring. Flat bottom for stability.

Square Weighing Dishes—General purpose, antistatic dishes withstand temperatures to 180°F. Flexible for easy pouring. Resistant to dilute acids, alcohols, and bases.

Pouring Dishes—Use for easy pouring and dispensing of samples. Withstand temperatures up to 200°F.

Weighing Paper—Semitransparent, high-gloss calendared glassine paper is an environmentally friendly alternative to styrene weigh boats. Very smooth surface does not absorb moisture while conveying gelatinous samples to and from balance. Easy to fold. Nitrogen free.

TROEMNER

Precision Weight Sets

- Class 1
- For individual calibration weights, go to Grainger.com®

Precision analytical calibration weights are made of highly polished Troemner Alloy 8 stainless steel for low magnetic susceptibility, uniform consistency, and high corrosion resistance. NIST items include calibration certificate.

Scoops, Spatulas and Spoons

SCOOPS

Polyethylene—Nonspill shape scoops have a closed back and rounded corners for easy cleaning. Offer an ergonomically angled handle.

SPATULAS

Stainless Steel—Rounded blade end won't damage sensitive materials.

Polyamide—Glass fiber reinforced. Resist solvents but not recommended for use with acids or oxidizing agents. No. 9MW38 is a double spatula and No. 9AU83 is a spoon/spatula.

Polypropylene—Chemical- and heat-resistant to 275°F.

Disposable—Meet FDA regulations for food contact. Feature one spatula end and one scoop end.

V-Shape—Strong enough to break up caked materials. No. 8RLU5 is individually wrapped, sterile.

SPOONS

Polypropylene—Steam autoclavable at 250°F (121°C). Chemical- and corrosion-resistant.

Polystyrene—Individually wrapped, sterile. No. 8DAL7 is flat-bottomed for use as a weighing dish.

Stainless Steel—Double-ended spoons have 2 bowl sizes. Spoon/spatulas feature a spatula end and a curved spoon end for retrieving solids and thick liquids in tall containers.

Magnetic and Hotplate Stirrers

- All models have 1 stirring position, except Nos. 22LC60 and 22LC59 offer 10

Durable Aluminum plates will not crack or chip. Ceramic plates have a chemical-resistant, reflective white surface that is easy-to-clean. Stainless Steel plates resist corrosion. Digital Magnetic Stirrers are equipped with powerful magnets and motor, giving fast and precise stirring operations. Allow digital PID feedback control for every single point. Provide strong magnetic coupling, ensuring constant stirring along with various time setting modes.

Shakers

Digital shakers are programmable and can be used in cold rooms and incubator or CO_2 environments. Platforms accommodate various flask clamp sizes. No. 53KC02 includes base tray. Nos. 53KC07 and 13R338 include clamps. Nos. 53KC17 and 13R340 include adhering rubber mat. Nos. 14N112 and 36XL36 are microplate shakers. Universal Platform No. 14N123 is designed for use with Erlenmeyer flasks and test tube racks. This unique magnetic attachment method is the easiest way to instantly change between flask clamps of different sizes.

Note: Clamps are available separately on Grainger.com®; search for "lab shaker clamps."

Incubating Shakers

Use with platforms, flask clamps, test tube racks, microplate holders, and rubber mats.

Lab Companion—Microprocessor-controlled floor-standing shakers have a large capacity of up to five 6L flasks. An easy-to-read LCD display and imbalance sensor help assure reliable operation, while the RS-232 interface and USB port give you external controls and let you export data to another device for later review.

Ohaus®—Provide accurate and repeatable results. Nos. 404P69 to 404P72, and 404P75 have touchpad LED displays for temperature, speed/tilt angle, time, and all settings can be viewed simultaneously. Spill-resistant design with overload protection gives audio/visual alarm. No. 404P68 is a cooling orbit shaker and No. 404P74 is a cooling skater.

Platelet Rotators

- Speed: 0 to 9 rpm
- 110V

LW Scientific

Feature durable construction and built-in tachometer to monitor speed easily. Designed with a whisper-quiet, heavy-duty motor with variable speed control. Easy loading and unloading; hold up to 12 platelet bags per basket. Stainless steel basket rotates 360° smoothly. Ideal for use in blood banks.

Rockers and Rotators

Benchmark Scientific · PRO Scientific · Scientific Industries, Inc.

ROCKERS

Produce reliable results in staining, destaining, blotting, and gentle mixing. Available with 2-dimensional see-saw action and 3-dimensional gyrating (swirl) action.

BlotBoy™ 3D—Tridirectional tilt angle and speed are optimally set for blot washes and gel staining/destaining. Supplied with 12" x 12" platform and autoclavable flat mat.

BenchRocker™ 3D—Provides variable speeds and tilt angles required for molecular and biological mixing. Includes 12" x 12" platform and 2 mats (flat and dimpled).

VSR-50—Has a rhythmic side-to-side motion. Interchangeable tables can be tilted 15°. With 12" x 14" platform. Includes nonslip rubber mat.

ROTATORS

Rotator Genies hold a wide variety of tubes, flasks, microplates, bags, and odd-shaped vessels at any angle. No. 13R325 has a spring-clip plate system. No. 13R322 can quickly convert from rocking to rotating motion in seconds. Magnetic platform and clip plate system securely holds a variety of containers.

No. 13R322

Heavy-Duty Vortex—Designed for continuous-duty operation and has the ability to handle accessory components over entire speed range. Include detachable 3-wire cord and plug, universal holder, foam insert for 1.5 to 2mL microtubes and cup head, and tube rack.

Microplate Vortex—Provides high-speed and small orbit for effectively and consistently mixing of microplates. Delivers continuous duty throughout the speed range. Includes microplate adapter, cup head, and detachable 3-wire cord and plug.

Microtube Vortex—Features a Multi-Head™ cup head for general-purpose mixing of up to eight microcentrifuge tubes and includes a microtube holder.

Mini Vortex—Sturdy design provides stability and reliability vortexing action. Offers gentle shaking or high speed mixing for vigorous vortexing of samples.

Multi-Tube Vortex—Allows multiple samples to be processed simultaneously. Displays digital time and speed are controlled by a digital microprocessor with interval pulse mode allows more vigorous mixing.

Reax Vortex—Standard model No. 38RU12 has 5mm vibration orbit for use with high-viscosity media or solids. Features continuous/automatic switch modes and includes a plate for 20mm dia. test tubes. No. 38RU14 features an analog dial speed control with accurate rpm numbers setting and electronic speed control with constant rpm output. All-purpose No. 38RU16 has 3mm vibration orbit and includes an attachment for 26 vessels (10 to 16mm) and 12 vessels (16 to 32mm). Digital process timer allows for unattended operation from 1 to 999 min.

Vortex—Counter-balance system creates instant vortexing action while providing smooth vortexing including large sample sizes such as full 50mL tubes. Has cold room incubator compatibility and suction feet securely hold samples, preventing spillage. Speed range from 200 to 3200 rpm and 3mm vibration orbit.

Sieve Shakers

Meinzer II™ Tabletop Sieve Shaker—Portable electromagnetic vibrating shaker accommodates 8 full-height or 15 half-height sieves, plus pan and cover. Mechanical timer.

DuraTap™ Motorized Sieve Shakers—Made with rugged steel and alloy materials. Digital timer.

Sonic Sifter Separators—Settings can be varied for different dry particle densities and textures with automatic timing that ensures repeatable and reproducible results. Oscillating column of air tries the particles 60 times per sec. allowing for reduced testing times. Precise sieving instrument for fine particle separations ranging from 5.6mm to 3 microns.

Endecotts Sieve Shakers—Analog models have a 0- to 60-min. timer, or can be set for continuous sieving. Digital models have an electromagnetic drive and are suitable for wet or dry sieving.

MyFUGE™

USA E8

Universal

Microliter

Centrifuges

MyFUGE™ Mini Centrifuge—Space-saving personal centrifuge has easy lid-activated Start/Stop control. Near-silent operation.
- Includes adapters for 0.5 and 0.2mL
- Choose lid color: blue, green, red, purple, or clear

USA E8 Variable-Speed Centrifuge—Angled table top unit spins up to 8 tubes with precision results.

USA E8 Portable Centrifuges—Angled 8-place centrifuges include a car power cord and a car seat for easy operation in the field.

Universal Centrifuge—Designed for both laboratories and doctors' offices, the centrifuge features zero-rpm locking lid for safety and digital programming of time and speed ranging from 800 to 3400 rpm. Provides 8-place fixed-angle rotor and 6-place swing-out rotor. Includes 110 to 220V auto-switching power adapter.

Microliter Centrifuges—For use in molecular biology applications such as PCR, DNA and RNA extraction. Available with or without temperature control. No. 38LY74 features a fast-cool function that takes temp. down to +4°C in 10 to 15 min.

Benchtop Centrifuges—General purpose centrifuges are for spinning blood, urine, cell/tissue culture, plates, and bottles. Nos. 38LZ08, 38LZ41, and 38LZ39 have a robust temp. control system and feature a Versa-Rotor, one rotor for multiple applications.

Conical Centrifuge Tubes and Racks

Tubes—Polypropylene tubes have white writing area on tube and included polypropylene cap. Glass tubes have phenolic screw caps with PTFE-faced rubber liner.

Racks—Conical Tube Racks are epoxy-coated steel wire, steam-autoclavable and have 30mm square holes. Pop-Up Tube Racks are sturdy polypropylene.

Tube Racks, Assorted Colors

Microcentrifuge Tubes and Racks

Tubes—Polypropylene tubes have attached caps and conical bottoms, except No. 11L820 is self-standing. Nos. 6VMX6 to 6VMX9 have frosted marking area and syringe-pierceable caps. Nos. 11L817 to 11L820 have engraved graduations and are autoclavable.

Racks—Nos. 11L554 and 11L556 are reversible. No. 11L560 is for PCR® sampling.

Overhead Mixers

- **Mixer motors, support stands, and mixing paddles, sold separately.**

Digital speed display with speed and torque abilities for a wide range of volumes and viscosities. Compact units are ideal for fume hoods or enclosed work stations. Mix reactions, samples, dissolutions, and dilutions. No. 38C831 has a countdown timer. Mixes reactions, pharmaceuticals, and suspensions. No. 38C834 mixes emulsions and serves as an alternative to a homogenizer. No. 38C833 mixes creams, lotions, and personal care products. No. 38C832 mixes tars, gravel, polymers, and adhesives.

CANNON INSTRUMENT COMPANY

Viscometer

No. 36N171

Portable Viscometer—Compact, easy-to-use SimpleVIS® viscometer offers exceptional temperature control and provides a direct determination of kinematic viscosity.

Viscosity Standards—CANNON certified standards are used for calibration and verification of glass capillary, rotational, falling, ball and cup viscometers. Calibration and verification with certified viscosity standards help to ensure viscometer measurement reliability. All standards are sold in 500mL bottles.

WHEATON®

BOD Bottles

- 300mL capacity
- Clear borosilicate glass, USP Type I

Designed for incubating samples of industrial wastes, polluted waters, sewage, and sewage effluents for wastewater biochemical oxygen demand testing.

Dynalon Labware
quality . value . service

Plastic Bottles

- Round shape except Nos. 3UEH3 and 3UEH6

Screw-on caps make a leak-resistant seal to keep liquid samples safely contained.

Note: Detailed information on chemical resistance, plasticware compatibility, and labware cleaning and disposal is available on Grainger.com®.

NARROW- AND WIDE-MOUTH

Amber HDPE bottles protect light-sensitive samples.

Graduated bottles have printed mL and oz. graduations and a write-on label area.

ENVIRONMENTAL SAMPLING

Leakproof bottles resist breakage for safe sampling, transport, and storage.

OCTAGONAL-SQUARE BOTTLES

Optically clear, easy-grip transport bottles take up less shelf space than round bottles. Graduations are molded in.

Wash Bottles

- LDPE bottles with polypropylene caps

Integrated spout squeeze bottles provide quick, handy cleanout of laboratory glassware and plasticware.

Printed bottles save time and help eliminate cross-contamination.

Item Nos. beginning with "24J" are printed with chemical name and formula, Chemical Abstract Service number, and NFPA warning diamond for easy identification and safety compliance.

Note: Labware imprinting indicates imprinting on bottle, cap color, or write-on label.

Solvent Dispensing Bottles MENDA

- HDPE bottles
- Stainless steel pumps
- Replacement bottles available on Grainger.com®

Automatic dispensers operate one-handed without removing the lid. Imprinted units are labeled in nonsmearing ink with one of the three most commonly used chemical names.

One-Touch and Take-Along dispensers allow cotton or pad application, with excess fluid seeping back into the bottle.

Pure-Touch and Pure-Take dispensers reduce backflow risk with raised purity protector to keep fluid supply contaminant-free. Pure-Touch units reduce vapor escape; for use with noncotton brushes.

ESD (electrostatic dissipation) bottles are made of durAstatic™ HDPE and embossed with the ESD protective symbol for fast identification.

Glass Test Tubes

Culture Tubes are disposable screw-cap tubes suitable for tissue culture and general bacteriological use. Chevron marking area. Shrink-wrapped in plastic film and packed in convenient trays. Screw caps sold separately; see Nos. 9UDE6, 9PX55, and 9UDE8 on Grainger.com®.

Kimble Chase Test Tubes are disposable.

Test Tubes with and without Rim are high-quality Type 1 borosilicate glass that stands up to repeated sterilization, extreme high temperatures, and thermal shock from sudden temperature changes. Low-expansion glass withstands temperatures up to 932°F (500°C).

Ampules

Standard—Commonly used for packaging certified standards. Made from low-potassium borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements.

Prescored—Prescoring eliminates filing. Stems can be pull- or tip-sealed. Clear models are made from low extractable borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements. Amber models are made from amber borosilicate glass that conforms to USP Type 1 requirements for light transmission to protect light-sensitive products.

Cryogenic—Cryule® ampules allow for biological sample preservation in glass and storage at low temperatures. Can be used in the vapor phase of liquid nitrogen. For Cryogenic Gloves, sold separately, see page 1687. Made from low extractable borosilicate glass that conforms to USP Type 1 and ASTM E 438 Type 1, Class A requirements.

Serological Pipettes

- Easy-to-read markings

Ascending and descending graduations ensure accurate pipetting. Calibrated "to deliver" (TD) to within the tolerance shown. Sterilized with gamma radiation.

Lab Safety Supply—Polystyrene pipettes with easy-to-read graduations printed in black ink, and premium-material filter plug. Color-coded stripes and packaging enable quick volume identification.

Dynalon—Made of crystal-grade polystyrene for improved clarity. Drawn tips allow every drop to drain freely. Cotton plugged. Nonpyrogenic to 0.01EU/mL. Bulk pack No. 4YMV2 has inner packs of 25.

DLAB eppendorf NICHIRYO SUPPLIER DIVERSITY WHEATON®

Single Channel Pipetters

Dragon Lab pipetters are easy to calibrate and maintain with the included tool. Digital display shows volume setting. Low-force design helps reduce repetitive strain injuries.

Eppendorf® Research® Plus high-precison pipetters have a spring-loaded tip cone and are autoclavable.

Nichiryo autoclavable pipetters feature excellent solvent resistance and one-touch calibration. Digital display allows easy incremental volume adjustment. They have ceramic pistons, filtered nozzles, and a nonmetallic tip ejector for safe disposal of used tips.

Wheaton Acura® autoclavable pipetters feature ultrasoft plunger for tip ejection, ejector shaft height adjustment system, and swift-set user calibration.

Electronic Pipetters

Offer 6 working modes: Forward, Reverse, Stepper, Dilution, Tactile, and Mixing. These ergonomic units are designed with Right and Left display reading, variable working speed, cycle counter, and an easy-to-use tip ejector. Micropipetters have a reduced shaft length and conical end for easy access to microtubes and microplates. Macropipetters feature an interchangeable nozzle protection filter and adapters for Pasteur pipettes. 360° rotation for best working position.

Laboratory Syringes NORM-JECT®

Norm-Ject® All-Plastic Syringes—Contain no rubber or silicone oil that could contaminate chromatography or sensitive laboratory samples. Certified for use with most common organic and inorganic chromatography solvents. Positive safety stop helps prevent spills. More chemically and biologically inert than 3-part syringes. Polypropylene barrel and HDPE plunger.

- Individual sterile strip packs

Soft-Ject® 3-Part Disposable Syringes—Positive safety stop helps prevent spills. Polypropylene barrel and lubricated synthetic rubber gasket provide smooth plunger movement. Free from latex, BPA, PVC, and phthalates.

- Individual sterile strip packs

Optima® Reusable Glass Syringes—High-purity borosilicate glass syringes are reusable for laboratory and research applications. Barrels and pistons are interchangeable.

- Individually boxed

Chromatography Autosampler Vials

Made of Type 1 borosilicate glass, which offers resistance to chemical leaching and heat shock. Amber vials are suitable for light-sensitive applications. Bulk vials are designed for use in most autosamplers. Nos. 9MHC8 and 8XAV4 can also use a plastic snap-cap closure that does not need crimping or decapping tools.

Nos. 49AR35, 49AR36, 49AR68, and 49AR69 are convenience packs, packaged in a clear tray that fits into a bench drawer for easy access. The packaging helps keep products visible and particle-free.

Crimpers and Decappers—Handheld Crimper No. 9EZ20 features an adjustable stop to determine seal tightness. Handheld Decapper No. 9A893 has a precision-tooled decrimping jaw.

Chromatography Vials and Syringes

J.G. Finneran Associates, Inc. HAMILTON®

Sample Vials—Type 1 borosilicate glass construction for resistance to chemical leaching and heat shock.

Vials—Feature an innovative StepVial design that precisely centers a limited volume insert in the vial neck to help ensure dependable use with auto samplers. Sturdy neck design allows use with Poly Crimp™ seals and helps minimize neck breakage while uncapping.

Syringes—Gastight syringes dispense liquids and gases. Each features a precision-machined PTFE plunger tip that creates a leak-free seal, useful with heterogeneous samples to help reduce the chance of a deposit that could cause the plunger to freeze.

Microliter syringes are designed for liquids and feature a stainless steel plunger that fits the glass barrel with a tolerance smaller than 100 millionths of an inch to help extend syringe life. Fluid path is borosilicate glass and stainless steel.

Laboratory Wipes

For cleaning delicate surfaces and equipment in laboratories, research facilities, hospitals, and manufacturing settings.

GEORGIA-PACIFIC ACCUWIPE

Recycled Fiber—Made with 100% recycled fiber. May contain incidental, less than 0.5% nonrecycled fibers.

KIMBERLY-CLARK PROFESSIONAL®

KIMTECH SCIENCE® KIMWIPES® Delicate Task—Light-duty wipes easily pick up liquids and dust. Antistatic dispensing helps reduce lint and electrostatic discharge.

KIMTECH SCIENCE® Precision—Soft, absorbent wipes for general low-lint cleaning. Antistatic dispensing reduces lint. Coated packaging helps protect wipes from spills.

BERKSHIRE

General Cleaning—Nonwoven polyester/cellulose blend designed for spill control and wet wiping. Durx® wipes are white; Bluesorb® 750 are blue.

Presaturated—For use in wet cleaning and disinfecting of critical surfaces with no residue, where control of flammable solvents is required.

Polyester Knit—Excellent nonshedding wipes for applications where high concentrations of liquid are in use with rough surfaces. Ideal for aggressive cleaning and disinfecting.

Gentle Task—Extremely soft and gentle on surfaces. Very low lint. Contains no binders or additives. EcoClean® 60 wipes are biodegradable.

Cleanroom Swabs

- Pkg. of 100

Swabs are made for a variety of cleaning tasks in critical applications and cleanroom environments. 100 ppi reticulated foam. Laundered to be clean and pure before use.

Sock-Tip Foam—Solvent-resistant polypropylene handles sandwiched between two layers of the polyurethane foam head material.

Closed-Foam—Generate low particles and fibers; free of silicone, amides, and DOP (dioctyl phthalate).

Open-Cell Foam—Polyurethane foam sock heads over a rigid core.

Polyester Knit—Continuous-filament polyester knit heads for low particles, fibers, ions, and extractables. Highly abrasion-resistant and autoclavable.

Polyester Nonwoven—Flexible tips; made of hydroentangled polyester with low particle generation.

Bottle Top Filter Units

Fast, clean polyethersulfone (PES) membranes lower the chance of removing critical protein components from media.

Foxx Autofil® Bottle Top Filters—For sterilization of tissue cultures and microbiological media buffers, reagents, and other laboratory fluids. Molded finger grips and lower center of gravity design helps reduce risk of spills.

LSS Bottle Top Filters—Sterilized and packaged in individual bags. Fit on solution bottles in Filter Units, or other standard threaded solution storage bottles.

Filter Units—Include a solution bottle and a Bottle-Top Filter.

Filters and Filter Paper Grades

Grade/Size	Characteristics	Application
Filters		
A	Fine porosity, fast flow rate	Radioimmunoassay and gravimetric determination of airborne particulates.
A-E	Fine porosity, fast flow rate, 99.98% DOP effic.	Primarily used in suspended solids and air monitoring.
C	Fine porosity, fast flow rate	RIA procedures and harvesting lymphocytes.
E	Fine porosity, fast flow rate	Suspended particle analysis in water, cell harvesting, prefiltration, and air monitoring.
F	Fine porosity, medium flow rate	Filter diluted aqueous solutions pre laser spectroscopy; TCLP analysis; & collect fine precipitated proteins including immunoglobulin.
TSS	High flow rate & cap., excellent wet strength	High-efficiency medium for testing dissolved and suspended solids in water and wastewater.
VSS	High loading capacity	Monitoring air pollution & high-temp. flue gas, filtering high-temp. solvents, determining fixed & volatile solids in high-heat applic.
Filter Paper		
CFP2, 8µm	Medium to slow flow rate	General filtration and absorbent conveyance, in plant growth trials, and in monitoring air and gases for contaminants.
CFP40, 8µm-10µm	Medium retention and flow rates	General liquid and gas procedures and liquid food tests.

No. 14A840

Whatman™ LSS®

Filters and Filter Paper

Quantitative Filter Paper—Designed for gravimetric analysis and the preparation of samples for instrumental analysis.

Qualitative Filter Paper—Made from high quality cotton liners to ensure reproducibility and uniformity.

Whatman™ LSS®

Syringe Filters

Molded-in polypropylene housings for a reliable seal without adhesives. Supplied sterile in individual blister packs.

Anotop™—Made of inorganic membranes; low protein binding. For organic solvents and aqueous materials.

Nylon—Universal filter for analytical procedures such as chemical and beverage filtration.

Glass Fiber—Handles viscose solutions or turbid liquids.

MCE—For aqueous solutions, oil particulates, and bacteria. Effectively binds trace proteins.

PES—Polyethersulfone material has a low affinity for proteins and extractables; faster flow rate than PVDF.

PTFE—Hydrophobic membrane has great temperature resistance.

PVDF—Hydrophilic membrane for filtering nonagressive aqueous and mild organic solutions.

GD/X™—Designed with a prefiltration stack and process 3 to 7 times more sample volume.

Puradisc—Special tube tip allows the sample to be accurately dispensed into a microvial.

Dishes

Designed for optimum culture growth and media shelf life. Dishes made from polystyrene material are single-use, preventing risk of contamination.

Petri Dishes—Flat design provides uniform agar thickness, promoting culture growth.

Tissue Culture Dishes—Treated dishes are supplied sterile (gamma irradiated) and are vacuum-gas plasma treated for consistent hydrophilic cell attachment surface.

DREMEL

3D Printers and Filament

Dremel provides reliability through its proprietary sensor technology that helps prevent clogging. No. 52JT11 is ideal for applications in the educational environment. It allows the printing of nontoxic PLA in a fully enclosed unit with minimal noise. Through easy-to-use software and a full-color touch screen, students can operate the printers. No. 48RJ79 provides K-12 curriculum so you can unbox and start teaching. No. 54FY56 printer is for higher education and businesses. It helps eliminate design constraints through customization of tools, parts, molds, and prototypes while helping to reduce costs and production time. Use computer-aided design software to custom build in hours instead of days, weeks, or months. Print PLA, Eco-ABS, and polycarbonate.

No. 52JT11 includes printer, white PLA filament spool, sheet of black build tape, 2 sheets of blue build tape, build plate, power supply cord, USB cable, object removal tool, unclog tool, USB flash drive with print studio software, and quick start guide.

No. 48RJ79 includes printer, ECU curriculum on USB, professional development course (4 hr.), 2 build plates, 4 sheets of black build tape, 12 sheets of blue build tape, 4 PLA filament spools (black, white, blue, orange), power supply cord, USB cable, object removal tool, unclog tool, USB flash drive with print studio software, and quick start guide.

No. 54FY56 includes printer, black spool nylon filament, black spool Eco-ABS filament, USB flash drive with slicing software, build plate, 2 glue sticks, object removal tool, unclog tool, and quick start guide.

LULZBOT

3D Printers and Filament Spools

LULZBOT® 3D PRINTERS

Reliable, easy-to-use printer features innovative self-leveling, self-cleaning, and a modular tool head design for flexible and multimaterial upgrades. It utilizes an open filament (2.85 or 3mm) format, allowing the freedom to choose from dozens of materials. Build volume can make huge 3D prints nearly the size of a basketball or print many objects in a single print run. No. 490K93 features 20% larger build volume with no increase in footprint, an innovative belt-driven Z-axis for better print quality and faster cycle times. It prints both rigid and flexible filaments out of the box, and has quiet operation.

FILAMENT

ABS (acrylonitrile butadiene styrene) filament resists impacts, has moderate flexibility, and is stronger than PLA filament. It has a high melting point and requires a heated build platform to prevent uneven shrinkage, layer distortion, or warping. ABS filament is petroleum-based and emits toxic fumes when heated. It is used for building moving parts, automotive components, and electronic housings.

DEWALT FLEXVOLT

Power of Corded. Freedom of Cordless.

The FLEXVOLT™ system brings you an innovative voltage-changing battery and a lineup of 60V MAX* and 120V MAX* tools to match. Dual-voltage battery is backwards compatible with our 20V MAX* tools so you get up to 4x the runtime when used with DEWALT 20V MAX tools. (*Maximum initial battery voltage measured without a workload is 20, 60, and 120V. Nominal voltage is 18, 54, and 108).

- 20 MAX: 60V MAX battery is compatible with our 20V MAX tools
- 60V MAX: Brings the power of corded to whole new lineup of tools
- 120 MAX: Combines two 60 MAX batteries for cordless freedom

FASTER. Application Speeds

STRONGER. Brushless Motors Delivering Higher Torque Or More Power

BETTER. Runtime, More Features Or Improved Ergonomics

20V MAX* Tool Advantages

- Up to 57% more speed and up to 35% more runtime per charge than standard Li-Ion tools
- Lightweight and ergonomic design
- Innovative features that drive productivity
- XR® tools feature brushless motors for more efficient, cooler running
- Most XR® tools have high capacity batteries for longer runtime per charge

**Maximum initial battery voltage (measured without a workload) is 20 volts. Nominal voltage is 18.*

MX FUEL™ BATTERIES

- REDLITHIUM Intelligence optimizes battery and tool performance
- Fuel gauge
- Thick rubber overmold

Power large Milwaukee MX FUEL tools such as breaker hammers and core drills.

MX FUEL™ CHARGER

- Charges all MX FUEL battery packs
- Onboard indicator

Battery Capacity	Mfr. Model	Item No.
Battery Pack		
3.0 Ah	MXFCP203	**55JL77**
6.0 Ah	MXFXC406	**55JL75**

Charger Input Voltage	No. of Ports	Mfr. Model	Item No.
Battery Charger			
120V AC	1	MXFC	**55JL74**

Job Site Light

- Adjustable light heads
- Motorized mast
- Wheeled base
- Weighs 110 lb.
- ONE-KEY compatible

Fitted with 8" all-terrain wheels for transport and positioning. It includes an MX FUEL battery for a long runtime.

LED	27,000 lm	Fixed	High / Medium / Low	50,000 hr	120 in	**55JL66**

Handheld Concrete Saw

No. 55JL70

- Instant start
- Uses 12" or 14" blades
- Onboard water connection
- ONE-KEY compatible

Saw cart supports the saw to reduce user strain, positions the saw for consistent cuts, and provides space to hold a water tank for wet cutting operations.

Blade Dia.	Cutting Type	Max. Cutting Depth	Max. Blade Speed	Cordless Tool Kit Contents	Battery Capacity	Item No.

Drain Cleaning Machine

No. 55JL80

- 200 ft. capability in 3" to 8" dia. pipe
- Fully enclosed drum
- CABLE-DRIVE automatic feed and retract
- RAPID-STOP prevents cable binding
- ONE-KEY compatible

Brushless motor. Drum is fully enclosed to contain mess. Drain Cleaning Machine No. 55JL80 has POWERTREDZ lift assist that directs battery power to the treads to ease transport of the machine up and down stairs or in and out of service vehicles with just one person.

Drain Line I.D. Size Range	Max. Run	Operating Speed	Maximum Drum Capacity	Includes	Features	Item No.

Coring Drills

- Core up to 6" in reinforced concrete
- AUTOSTOP prevents over-rotation if the drill binds
- ONE-KEY compatible

AutoStop technology and patented clutch will deliver a safer handheld coring experience by preventing over rotation when the core is bound up. Performance gauge for torque monitoring and a level for making straight cores. The drill stand speeds setups, positions drills for consistent cuts, and eases transport.

Task Lights

Flood lights are broad beam lights used to illuminate a wide area. They are compact and hands free with a stick, clamp, hang, or carry design. Tower lights and task lights are hands-free and focus light in a particular direction or area. Tower lights mount on a tower while task lights are compact and available in stick, clamp, or carry design.

Rivet Tool

The M12™ cordless rivet tool can pull up to 250 3/16" stainless steel rivets or 450 1/8" steel rivets on one charge with a 1.5ah battery, reducing muscle effort. No compressors or hoses during set up and operation makes this tool a great replacement to pneumatic products. Compact cordless rivet tool measures only 6.5" in length allowing users more access in tight spaces.

Impact Driver Bit Sets			
55	(10) 1" Phillips Bits, (2) #1 Phillips, (6) #2 Phillips, (2) #3 Phillips, (10) 1" Square Bits, (2) Square Bits, (6) #2 Square Bits, (2) #3 Square Bits, (5) 1" Slotted Bit, #6 Slotted Bit, (3) #8 Slotted Bit, #10 Slotted Bit, (5) Star Bits, T15, (2) T20, (2) T25, Magnetic Bit Tip Holder	DeWalt	**423J98**
Impact Socket Sets			
10	¼" Hex to ½" Square Adapter ⅜, 7/16, ½, 9/16, ⅝, 11/16, ¾, ⅞"	Milwaukee	**19F372**
11	(2) ¼", ⅜" Adapters 5/16, ⅜, 7/16, ½, 9/16, ⅝, 11/16, ¾, ½"	DeWalt	**5XFA2**
12	5/16, ⅜, 7/16, ½, 9/16, ⅝, 11/16, ¾"	Milwaukee	**5ECE1**
12	(2) ¼", ½" Adapters 7/16, ½, 9/16, ⅝, 11/16, ¾, 13/16, ⅞"	DeWalt	**5XFA3**
13	¼'' Hex to ¼'' Square Adapter 5.5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15mm	Milwaukee	**19F373**
Magnetic Drive Guide Sets			
7	3" Magnetic Drive Guide, (2) PH2 Insert Bits, SQ2 Insert Bit, T20 Insert Bit, (2) T25 Insert Bits	Milwaukee	**419J71**
Pivot Holder and Bit Sets			
11	(1) Phillips Bit 1" P1, (1) Phillips Bit 1" P2, (1) Phillips Bit 1" P3, (1) Slotted Bit 1" SL ¼", (1) Slotted Bit 1" SL ⅛", (1) Slotted Bit 1" SL 3/16", (1) Slotted Bit 1" SL 9/32", (1) Square Bit 1" SQ, (1) Square Bit 1" SQ2, (1) Bit 1" T25, (1) Shockwave 30 Degree Knuckle Pivoting Bit Holder	Milwaukee	**10Z808**
Screwdriver Bit Sets			
18	1" Insert Bits (Phillips: P1, P2, P3, Square: Sq1, Sq2, Slotted: SL3/16", SL1/4") 2" Power Bits (Phillips: (2) P2, P3 Square: (2) SQ2, SQ3 Torx: T15, T20) 3½" Power Bits (Phillips: P2,square: Sq2) (1) Shockwave Compact Magnetic Bit Holder, Case w/Bulk Storage	Milwaukee	**10Z783**
20	(2) 2" PH#2, 2" SQ#2, 1" SL#8, (4) 1" PH#2, (2) 1" PH#3, 1" SQ#1, (2) 1" SQ#2, 1" 2" SL8, ¼, 5/16, ⅜ Nutsetters, ⅛" and 3/16" Impact Drill Bits, Pivoting Magnetic Holder	DeWalt	**5XFA6**
25	(7) 1" Phillips Bits, (3) 1" Torx Bits, 1" Slotted Bits, (3) 1" Square Bits, (3) 2" Phillips Bits, (2) 2" Torx Bits, 2" Square Bit, 3½" Phillips Bit, Bit Tip Holder, Magnetic Sleeve	DeWalt	**423J96**
26	(1) Phillips Bit 1" P1, (1) Phillips Bit 1" P2, (3) Phillips Bit 1" P3, (1) Square Bit 1" SQ1, (2) Square Bit 1" SQ2, (1) Square Bit 1" SQ3, (2) TORX(R) Bit 1" T20, (2) TORX(R) Bit 1" T25, (1) TORX(R) Bit 1" T30, (1) ¼" Hex to ⅜" Square Adapter, (1) ¼" Magnetic Nut Driver, (1) Phillips Bit 2" P2, (1) Square Bit 2" SQ2, (1) TORX(R) Bit 2" T20, (1) TORX(R) Bit 2" T25, (1) Slotted Bit 1" SL 3/16", (1) ⅜" Drive: ½" Socket, (1) ⅜" Drive 9/16" Socket, (1) ⅜" Magnetic Nut Driver, (1) 5/16" Magnetic Nut Driver, (1) SHOCKWAVE(TM) Compact Magnetic Bit Holder	Milwaukee	**19RK07**
32	Quick Change Drill Bits: 1/16, 5/64, 3/32, 7/64, (2)1/8, 9/64, 5/32, 3/16, 7/32, ¼", 1" Insert Bits: (20) PH2, ¼" Quick Change Bit Holder 2.5" OAL	IRWIN	**34F743**
34	(1) 1" PH1, (4) 1" PH2, (4) 1" PR2, (1) 1" PH3, (1) 2" PH2, (1) 3½" PH2, (1) 1" SQ1, (4) 1" SQ2, (1) 1" SQ3, (1) 2" SQ2, (1) 3½" SQ2, (1) 1" SL6, (2) 1" SL8, (1) 1" SL10, (1) 2" SL8, (1) 3½" SL8, 1 Each: T15, T20, T25, T30 1" Torx Bits, 1 Each: 1	DeWalt	**2VDK2**
35	(28) 1" Insert Bits, (4) 2" Power Bits, (2) Nutsetters, Slim Quick Change Holder with Magnetic Sleeve	DeWalt	**465T65**
35	Impact Ready Socket Adapters ⅜", 7/16", ½", 9/16", Impact Ready ¼" Hex Shank Adapter, Impact Ready Nutsetters 5/16", ⅜", ¼", 3" Impact Ready Screw Lock Holder, 2" PH2 Impact Ready Bits, 1" Square Impact Ready Bits: SQ1, (4) SQ2, SQ3, 1" Philips	DeWalt	**20UH15**
38	(8) 1 In. PH2, (8) 1 In. Drywall Bits -PR2, (1) PH1, (1) PH3, (1) 1 In. SQ1, (4) 1 In. SQ2, (1) 1 In. SQ3; 2 In. (5) #2 Phillips Power Bits; (2) Nutdrivers ¼ and 5/16 In., ¼ Hex Shank; (1) ¼ to ⅜ In. Socket Adapter, (4) ⅜ In. Drive Deep Sockets	DeWalt	**2AEX8**
40	⅜" Nutsetter, ¼" Nutsetter, 5/16" Nutsetter, Impact Ready Sleeve, 3" Impact Ready Screw Lock Holder, 6-2" PH2 Impact Ready Bit, 2" SQ2 Impact Ready Bit, 2" T25 Impact Ready Bit, 2" SL8 Impact Ready Bit, (4) 1" PH2 Bit, (2) 1" SL8 Impact Ready Bit, 1"	DeWalt	**20UH16**
40	(1) ¼" SHOCKWAVE(TM) Hex Drive Bit, (1) 3/16" SHOCKWAVE(TM) Hex Drive Bit, (1) ⅛" Drill Bit, (1) Hex Bit 1" ¼", (1) Hex Bit 1" ⅛", (1) Hex Bit 1" 3/16", (1) Hex Bit 1" 9/32", (1) Phillips Bit 1" P1, (3) Phillips Bit 1" P2, (1) Phillips Bit 2" P2, (1) Phillips Bit 2" P3, (1) Phillips Reduced 1" PR2 Bit, (1) Slotted 1" #10 Bit, (1) Slotted 1" #8 Bit, (1) Slotted 2" #10 Bit, (1) Square Bit 1" SQ1, (2) Square Bit 1" SQ2, (1) Square Bit 1" SQ3, (1) Square Bit 2" SQ2, (1) Square Bit 2" SQ3, (1) TORX(R) Bit 1" T15, (1) TORX(R) Bit 1" T20, (2) TORX(R) Bit 1" T25, (1) TORX(R) Bit 2" T20, (2) TORX(R) Bit 2" T25, (1) ¼" Magnetic Nut Driver, (1) ⅜" Magnetic Nut Driver, (1) 5/16" Magnetic Nut Driver, (1) ½" Socket Adapter , (1) ⅜" Socket Adapter, (1) SHOCKWAVE(TM) Compact Magnetic Bit Holder	Milwaukee	**45EU85**

Drilling and Screwdriving Sets

- ¼" shank bits

No. of Pieces	Includes	Brand	Item No.
Countersink Drill Bit Set			
	(3) Countersinks: #6, #8 and #10	DeWalt	**4WM50**
Drill/Drive Sets			
15	No. 4WM47 Rapid Load Holder; Magnetic Drive Holder; Hex Shank Drill Bits: ⅛ and ¼"; Bit Tips: (2) 1" and 1" #1 Square Recess; Insert Bit Tips: #1, and (4)1" #2 Phillips; #8 Slotted; Power Bits: 2" #2 Phillips, 2" #2 Square Recess; ABS Carrying Case	DeWalt	**1UG94**
32	(1) 1" PH1, (5) 1" PH2, (1) 1" SL8, (1) 1" SQ1, (1) 1" SQ2, (2) 2" PH1, (2) 2" PH2, (1) 2" SL8, (1) 2" SL10, (1) 2" SQ2, (1) 3½" SQ2, (1) ¼, (1) 5⁄16" Nutsetter, ¼" and ⅜" Socket Adapters, Compact Magnetic Drive Guide, Rapid Load Holder, ½" and	DeWalt	**2KLZ9**
95	(1) 3⁄64" Black Oxide Drill Bit, (1) 5⁄32" Black Oxide Drill Bit, (1) 7⁄64" Black Oxide Drill Bit, (1) 1⁄16" Black Oxide Drill Bit, (1) 1⁄8" Black Oxide Drill Bit, (1) 3⁄16" Black Oxide Drill Bit, (1) ¼" Black Oxide Drill Bit, (1) 3⁄32" Black Oxide Drill Bit, (2) Hex Bit 1" 1⁄16", (2) Hex Bit 1" ¼", (2) Hex Bit 1" 3⁄16", (1) Hex Bit 1" 5⁄32", (1) Hex Bit 1" 9⁄64", (2) Hex Bit 1" 1⁄8", (2) Hex Bit 1" 3⁄32", (2) Hex Bit 1" 5⁄64", (2) Hex Bit 1" 7⁄64", (3) Phillips Bit 1" P1, (10) Phillips Bit 1" P2, (4) Phillips Bit 1" P3, (3) Phillips Bit 1" PR2 , (1) Phillips Bit 2" P2, (1) Pozidrive Bit 1" PZ2, (1) Pozidrive Bit 1" PZ3, (2) Slotted Bit #4, (2) Slotted Bit #6, (2) Slotted Bit #8, (2) Slotted Bit #10, (1) Slotted Bit #12, (1) Slotted 2" Bit #8, (3) Square Bit 1" SQ1, (8) Square Bit 1" SQ2, (3) Square Bit 1" SQ3, (1) Square Bit 2" SQ2, (2) TORX(R) Bit 1" T10, (2) TORX(R) Bit 1" T15, (3) TORX(R) Bit 1" T20, (3) TORX(R) Bit 1" T25, (2) TORX(R) Bit 1" T27, (2) TORX(R) Bit 1" T30, (2) TORX(R) Bit 1" T40, (2) TORX(R) Bit 1" T9, (1) TORX(R) Bit 2" T20, (1) TORX(R) Bit 2" T25, (1) ¼" Magnetic Nut Driver, (1) 5⁄16" Magnetic Nut Driver, (1) Magnetic Drive Guide	Milwaukee	**36FX64**
Drive Guide Sets			
7	Compact Magnetic Drive Guide; Bit Tips: #1, (10) #2, and #3 Phillips; #6, (2) #8, and #10 Slotted; #1, (6) #2, and #3 Square Recess; Magnetic Nut Setters: ¼" and 5⁄16"; Double-End Power Bits: P#1/S#6, (3) P#2/S#8, (3) P#2/P#2, and P#3/S#10; Power Bits:	DeWalt	**4WM41**
14	(2) Magnetic Drive Guides, (6) #2 Phillips, (2) #8 and #10 Slotted, (3) #2 Square Recess Bits, Case	DeWalt	**2KLK3**
Magnetic Drive Guide Set			
7	3" Magnetic Drive Guide, (2) PH2 Insert Bits, SQ2 Insert Bit, T20 Insert Bit, (2) T25 Insert Bits	Milwaukee	**419J71**
Pivot Holder and Bit Set			
11	(1) Phillips Bit 1" P1, (1) Phillips Bit 1" P2, (1) Phillips Bit 1" P3, (1) Slotted Bit 1" SL ¼", (1) Slotted Bit 1" SL ⅛", (1) Slotted Bit 1" SL 3⁄16", (1) Slotted Bit 1" SL 5⁄32", (1) Square Bit 1" SQ, (1) Square Bit 1" SQ2, (1) Bit 1" T25, (1) Shockwave 30 Degree Knuckle Pivoting Bit Holder	Milwaukee	**10Z808**
Screwdriving Sets			
12	Drill Drive Holder; Drill Drive Connector; #6, #8, and #10 Drill Bits with Countersinks; (2) #6, #8, and #10 Replacement Bits; (3) Screwdriver Bit Tips, Heavy-Duty Container	DeWalt	**6XG79**
20	Compact Screw Guide, (19) 1" Insert Bits: P1, (7) P2, P3, SQ1, (3) SQ2, SQ3, T15, T20, T25,SL6-8, SL8-10	Milwaukee	**45L154**
21	2" Magnetic Bit Tip Holder; Bit Tips: #1, (6)#2, and #3 Phillips; #6, #8, and #10 Slotted; #1 and (3)#2 Square Recess; Magnetic Nut Setters: ¼" and 5⁄16"; Power Bits: 2" #2; 2" #2 Square Recess	DeWalt	**4WM44**
24	Compact Magnetic Drive Guide, #1 Phillips Bit 1" (1), #2 Phillips Bit 1" (5), #3 Phillips Bit 1" (1), #1 Square Recess Bit 1" (1), #2 Square Recess Bit 1" (3), #3 Square Recess Bit 1" (2), 8-10 Slotted Bit 1" (1), ¼" x 1 ⅞" MAG Nutsetter (1), 5⁄16"	IRWIN	**3MJA1**
29	Magnetic Drive Guide; Bit Tips: #1, (10)#2, and #3 Phillips; #6, (2)#8, and #10 Slotted; #1, (6)#2, and #3 Square Recess; Magnetic Nut Setters: ¼" and 5⁄16"; Power Bits: 2" #2 Phillips; 2" #2 Square Recess	DeWalt	**4WM45**
31	(10) 1 in. PH Bits (2) PH1, (6) PH2, (2) PH3; (10) 1 in. SQ Bits(2) SQ, (6) SQ2, (2) SQ3; (5) 1 in. SL Bits SL6, (3) SL8, SL10; (5) Star Bits T15, (2) T20, (2) T25; (1) Magnetic Bit tip Holder	DeWalt	**34D640**
31	(9) Security Star Bits T8, T10, T15, T20, T25, T27, T30, T35, T40; (6) Security Hex Bits 5⁄16 in., 3⁄32 in., 7⁄64 in., ⅛ in., 9⁄64 in., 5⁄32 in.; (4) Security Hex - Metric 2mm, 2.5mm, 3mm, 4mm; (4) Spanner Bits 4, 6, 8, 10; (4) Tri-Win.g 1, 2, 3, 4	DeWalt	**34D642**
37	Compact Magnetic Drive Guide, Bit Tips #1, (10) #2 and #3 Phillips, #1, (2) #8 and #10 Slotted, #1, (6) #2 and #3 Square Recess, Magnetic Nut Setters ¼" and 5⁄16", Double-End Power Bits P#1/S#6, (3) P#2/S#8, (3) P#2/P#2 and P#3/S#10, Power Bits 3½" #	DeWalt	**4WM46**
37	(20) 1" Phillips Bits: PH1, (18) PH2, PH3, (8) 1" Square Bits: PH1, (6) PH2, PH3, (4) 1" Slotted Bits: SL6, (2) SL8, SL10, (2) Nut Drivers: ¼", 5⁄16", Magnetic Drive Guide, Compact Magnetic Drive Guide, 2" Power Bits: PH2	DeWalt	**25CC48**
42	(1) Hex Bit 1" ¼", (1) Hex Bit 1" 3⁄16", (1) Phillips Bit 1" P1, (6) Phillips Bit 1" P2, (2) Phillips Bit 1" P3, (2) Phillips Bit 1" PR2 , (1) Phillips Bit 2" P2, (1) Phillips Bit 2" P3, (1) Phillips Bit 3.5" P2, (1) Slotted Bit #6, (1) Slotted Bit #8, (1) Slotted Bit #10, (1) Slotted 2" Bit #8, (1) Slotted 2" Bit #10, (2) Square Bit 1" SQ1, (6) Square Bit 1" SQ2, (1) Square Bit 1" SQ3, (1) Square Bit 2" SQ2, (1) Square Bit 2" SQ3, (1) Square Bit 3.5" SQ2, (1) TORX(R) Bit 1" T10, (1) TORX(R) Bit 1" T15, (1) TORX(R) Bit 1" T20, (1) TORX(R) Bit 1" T25, (1) TORX(R) Bit 1" T30, (1) TORX(R) Bit 2" T15, (1) TORX(R) Bit 2" T20, (1) TORX(R) Bit 2" T25, (1) Magnetic Drive Guide	Milwaukee	**36FX65**
45	(16) 1" PH Bits: PH1, (14) PH2, PH3, (4) 1" SL Bits: SL6, (2) SL8, SL10, 98) 1" SQ Bits: SQ1, (6)SQ2, SQ3, Magnetic Drive Guide, 3½" Phillips Bits: PH2, 3½" Slotted Bits: SL2, (8) 2" Double Ended Bits: (3) PH2/PH2, PH1/SL6, (3) PH2/SL8, PH3/SL10, (2	DeWalt	**25CC45**
51	(14) 2" Power Bits of Phillips, Pozi, Slotted, Square End, Torx®, (7) Nut Setters, SAE 3⁄16-7/16", (6) Hex Bits SAE 3⁄32-1/4", (3) Pozi Bits, (5) Phillips Bits, (7) Star Bits, (8) Square Bits, (1) Magnetic Holder, Master Kit, No Screwdriver Handle	Westward	**1VXP5**
175	Phillips Ribbed, Slotted , Phillips, Pozi Phillips, Hex, Torx(R), Spline, Roberts, Security Bits, Tri Wing, Clutch Bits, Quick Change Chuck, 1 and 2" Drive Socket Adapter, 4 to 1 1⁄16" Screw Guide Driver, Storage Case	Westward	**1VXP2**

APEX. Milwaukee IRWIN.

Bit Holders

APEX®—Adapt hex drive and female square drive power tools to insert bits. Holders with µ-Guard™ cover have nonremovable thermoplastic urethane covering which absorbs side impacts and provides a protective barrier.

Irwin®—Holders with C-ring design add internal clip in the retaining ring notch to hold bit more securely. Can be used with socket wrench or socket adapter. Square Drive holders allow use of both power bits and insert bits.

Step Drill Bits

IRWIN Unibit · Milwaukee · WESTWARD

Ideal for drilling multiple diameter holes in steel, copper, brass, aluminum, PVC, wood, and laminates up to ⅛" thick. Irwin bits have Speed Point™ tip design and single flute cutting edge. Cobalt bits resist heat buildup and have 3-sided flattened shank. All Irwin ¼" shanks are quick change. Milwaukee bits with JAM-FREE performance feature a dual-flute design.

HSS and Cobalt Drill Bits and Sets

Milwaukee · DEWALT · WESTWARD

DeWalt—Bit sizes up to 11/64" are split point; sizes 3/16" and larger are Pilot Point™. Pilot Point tips start on contact for clean, accurate holes and reduce lock-up on breakthrough. Cobalt tips are for use in stainless steel and other hard metals.

Milwaukee—Precision start bits have parabolic flute that clears chips faster.

Westward®—Bit sizes smaller than ⅛" have split point; sizes ⅛" and larger have grooves and split point. Groove design breaks up chips for faster and more accurate drilling.

Wood Boring Bits

Irwin® Speedbor®—Bits have a tri-flute design for faster drilling and chip ejection. Innovative cutting spur leaves a smooth, clean hole. ¼" Quick Change hex shanks grip firmly.

Bosch Daredevil®—These spade bits are designed for professional users seeking speed, ease of use, and hole quality. Up to 10X faster than conventional spade bits.

Ship Auger Bits

Irwin® Speedbor®—Welded chromium alloy cutting edges do not break when striking nails.

Bosch—"Nailkiller" auger bits offer leading-edge technology for wood drilling. They are designed for superior performance against nail hits. Double cutter and reamer edge provide improved hole quality and deliver additional strength during aggressive drilling.

Carbide Hole Cutters

Milwaukee—For cutting holes in sheet metal. Use with quick arbor No. 48Z566.

Morse—For cutting stainless steel, steel plate, aluminum, and copper. Include pilot bit. Item Nos. beginning with 45F are also for PVC/ABS and plastic.

DeWalt—These saws feature durable carbide teeth and deliver fast drilling. An ejection spring offers easy plug removal,and a raised shoulder helps to prevent breakthroughs.

Glass and Natural Stone Tile Bits

Glass and tile bits have precision tips that help with bit wandering and bit walking. High-quality carbide tips with reinforced heads prevent bit cracking. Innovative geometry allows bit to drill faster. Bosch natural stone tile bits are designed for slate, granite, and specialty tile. These bits provide a multigrind head with multiple edges. They deliver 20% faster drilling in natural stone and tile than standard glass and tile bits.

BOSCH DEWALT

Hammer Drill Masonry Bits

Bosch BlueGranite Turbo™ carbide hammer drill bits are designed with a hex shank for use in today's higher torque hammer drills. Feature an upgraded four-grind head, delivering additional cutting angles for faster drilling. Multigrind centering tip also provides for precise starts in masonry, block, and concrete. DEWALT bits can power through masonry, concrete, rock and more. Feature rock carbide tips that maximize surface contact for extended bit life and a 4-flute design that cleans debris while you work.

Note: For use with hammer drills. Do not use with standard drills.

SDS Plus® Hollow Bits

BOSCH DEWALT

SDS plus

When used with a dust extractor, DeWalt's solid carbide hollow drill bits extract dust while drilling. The result is less dust, fast holes, and fast adhesive anchor installation. This minimizes the user's exposure to dust while drilling and adheres to OSHA Table 1 compliance. Connect these bits directly to DeWalt's Airlock System to form a secure, locking connection. Bosch Speed Clean™ bits connect to a vacuum system for time savings when compared with the conventional drill-blow-brush-blow method. Less dust and friction also result in faster drilling. Include rubber adapter and work with vacuum system to manage airborne silica. Optimized for adhesive anchoring.

BOSCH DEWALT SDS max

SDS Max® 4-Cutter Rotary Hammer Bits

BOSCH SPEED X™

Dust extraction bits are built to extract dust while drilling for faster drilling speeds. Solid carbide head and S-cutter design provide added speed and durability.

DEWALT HIGH-IMPACT CARBIDE™

Bits feature innovative high-impact tips that maximize surface contact for long bit life and an open-head design that channels dust into flutes for fast drilling. An elongated helix expedites mill removal, and a hardened core helps to reduce bit breakage.

BOSCH DEWALT SDS max

SDS Max® Hollow Bits

When used with a dust extractor, DeWalt's solid carbide hollow drill bits extract dust while drilling. The result is less dust, fast holes, and fast adhesive anchor installation. This minimizes the user's exposure to dust while drilling and adheres to OSHA Table 1 compliance. Connect these bits directly to DeWalt's Airlock System to form a secure, locking connection. Bosch Speed Clean™ bits connect to a vacuum system for time savings when compared with the conventional drill-blow-brush-blow method. Less dust and friction also result in faster drilling. Include rubber adapter and work with vacuum system to manage airborne silica. Optimized for adhesive anchoring.

Diamond Coring Rigs

HUSQVARNA HANDHELD CORING RIGS

No. 2LEA5 compact core drill features 3-speed water-cooled gearbox and pistol grip design. Good for horizontal drilling and confined spaces. No. 6PEV2 has adjustable handle and electronic positioning for vertical, horizontal, or angle drilling. LED display indicates positioning in both horizontal and vertical planes. Use for both dry and wet drilling.

HUSQVARNA CORING RIGS W/BASE

Use for angle drilling. No. 3RDN8 is a single-speed unit with V-groove roller carriage for accurate alignment. Nos. 3RDN7 is a heavy-duty, 2-speed unit with wheels.

Husqvarna Milwaukee

MILWAUKEE® CORING RIG MOTORS

2-speed units feature either shear pin or clutch to protect gears and motor against overload. Include built-in water swivel and water control valve.

DIAMOND CORING BITS

Wet bits have 14" drilling length and are used to drill concrete, masonry, brick, granite, marble, and stone. Dry bits have 10" drilling length and barrel vents for cooling. Use for cutting brick and concrete block.

Tile Saws

Tile saws have a table that supports tile while it's being cut to size. They can be used to make wet or dry cuts. Wet cutting applies water to the blade and workpiece to reduce airborne dust and particles. Dry cutting is generally used for short cuts or intermittent cutting.

Blade Dia.	Max. Cutting Depth	Max. Cut Length	Arbor Size	Max. Blade Speed	Voltage	Current	Includes	Brand	Item No.

Masonry Saws

Masonry saws use a diamond saw blade to wet or dry cut stone, brick, cinder block, and concrete. Wet cutting reduces airborne contaminants and keeps the blade cooler, extending blade life. Dry cutting requires a dust collection system to keep dust to a minimum.

Flooring Saws

- 120VAC, 7A
- 1 HP

Circular saw blades to make straight, rip, and angled cuts in wood and laminate flooring. The saw is mounted on rails that allow the blade to move smoothly to make straight, accurate cuts. A fence keeps the workpiece square and has adjustable stops to cut miters.

Blade Dia.	Cutting Type	Max. Cutting Depth	Miter Angle Range	Arbor Size	Item No.

Gas-Powered Concrete Chain Saws

- Two-stroke, air-cooled
- Gas/Oil (50:1 (2%))

Gas-powered concrete chain saws are used outdoors or in well-ventilated areas to make cuts in hard, abrasive materials such as masonry, cured concrete, and rock. A diamond-grit embedded chain rotates around an oblong bar to abrade the workpiece. They are powered by fuel to provide sustained power for long periods of time.

Cordless Handheld Concrete Saws

- Wet/Dry

Cordless handheld concrete saws are battery-operated tools used to cut masonry, stone, and reinforced concrete. They can be used vertically, making them a good choice for demolition and cutting through walls and automobile and infrastructure wreckage.

Gas-Powered Power Cutters

Gas-powered power cutters are handheld tools used to make vertical and horizontal cuts concrete and masonry. They have an internal-combustion engine to provide more consistent power and longer run times than battery-operated saws. Must be used outdoors in well-ventilated areas. Wet cutting applies water to the cut to reduce airborne particles and lubricate the cut.

Corded Walk-Behind Concrete Saw

SKILSAW

- 7" Blade Dia.
- Wet/Dry Cutting

Corded walk-behind concrete saws are used indoors and outdoors to score or cut trenches and inlay and stress lines in concrete floors and slabs. They require access to an electrical power source and have longer runtimes than gas-powered saws. Wet cutting applies water to the cut line to reduce airborne particles and help lubricate the cut.

Husqvarna

Gas-Powered Walk-Behind Concrete Saws

Gas-powered walk-behind concrete saws are used outdoors to cut trenches and inlay and stress lines in concrete sidewalks, driveways, and slabs. They are slightly more powerful than corded walk-behind concrete saws and can be used where access to an electrical power source is limited or unavailable. Because they produce fumes, they must be used outdoors in well-ventilated areas.

Concrete Floor Grinders and Polishers

Husqvarna

FLOOR GRINDERS

PG 280 and PG 400

Provide efficient grinding due to high rpm levels, dust guard, and vacuum port. Include Redi Lock™.

PG 530

Planetary design with variable speed, forward, and reverse for high-productivity removal or polishing.

PG 680 and PG 820

Dual-drive Technology™ allows for independent control of speed and direction on both planetary and satellite discs. Triple-headed grinders provide more downward pressure and power. Gear-driven planetary head and premium-quality belt. PG 820 RC is a remoter control machine for increased production rates.

DUST EXTRACTORS AND COLLECTORS

Extractors are for large-scale projects that demand substantial dust extraction. Tested and certified HEPA class H13 filters; required for silica dust are standard.

AIR SCRUBBERS

Air scrubbers can be used to supplement other dust suppression equipment. Can be used as negative air machine. Combination pre-filter and HEPA filter to ensure 99.97% efficiency at 0.3 microns.

SLURRY VACUUMS

Handles tough jobs with liquids such as concrete slurry, oils, and machining coolants. Integral strainer screens gravel to protect pump. For use with flat saws, core drills, power cutters, masonry hand tile saws.

Diamond Saw Blades

Diamond saw blades have diamond grit on the cutting edge to cut through concrete, tile, and brittle metal, such as cast iron, in construction and road work applications. Wet-cutting blades require a water source used to keep the blade cool, extending blade life and reducing airborne dust and contaminants.

Continuous rim diamond blades are used on tile, decorative stone, and brittle and glazed materials that chip easily.

Segmented rim diamond blades have slots cut into the rim of the blade to help dissipate heat and carry away dust and water slurry when cutting materials.

Turbo Rim diamond blades have a continuous rim with narrow bands to help dissipate heat, carry material away from the cut, and cut through material faster than segmented blades.

Continuous Rim | **Segmented Rim** | **Turbo Rim**

Nibblers and Shears

Nibblers work by punching or nibbling out small sections of metal. Shears work more like scissors to cut patterns in sheet metal.

Corded Reciprocating Saws

- 120VAC

Feature keyless blade clamp and rubber boot for superior gripping and operator comfort. Used in construction and demolition work to make fast, aggressive cuts in wood, metal, and nail-embedded wood. Corded reciprocating saws have longer run times and generally have more power than battery-operated tools. They are used in demolition, construction, metalworking, and other applications where precision is unimportant. Interchangeable blades are used to cut specific workpiece materials, such as wood or metal.

Thick Metal Reciprocating Saw Blades

- Straight back style

These reciprocating saw blades cut thick metal 3⁄16" and over. They are used with corded and cordless saws, and have a lower teeth per inch (TPI) than blades designed for cutting thinner metals to prevent the blade from clogging, which can cause the cutting to stop or affect cut quality.

Wood & Pruning Reciprocating Saw Blades

Wood and pruning blades are used to make aggressive cuts through wood without embedded materials, such as tree limbs. These blades are used in corded and cordless reciprocating saws, and have fleam-ground blades that cut on both the extension and retraction movement to speed cutting.

Thin Metal Reciprocating Saw Blades

Reciprocating saw blades cut 1⁄8" and thinner metal. These blades are used with corded and cordless saws to aggressively and quickly cut through thin metal without grabbing the material and causing vibration.

Hacksaws

Cut pipe, profiles, and beams made of steel, cast iron, concrete and plastic with use of clamps. 110V No. 10E998 includes variable speed. Pneumatic version No. 10E999 includes a hose coupler and is ideal for cutting pipes where sparks may be an issue. Includes 2 blades, wrench, and side handle.

Scroll Saws

Make accurate cuts while reducing vibration and noise. Tool-free blade clamps make changing blades easy. Electronic variable speed on each saw adjusts for various materials.

DeWalt—Unique double-parallel link-arm design. Table tilts 45° left and right. Front-mounted controls and multidirectional dust blower. Uses standard 5" blades.

Cut-Out Tools

Designed to cut holes in drywall, thin metal, or thin plywood. Engineered to withstand the most demanding conditions.

Drywall Spiral Saw—Easy to handle, with dual grip zones. Vents keep dust away from user.

Cut-Out Tools—Cut tough material quickly and accurately. No. 14G988 features "Slide and Bump" On/Off switch and tool-free depth adjustment. No. 5VC57 features keyless tool-free bit change and bump-off switch.

Jigsaw Blades

BOSCH

- For more information on specific blade applications, see Grainger.com®

Bimetal—Ideal for demanding applications. Blades up to 10 teeth per inch are best for wood, particleboard, and plastics. Blades 14 teeth per inch and higher are best for metal and aluminum.

High Carbon Steel—Handle fast curve cuts, smooth cuts, and smooth curve cuts.

Carbide—Designed with carbide grit materials for abrasives, or carbide teeth for cutting stainless steel, ceramics, and fiberglass.

High Speed Steel—Fully hardened. Ideal for cutting metals and aluminum.

Blade Sets—Assortments of high carbon steel, high speed steel, and bimetal blades. No. 1TEH6 also includes carbide blade.

Progressor Tooth Design—Versatile tooth design is smaller at the top, larger at the bottom. Blades remain cooler and cut faster than high speed steel or bimetal blades.

Metal-Cutting Circular Saws

- 120VAC
- Left-side blade makes it easier to see sight lines when the saw is held with the right hand
- Right-side blade positions the blade away from the user's body when the saw is held in the right hand

SKILSAW Slugger by FEIN Milwaukee

Metal-cutting circular saws are used in metal fabrication and autobody shops to cut metal when precision is required. They rotate slower and have more torque than general purpose saws to make cleaner, faster cuts.

Left Blade General Purpose Circular Saws

▪ 15A ▪ 120VAC

These general purpose circular saws are built with a left-side blade that makes it easier to see sight lines when the saw is held with the right hand. **Direct drive** saws have motors that transfer power directly from the rotation of the motor to rotation of the wheel which turns the blade. They are designed with the motor on the side of the saw and are wider but lighter than worm drive saws. **Worm drive** saws are constructed with the motor directly behind the saw and are more powerul than direct drive saws. They have a fully-enclosed gear system that rotates the blade, and narrow profile to reach confined spaces.

Corded Miter Saws

These saws make straight, mitered, beveled, and compound cuts on materials like wood and plastic. They plug into a 120VAC power source and are generally more powerful than cordless saws. All are sliding except No. 19M490 is fixed.

Dayton BAILEIGH JET

Standard Cabinet Table Saws

These table saws have a height-adjustable circular blade that's mounted below the table to make precise cross, bevel, and rip cuts. Built with extended surfaces to support large workpieces and sheet goods, these saws provide more precise cuts and control than miter saws and portable table saws. They're plugged into a wired power source and not intended to be moved.

SawStop

Cabinet Table Saws with Automatic Safety Blade Retraction

- 10" blade dia.
- ⅝" arbor size
- Max. blade speed: 4000 rpm
- Bevel angle range: 0° to 45° left
- 3 ⅛" max. cutting depth at 0°
- 2 ¼" max. cutting depth at 45°

Cabinet table saws have a safety feature that automatically retracts the saw blade when any part of the person's body, such as hands or arms, touches the blade. They have an extended surface on both sides of the blade to support large workpieces. Saws are plugged into wired power source and are not intended to be moved.

Fiber Cement-Cutting Circular Saw Blades

These saw blades cut through fiber cement panels such as Hardie board and Durock. They have have a low tooth count to help reduce silica and other dust when cutting. Poly-crystalline diamond (PCD) teeth cut through hard, abrasive material that cannot be cut using standard carbide blades. Fiber-cement board is used for backing panels and exterior siding.

Portable Band Saws and Blades

Corded portable band saws use a toothed blade that rotates around two wheels to make clean cuts and preserve threads when cutting threaded rod. **Compact** band saws have up to a 3¼" capacity and are generally smaller and lighter than standard portable band saws. **Standard** band saws cut pipe and conduit up to 3½". **Deep-cut** band saws have a 5" cutting capacity, and are used to cut large-diameter pipe and structural shapes. Blades for portable band saws are used to cut metal pipe, strut channel, and threaded rod. Blade length is determined by the tool capacity. **Bi-metal** blades are commonly used for cutting machinable metals and stainless steel. **Carbon** steel blades are for cutting nonferrous metals.

Cold Saws and Blades

These saws make precise cuts in metal and use coolant to keep the blade and workpiece cool. They have toothed blades and are often used for high-volume cutting applications in metal fabrication and machine shops. **High-speed** saws spin at 3000 to 4000 rpm and are commonly used to cut plastic, aluminum, and other non-ferrous metals. **Low-speed** saws spin at up to 500 rpm and are used to cut steel, stainless steel, and other ferrous metals. **Cold saw blades** have higher tooth counts than other blades and are ideal for use in machines that spin at very low speeds with higher torque. They carry heat and chips away from the blade to produce a cool, clean, and burr-free cut edge.

Chop Saws

Built to make straight cuts in metal with a toothed blade, these chop saws spin at a lower rpm and produce less sparking than cut-off saws, which reduces heat buildup in the blade and workpiece. They have a fence that supports the workpiece and are adjustable to make angled and miter cuts. Hose chop saws are designed to cut through rubber and plastic hose.

Abrasive Cut-Off Wheel Diameter 6" and Greater

Aluminum Oxide abrasive is suitable for cutting and grinding ferrous metal, gray iron, stainless, nonferrous materials, aluminum, and pipeline. Ceramic abrasive is suitable for fast cutting on almost all materials, including stainless steel, mild steel, and aerospace alloys. Diamond abrasive is suitable for most metals, including steel, sheet metal, stainless steel, rebar, cast-iron, aluminum, and other non-ferrous metals. Silicon Carbide abrasive is suitable for cutting nonferrous materials. Zirconium Aluminum Oxide abrasive is suitable for aggressive material removal on stainless steel

Economy and Professional Heat Guns

No. 34G833

No. 6Z360

No. 3KH79

No. 4HWK4

No. 5JNK6

No. 406P77

ECONOMY

Porter Cable—Temperature dial and slide switch with variable temperature settings. Integrated kickstand and hanging hook.

Westward—Variable temperature gun has mica composite heating element and polycarbonate housing.

PROFESSIONAL FIXED TEMPERATURE

Milwaukee—3-position rocker switch. Impact resistant heating element.

PROFESSIONAL VARIABLE TEMPERATURE

DeWalt—Allow temperature adjustment in 50°F increments. Built-in overload protection. Built-in kickstand and hang ring.

Milwaukee—Dial control to select temperature. Impact resistant heating element.

PROFESSIONAL LCD

Westward—Digital LCD shows temperature in increments of 10°F. Retractable heat guard and built-in stand. High-impact polymer housing and mica composite heating element.

DeWalt—LCD shows temperature, adjustable in 50°F increments. Built-in overload protection. Built-in kickstand and hang ring.

Milwaukee—LCD shows preset temperature in 10°F increments. Features ceramic-encapsulated heating element, removable air filter, and thermo-protected operation.

STEINEL—LCD shows temperature, selectable in 10°F increments.

Master Appliance—LCD shows air speed and temperature in °F or °C in 10° increments. No. 3ZLU1 comes with a Prolock™ magnetic key that allows you to lock the controls and prevent changes to the temperature and airflow settings.

MASTER HEAT TOOLS FOR INDUSTRY™ STEINEL® PROFESSIONAL

Industrial Heat Guns and Blowers

VARITEMP® HEAT GUNS

- Powerful universal motor with high air-flow rating
- Heavy-duty die-cast aluminum housing
- Built-in, 90°-rotating, adjustable metal stand

Use to shrink tuning, bend plastics, cure adhesives, heat or dry parts, or strip paint. Reinforced mica-insulated ceramic heating element. External, replaceable carbon brushes. 3-position rocker switch.

Varitemp heat guns allow locked-in selectable temperature up to 1000°F.

MASTERFLOW® HEAT BLOWERS

- Powerful, quiet, brushless continuous-duty motor
- 90°-adjustable nonslip stand

Use for heating, drying, or shrinking applications. Mountable over conveyor lines and on machinery. Reinforced mica-insulated heating element. No. 4Z718 requires 18A 5-20R receptacle.

STEINEL HEAT BLOWERS

No. 5KNP7 has slide switch and baffle to adjust air and temperature. Series HB1750 blowers have continuously adjustable airflow and plug-in heating element. Keys lock in temperature range.

STEINEL® PROFESSIONAL MASTER HEAT TOOLS FOR INDUSTRY™ GA GRAINGER APPROVED

Specialty Heat Guns

WAND STYLE

STEINEL—Kits include HG 2620 E heat tool and accessories for specific applications.

MASTER-MITE® AND ESD HEAT SHRINK SYSTEM

- Quiet, continuous-duty shaded pole motor
- On/Off indicator light

Use to shrink tubing, melt solder preforms, dry components, or activate adhesives. Low-velocity air flow prevents components from blowing around workstation. Plug-in heating element.

SURFACE TEMPERATURE

Master Proheat STC®'s innovative design senses and controls actual work surface temperature. Once reached, it maintains target surface temperature throughout the heating process, automatically compensating for changes in distance from the work surface. Unit includes LCD, lockable controls, adjustable temperature in 10° increments, adjustable air flow, dual laser targeting system and LED progress indicator.

Heat guns are dual-mode and can be switched from surface to nozzle temperature sensing and control.

ESD

No. 30TU15 is fixed temperature.

Slugger by FEIN | Milwaukee | Fein

Magnetic Drill Presses

Slugger—Allow portable hole drilling away from stationary machinery. Smart Magnet® circuitry provides added safety. Include safety strap, cutter shield, and storage case.

Milwaukee—M18 FUEL™ 1½" and AC powered 1⅝" drills are optimized for annular cutters and twist bits with a 2-speed gear box and tool free adjustment. Permanent Magnet operates without electricity and delivers a strong magnetic hold on ¼" steel.

- Replacement motors available, go to Grainger.com®

DEWALT STANLEY WESTWARD

Portable Tool Boxes

Plastic Portable 3-Drawer—Shell is made from heavy-duty, high-impact polypropylene. Steel drawers have full-extension slides that lock when lid is closed.

ToughSystem®—No. 14C634 and 14C635 are lockable, waterproof, and stackable with side latches. Integrated water seal provides content protection. Structural foam wall is 4mm-thick. Nos. 14C639 and 7AY33 have adjustable brackets for tailored configurations and central locking mechanism secures the cases to the frame.

TSTAK®—Flexible platform allows different combinations. Units can stack on top of each other, connected by durable side latches.

JOBOX KNAACK WESTWARD

Jobsite Boxes and Storage Cabinets

- Welded steel construction
- Powder-coated finish

JOBSITE BOXES

JOBOX—Site-Vault security system has full-length steel lock console with 3 locking points and a reflective orange tape indicating when the chest is unlocked. EZ-Loader skid bolsters allow for easy load and unload from any side. Staked and welded ⅜" lid hinge with ¼" steel pin and 1" knuckles for additional security. No. 6YG34 includes a cut-out for tank supply hoses.

Knaack—3-point latch; reinforced, recessed lock housing; and welded piano hinges help prevent pry-ins. Include 4-way skids and a pass-through electrical grommet that allows easy, weatherproof power cord access. Recessed handles. Optional casters available. No. 13R538 portable box is perfectly sized to hold welders' gloves, goggles, tools, and rods. Hemmed edges ensure safe handling.

PIANO BOXES

Electrical pass-through grommet provides easy, weatherproof power cord access. Optional casters available.

JOBOX—Gas spring door lifts with quick-release mounts have guards to protect them from damage and jamming. Storage bins on side walls and back wall. Door opens a full 90° for easy access. Lift-N-Stow shelf offers space for larger items. Nos. 1MCG1 and 1MCG2 feature a reinforced door ramp and stainless steel hinge.

Knaack—Reinforced lock housing, and staked and welded heavy-duty hinges protect against pry-ins. Nos. 13R512 and 14V866 feature a 4-point crane lift system for safe center-point rigging and hoisting. With integrated drill- and weather-resistant recessed lock and handle and nonlinear 3-point latch system. Include 2 keys and 4-way skids.

SLOPE-LID BOXES

Forklift-accessible from all sides.

JOBOX—Reinforced 3-position lid with gas spring guard provides a flat work surface. Full-length shelf tilts for nearly 12" of additional storage height. Locks with 1 padlock; 3-point lock engagement and bolt cutter-proof housing.

Knaack—Lightweight chest has 1-time lock installation for a range of security level needs. Built-in tool tray helps keep contents organized.

JOBOX KNAACK ★WESTWARD

Onsite Storage Cabinets and Mobile Workbenches

- Parts and accessories are available at Grainger.com®; search by Item No. and click "Optional Accessories" or "Repair Parts" tab

DROP FRONT JOBSITE CHESTS

Feature a ⅜" lid hinge, with wide 1" knuckles and ¼" welded hinge pin. Recessed handles are extra tall and deep. No. 4AXX2 extra-wide low-incline drop-front ramp has 37% more capacity for storing generators and large tools. Includes power cord access hole.

JOBSITE STORAGE CABINETS

JOBOX® models are reinforced 16-ga. steel with a locking system that protects padlocks. Reinforced door frame and shelves prevent warping. Built-in door shelves add extra storage space. Rain Drain™ system channels moisture away from padlock area to prevent rusting. Sturdy steel Westward® cabinets are designed with a padlock. They are water-resistant and have powder coat. KNAACK® cabinets feature a baked-on powder-coat finish for weather resistance and durability. They are designed with heavy-duty steel construction and fully arc-welded seams. WATCHMAN® IV locks system features 3-point latching and recessed lock. Recessed handles provide positive gripping even with a gloved hand. Jobsite Chest, No. 8RT51 features fully adjustable interiors, 18-ga. steel drawer, ball bearing glides, 2 fixed and 2 lockable swivel casters, and 75-lb. capacity drawers.

JOBSITE FIELD OFFICES

JOBOX® lockable field box can be propped into a flat working surface. Features overhead tube storage, rain gutters, door safety pin latch, and skid bolsters. KNAACK® WATCHMAN® 5 lock system features heavy-gauge double arches and vertically mounted recessed lock that resist drill-outs, prying, and cutting for superior tamper and weather resistance. Heavy-duty gas strut allows for smooth opening and closing. Bottom doors interlock with body to provide maximum pry-resistance. Caster-ready 4-way skids are constructed of heavy-duty 7-ga. steel. Baked on powder coat finish for weather resistance and durability.

MOBILE CABINET WORKBENCHES

KNAACK ® workbenches have a baked-on powder coat finish for weather resistance and durability. Heavy-duty steel construction with arc-welded seams. WATCHMAN® IV lock system includes 3-point latching an recessed lock. Full-length staked piano hinges resist pry-ins. Westward® Nos. 24Y922 includes wheels, handles, and adjustable drawers. JOBOX® models feature an adjustable interior drawer and shelf height. Feature heavy-duty ball bearing drawer slides, built-in door shelves, and push handles for each side. 2 fixed and 2 lockable swiveling casters. No. 6YG43 has 150-lb. drawer capacity. No. 6YG42 has 75-lb. drawer capacity.

JOBSITE ROLLING CLAM SHELL CABINET

JOBOX® cabinets feature 2 movable shelves and 4 fixed-height shelves. Vertical storage area has 3 hanging hooks and private locking storage bin. Heavy-duty hasp. Includes eight 4" casters; 3 swiveling, 1 fixed lockable per side. KNAACK® cabinets feature 16-ga. steel construction with arc-welded seams. Casters allow one person to maneuver. 1200 lb. load capacity. Vertical storage area features a bracket for hanging extension cords or tool belts.

Heavy-Duty Truck Boxes

Crossover Boxes—Full weatherstripping. End-mounted push buttons provide access from either side of truck. Features include heavy-duty gas springs and guards, built-in storage bins on both ends, and removable tool trays. All aluminum models have 3-layer, laminated structural lids. JOBOX models have a clear-coat, powder-coated finish. Steel models have powder-coated finish.

Full-Size Chests—Tapered bottom on front and sides. Recessed hinge allows lid to be fully opened. Leakproof stainless steel paddle handles.

Innerside Boxes—Each features a built-in, full-length storage compartment. Mounting kit includes support legs and hardware.

Topside Boxes—Each door features a 3-pt. locking system and industrial-grade bullet hinges. Galvanized steel aircraft cables provide high-strength door support. Cam locks have stainless steel, rotating T-handles.

Truck Boxes

- Fully weather stripped
- Powder-coated finish
- Limited lifetime warranty
- All lids are nonadjustable

Cross Boxes—Have 2 independent covers that allow access from either side of truck. Tamper-resistant retracting lock.

Lo-Side Boxes—Low-profile boxes mount over truck bedrails to keep critical tools and parts within easy reach, while keeping truck bed clear for larger items. Cover opens 90° to provide easy access to contents. Tamper-resistant retracting lock.

Hi-Side Boxes—Carry more tools and to free up space in the cargo bed. Gutter design channels rain and snow off the box to keep contents dry. Feature a removable parts bin. Toolless quick-release doors adjust from 90° to 180° with QuickClips (which do require tools).

Chests—Retracting Extreme Protection® lock is tamper-resistant to help protect against break-ins. Chests feature 90° cover opening for easy access, automotive-style rotary latch with smooth 1-touch opening, and a full weather seal.

Trailer Tongue Boxes

Rugged, dent-resistant construction with a rust-resistant finish. Lid closes tightly to keep out moisture and dust to protect contents. No. 55CH83 features an offset, gas spring lid lift to ease access from the driver's side. The deep recessed hinge allows the box to fully open when mounted against a rail or trailer. The leakproof stainless steel paddle handle helps keep back spray from entering box. No. 55AG06 mounts to the front of A-frame style trailers. The zinc-plated hasp resists corrosion and fits standard padlocks.

Truck/Van Storage Drawers and Bin Dividers

JOBOX PREMIUM STORAGE SOLUTIONS

ALUMINUM

- 75-lb. capacity per drawer
- Aluminum top plate supports 200 lb. per sq.-ft. load
- Drawers can be locked with padlocks (not supplied)
- 0.125-ga. treadplate construction

Full-extension ball bearing drawer glides, fully welded treadplate, and mill finish. 12"W stacking units mount directly on either side of van for rear door access and maximum floor space. 50"L horizontal floor mounts. No. 1FEH6 is for full-size vans and pickups. Nos. 1FEH5 and 1FEH4 can be used in most vehicles.

STEEL

- 650-lb. capacity drawer with keyed lock
- Grip-and-Release handle safety system prevents drawer from slamming shut or rolling open when loaded
- Includes mounting brackets and hardware
- White powder paint finish

Reinforced 14-ga. cabinets. 12-ga. steel drawers glide on steel rollers. Antiskid strips. Removable 250-lb. heavy-duty conveyor roller bearings. Steel handles are flush-mounted. Weather stripping around drawer fronts.

Pack Rat® Truck/Van Storage Drawers

- 14-ga. steel
- Total load rating: 750 lb.
- Fully weather stripped powder-coated finish

Low-profile units can be used separately or in combination with one another. Mount inside the rear of the vehicle to provide secure, concealed storage for large or heavy items, while keeping truck bed area relatively free to carry more cargo. Roll-out drawer provides easy access to and organization of contents. Antiskid strips provide traction for workboots. Easy 1-handed latch opening. Limited lifetime warranty.

WESTWARD PROTO CHANNELLOCK CRESCENT

Multiple-Drive Socket Sets

Designed for industrial and production applications including: automotive manufacturing and assembly, steel fabrication, aerospace, chemical plants, petrochemical, mining, utility, telecom, government and military, transportation, fleet maintenance, general manufacturing, and MRO. Westward® black chrome sets are plated for added corrosion resistance and the set components are laser-etched with large, high visibility markings for enhanced tool identification.

PROTO® WESTWARD® SK® Wera BE A TOOL REBEL

¼"-Drive Ratchets, Sockets, and Accessories

Mechanic's tools are industrial-grade for heavy-duty applications and production use.
Sockets are professional-quality chrome vanadium and fully polished.

Description	Overall Length	Brand	Item No.
Ratchets			
Pear Head

Power Sockets—Designed to withstand assembly operation wear. Use with nonimpacting power tools to stall torque or stop at a predetermined load, typically lower than an impacting tool. Case-hardening heat treatment increases surface hardness. Do not use with impact wrenches.

WESTWARD® PROTO®

Electronic Torque Wrenches

Westward®
- Calibrated to ±2% CW and ±3% CCW
- 8 green warning lights, 4 red stop lights, and an audible buzzer when target torque is approached
- Angle accuracy ±2°

Proto®
- Calibrated to ±2% of indicated value CW and CCW
- Red/green/yellow lights and audible beep when target torque is approached

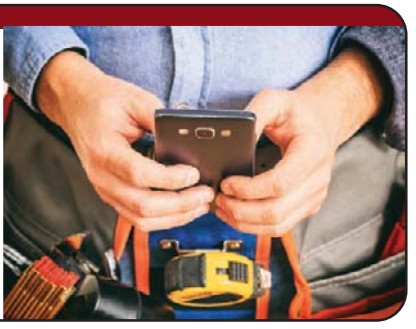
Sturtevant Richmont® Torque Measurement Systems

Flat Beam Torque Wrenches

These wrenches are used for applications where: the ability to visually confirm that the tool is correct before each use is important; the user can see the faceplate of the tool; greater accuracy than that provided by clicker torque wrenches is desired; it is important to know torque variation during rundown; the need for durability is extremely high; there is a destructive nature to the application; or capturing peak torque is important. Pivoted handle concentrates load at a precise point on lever to assure torque accuracy. Memory feature consists of pointers that follow a track on the scale and remain in place to indicate peak torque achieved. Peak torque indicated on scale is accurate even in destructive applications. Meet or exceed requirements of ASME B107.300-2010 and ISO 6789.



Drive Size	Primary Scale Range	Head Type	Rotation	Handle Material	Handle Type	Calibration Certificate Included	Item No.
½ in	0 in-lb to 600 in-lb	Standard	Clockwise and Counterclockwise	Alloy Steel	Ergonomic	Yes	**36WD40**
	0 N-m to 210 N-m						**36WD42**
⅜ in	0 N-m to 12 N-m						**36WD41**

Preset Micrometer Torque Wrenches

These wrenches are used to set a torque or fasteners. A range of different torque setting can be applied for many different applications. Torque may be preset using any torque units of measurement. Minimum capacities of preset tools can be calculated at 20% of maximum capacities. No. 36WD75 must be used to set torque.

Electronic Dial Torque Wrenches

PROTO®

- 4-digit display
- Molded case included
- Accurate to ±1% CW and CCW from 10% to 100% of full scale
- Red/yellow/green lights and intermittent beep when adjustable target torque is reached Meet ASME B107.28.

No. 1ARP7

No. 4NAH5

Dial Torque Wrenches

PROTO®

- Calibrated to ±4% of CW and CCW

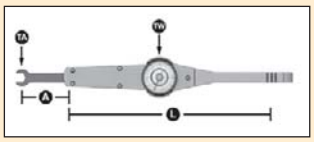
Adding an Adapter to a Torque Wrench

Length (L) = Effective length of the wrench as described below.

Dial Wrenches = The measured distance from the center of the square drive to the center ring or notch on the handle.

Micrometer Wrenches = The measured length from the center of the square drive to the center of the handle, with the wrench set at the desired torque reading.

Desired Torque (TA) = The torque value designated for the fastener with or without an adapter.



Added Length of Adapter (A) = The measured length from the center of the adapter drive to the center of the wrench square drive.

New Setting (TW) = The torque setting on the wrench allowing for the added length of the adapter. This reading will be lower than the desired torque.

Example: 250 ft. lb. Dial wrench using a 2" long crowfoot adapter.

L = Effective Length: 18.75"
Desired Torque = 250 ft. lb.
Length of Adapter = 2"
Result: 18.75" x 250 ft. lb. = Pull wrench

to 226 ft. lb.
18.75" + 2"

Use of Adapter

Formula: $\frac{TA \times L}{L + A} = TW$

Torque Multipliers

PROTO® GEDORE

- Proto® accuracy: ±5%
- Gedore accuracy: ±3%

Proto multipliers are for use with torque wrenches and heavy duty power or impact sockets. Not for use with power drive tools. Feature tubular reaction bars except 3-stage planetary models which have reaction plate with slave drive. 3-stage also have self-contained, 3-stage antibacklash device. Gedore multipliers are particularly suitable for machinery and plant engineering, cable cars, lifts and masts, construction sites, shipbuilding, refineries, and power plants. Mechanical hand torque multipliers provide for controlled screw tightening and unloosening screw connections.

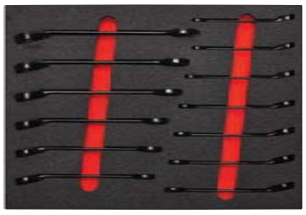
CDI TORQUE PRODUCTS GEDORE WESTWARD® Wera Be a Tool Person Sturtevant Richmont® Torque Measurement Systems

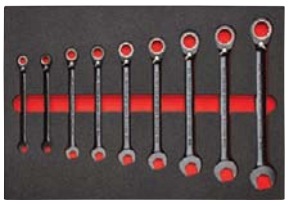
Torque Screwdrivers

Gedore—Calibrated to ±6 CW and meet EN ISO 6789. Preset screwdrivers ensure accurate process control by eliminating under and over tightening. Feature ergonomic hand grip combined with a smooth tool reset action.



CDI Torque Products—¼" drive screwdrivers are calibrated to ±6% CW of torque reading and meet NIST standards. ¼" Hex Drive screwdrivers are calibrated to ±6% CW/CCW of torque reading and meet ASME B107.14.

Sturtevant Richmont—Calibrated to ±6 CW/CCW of torque reading and meets ASME B107-300. Clutch releases automatically when desired torque has been achieved. Magnifying lens improves the view of clearly engraved scale. Antibacklash design for repeatability.



Westward®—Calibrated to ±2 to 3% CW/CCW of torque reading and meet or exceed ISO 6789, CE, NIST, and AIST.

Wera—Calibrated to ±6% CW of torque reading and meet EN ISO 6789.

Spline Box End, Anti-Slip
No. 19C590

Hex Box End, Long
No. 49H060

Spline Box End Style, Stubby
No. 12C523

Individual Combination Wrenches

Westward—15° offset is specially designed for knuckle clearance.

Proto®—Torque Plus™ allows for quick and easy socket engagement to the fastener flats and not the corners. Radius corners shift stress away from the corners and distribute over a larger area of the socket, minimizing slippage.

Anti-slip design (ASD) feature on open end locks the fasteners into place and increases the applied force to the flat of the fastener and away from the corner.

SK®—SureGrip® Drive Design drives the side of the fastener, instead of the corner. Provides increased strength and helps prevent the rounding of rusted or damaged fasteners.

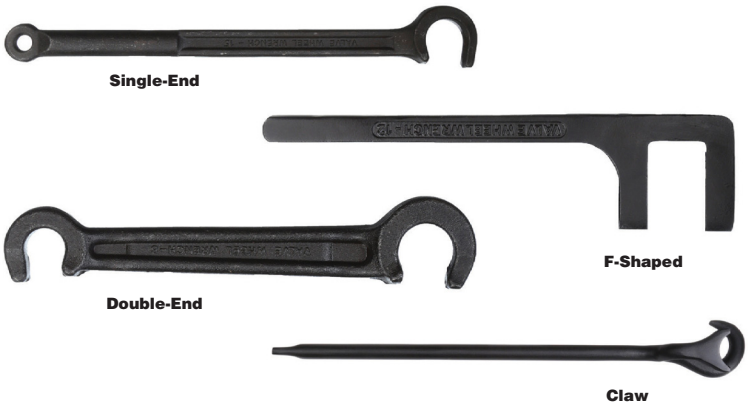
No. 1APK2

PROTO® ★ WESTWARD®
GEDORE® S-K® KLEIN TOOLS®

Specialty Wrenches

Spanner wrenches can be used to tighten collars, locknut wings, and seal-packing nuts.



Striking wrenches have a large striking surface for surer contact and efficient transmittal of force. Short handle clears obstructions and allows use in close quarters. Heavy box walls provide greater torque transmission. Box opening designed to remain on fastener when wrench is struck.

Adjustable Wrench Sets

★ WESTWARD® PROTO®

- Corrosion-resistant finish
- Drop-forged and heat-treated alloy steel construction

WESTWARD®

Smooth-turning knurl for quick, easy jaw opening adjustments.

PROTO®

All wrenches feature extra-wide jaw capacity and square jaw openings for strength and tight fit. No. 3R408 wrenches are designed with Clik-Stop® locking that holds the wrench jaw in place when in use. No. 3R409 has rugged I-beam style handle and reinforced stress areas. Radius corner design. No. 31CM95 wrenches have nonreflective black oxide finish for use where nonplated products are required.

Beta Wera BE A TOOL REBEL

Multicomponent Stainless Steel Screwdriver Sets

- Keystone Slotted/Phillips

No. 3EJU5—Kraftform®-shaped plastic handles provide 3 options: fast turn, torque transfer, and precision, for reduced fastening times. Features corrosion-resistant INOX stainless steel blades with a rough, lasertip surface for improved grip. Includes ⅛" x 3⅛", ⁵⁄₃₂" x 4", ⁷⁄₃₂" x 5", ¼" x 6", Phillips #1 x 3⅛", #2 x 4", and storage rack.

No. 36HV47—Ergonomically designed handle helps improve grip and comfort. Has tip-ID that identifies the screwdriver type and its tip style indicated on top of the handle. Corrosion-resistant. Includes ⅛" x 2", ⅛" x 2¹⁵⁄₁₆", ³⁄₁₆" x 3¹⁵⁄₁₆", (2) ¼" x 5¹⁵⁄₁₆", Phillips #0 X 2⅜", #1 X 3⅛", #2 X 3¹⁵⁄₁₆".

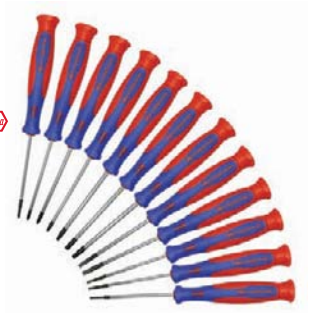
Precision Screwdrivers



Feature a proportional handle to blade size for optimum torque. Handle is made of high-quality, cadmium-free plastic and is molded on for a permanent bond to blade. Tapered, faceted shape allows rapid rotation. Fingertip rotation cap for precise turning and control. Chrome-vanadium-molybdenum tool steel blade with vapor chrome finish is through hardened for wear resistance. Exact-fit machined tips.

WESTWARD WITTE wiha
Tools that work for you

Precision Screwdriver Sets

Perform intricate work on smaller devices without the bulky handles of standard screwdrivers. All of the essential sizes and types are combined into convenient assortments to add to your tool box. These screwdrivers feature rotating caps for finger-tip control and chrome blades with black oxide tips.

ESD Screwdriver Sets

- Surface resistance: 10^6-10^9 ohms

ESD-safe screwdriver sets provide safe, controlled dissipation of static build up, ideal for working on sensitive electronic components. Precision handles are made of high-quality, cadmium-free plastic and are molded-on for a permanent bond to blades. Tapered shape allows rapid rotation. Rotating cap for precise turning and control. Chrome-vanadium, molybdenum tool steel blades with hard chrome finish are through-hardened for wear resistance. Exact-fit machined tips.

Straight Ball-End Hex Keys

Long-arm, heat-treated keys are made of alloy steel with black oxide finish. They can drive a fastener at up to a 30° angle. Ergonomic plastic handles provide firm and comfortable grip. No. 5LN03 includes sizes 0.050, 1/16, 5/64, 3/32, 7/64, 1/8, 9/64, and 5/32. No. 5LN04 includes sizes 0.050, 1/16, 5/64, 3/32, 7/64, 1/8, 9/64, 5/32, 3/16, 7/32, 1/4, 5/16, and 3/8. No. 5LN06 includes sizes 1.5, 2, 2.5, 3, 4, 5, 6, 8, 10mm.

Multi-Tools

VICTORINOX SWISS ARMY · LEATHERMAN · GERBER · PROTO · SOG KNIVES • TOOLS · WESTWARD · STANLEY

Pocket—Small and light enough to be carried in a pants pocket.

One-Hand Opening—Frees the other hand to hold workpieces in place.

Needle-Nose Plier-Based—Can be used at multiple angles.

Locking Plier Head—Snap into ready position with one hand, and lock down for a tight bite. Includes sheath.

Compact—Small enough to attach to a key ring.

Butterfly-Opening—Larger center-opening tools are built for a wide variety of jobs.

Snips

AVIATION SNIPS

Cut sheet metal, rolled steel and other metals. Nonslip, serrated jaws.

3-Pc. Sets—Steel jaws are hardened, tempered, and can be sharpened. Set No. 4PM06 includes Nos. 5MX59, 1UG17, and 1UG18. Set No. 5MD08 includes Nos. 4X863, 4X864, and 4X865.

2-Pc. Offset Set—Drop-forged, hardened alloy steel blades are offset to keep hands away from cutting surface. Comfort-grip PVC handles. Includes Nos. 1UG15 and 1UG16.

INLAID INDUSTRIAL SNIPS

Make straight cuts and cut wide curves when trimming light stock.

MULTIPURPOSE SNIPS

Cut a variety of materials from paper to aluminum, sheet metal, and screening.

TINNER'S SNIPS

For trimming light stock, paper, linoleum, and sheet metal. Set No. 4YP53 includes 7 and 10" snips.

Wire Rope Cutters

- Plastic-coated handles

High-leverage jaws require little effort for cutting. No. 3JXJ6 has induction-hardened steel blades that cut Bowden cables and soft wire rope up to ⅛" dia. No. 6PFF5 features chrome-vanadium steel blades to cut 9⁄32" conductor cable, ¼" wire rope, 5⁄32" med.-hard wire, and 7⁄64" piano wire. No. 38GU44 features heavy-duty steel blades for cutting ¼" wire rope, 9⁄32" capacity copper, and 9⁄32" communication cable.

Diamond-Coated
Habilis File
No. 31LX73

Specialty Files

Diamond-coated files are used for cutting or grinding hard, brittle, and abrasive materials. Diamond enables faster operation, extends tool life, and allows very accurate tolerances of shape and size.

Note: Diamond files are not suitable for grinding high-carbon steel.

Punch and Chisel Sets

- See Grainger.com® for specific sizes in each set

COLD CHISEL SETS

Remove or cut metal softer than the cutting edge itself.

NAIL SETS

Square head prevents rolling. Fully hardened precision-milled steel. No. 3ML05 has color-coded tools with shock-absorbing cushioned ribbed grip.

PUNCH SETS

Drift—Use for aligning holes, usually in metal. Also called aligning punches.

Pin—Drive pins, bolts, and rivets out of holes. Chamfer on struck-end helps reduce mushrooming and chipping. Identification panel marked with punch size. Solid punch for hole alignment.

Hollow—For punching holes in leather, rubber, canvas, cardboard, plastic, gasket material, and sheet metal.

Arch—Inside taper for clearance.

Gasket—Feature a spring-loaded, self-centering steel driving mandrel. Include molded case.

Transfer—Undersized by 0.0025". A matched set of precision-transfer punches allows the transferring of threaded, drilled, or reamed holes.

PUNCH AND CHISEL SETS

Packaged in a reusable vinyl pouch.

WESTWARD® STANLEY PROTO®

STANLEY FatMax® DASCOPRO Quality Tools Since 1922 DEWALT®

Chisels

Cape—Cut keyways and slots in metal.

Cold—Cut any cold metal softer than the chisel itself, such as wrought iron, cast iron, steel, brass, bronze, copper, aluminum, bolts, nuts, and rivets.

Diamond Point—Cut V-grooves and clean out inside corners.

Super-Duty Cold—Longer shank features a knurl for better grip. Polished identification panel is marked with tool number and size. Black oxide finish.

Wrecking/Pry Bars, Nail Pullers and Sets

Pry Bars with Plastic Handles have a flat prying end with comfortable easy-to-grip handles. Pinch Point Bars lift and move heavy objects. Aligning Pry Bars align holes in dies, scaffolding, and similar applications. Rolling Head Pry Bars have a long-tapered end for alignments. Die Separating Bars have a flat end for wedging dies apart. Flat Utility Bars have 1 slightly bent and 1 sharply bent end, with nail-pulling slots and hole. Nail Pullers are of hex stock with flat slotted end and a curved or bent slotted end. Offset Ripping Bars are used for scraping and heavy nail pulling. Gooseneck Wrecking Bars are for heavy-duty prying applications and demolition work. Digging Bars are for digging and prying at dirt and large rocks. Slate Bar can be used to move, break, or deform large or heavy items, such as slate.

Pro TIP

Choosing the Right Hammer

There are many different types of hammers, each made with a certain function in mind. Because some hammers have similar designs, it may appear that one hammer should be good enough for a variety of uses. However, choosing the right one for the job at hand is the only way to ensure you're getting the most out of your hammer.

For instance, **Claw** hammers are the most common and are used for woodworking and prying. They feature a smooth head for finishing work. The claw is curved for removing nails. **Framing** hammers, also called **Rip** hammers, are a type of claw hammer but with a straight rather than curved claw and a long handle. The head has a rough surface to keep it from slipping while driving nails. This hammer is suited for framing, splitting, and small demolition. Lightweight **Tack** hammers were made for attaching fabrics to furniture. **Dead Blow** hammers don't rebound after striking and are best for automotive applications, setting joints, and dent removal.

For descriptions of dozen different hammers and their unique uses, see the article "Choosing the Right Hammer: Types of Hammers & Uses" at **grainger.com/hammertypes**

WESTWARD STANLEY DEWALT

Claw and Framing Hammers

Curved Claw—Ideal for pulling nails.

Framing—Long, heavy, straight-claw hammers have large faces for faster framing work.

Rip Claw—A straighter claw than curved models makes these hammers better for ripping or prying.

WESTWARD STANLEY PROTO

Dead Blow Hammers

Heads contain steel shot or steel sand for more driving force and less bounce-back than solid head style, reducing impact felt by user.

STANLEY VAUGHAN WESTWARD NUPLA

Specialty Hammers and Hatchets

Drywall, Shingler's, and Builder's—Have a striking face on 1 end for driving nails and a hatchet-type face on the other end for demolition work. Replacement blades and gauges are available for Shingler's Hammers. Builder's Hatchets are for cutting, splitting, and trimming building materials.

Bricklayer's and Pick Hammers—Bricklayer's Hammers have a striking face on 1 end for driving masonry chisels and a curved blade with beveled edge on the other for chipping mortar and trimming bricks to size. Pick hammers are designed for chipping rocks and stone to a desired shape and size. Metal Forming Pick Hammers are used for sheet metal or auto body work.

Tinner's Riveting Hammers—Use for setting rivets in sheet metal.

Welder's Scaling and Chipping Hammers—Have both a pick end and a chisel end. Generally used to remove slag, scale, and welding spatter from welded materials.

Hammers and Replacement Tips

Quick-Change and Soft-Face Hammers—2 replaceable striking faces (tips) are made of plastic, vinyl, or nylon, and come in a variety of hardnesses. Tip diameters match the size of the hammer and screw onto the hammer head.

Split-Head Hammers—Similar to Soft-Face, however, tips are contained in the split head. To replace tips, the head is disassembled into halves, and the tips are clamped rather than screwed in.

TIP SELECTION GUIDE

Description	Replaces Hammer Type
Soft	Rubber, Wood, Soft Lead, Brass
Medium	Rawhide, Wood, Plastic, Lead
Tough	Rawhide, Hardwood, Plastic
Hard	Rawhide, Plastic, Micarta, Fiber
Extra-Hard	All Metal Working Applications

Combination Vises

- Replacement jaws and magnetic caps are available on Grainger.com

These vises combine the features of bench vises and pipe vises to securely clamp straight workpieces and irregular-shaped workpieces, as well as round tubing and pipe.

ATV All Terrain Vise

Lightweight all-terrain vise is designed for easy transport with an integrated carrying handle. Fits a standard 2-in. hitch (hitch pin included). Innovative mounting bracket allows you to mount the vise to a bench or trailer for greater versatility. The innovative 360° locking handle secures the handle while driving or repositions it while working. Set screws provide a tight fit in the hitch and reduce vibration while driving. Jaws include a V-groove for vertical clamping of round objects. Pipe jaws clamp objects up to 3 in.

I Beam Bar, I Bar, and Parallel Clamps

No. 10D590

I Bar—Feature a rapid-acting clamp locking device. Compressed metal pawl engages in notches which are ¾" apart in web of slide.
- 3500 lb. load capacity

Parallel—Suitable where high pressure 90° clamping or spreading is required. Convert from a clamp to spreader without tools. Include jaw face pads, rail protector pads, and removable end stops.
- 1500 lb. clamping force

I Beam—Will not bend or twist like other clamps. Features tough, powder-coated ductile castings, corrosion-resistant nickel-plated rail, 5 strong clutch plates to aid with gripping the bar stock, strong crank handle, ACME threaded screws with 9⁄16" spindle dia., and large, easy-grip handles.

IRWIN® QUICK-GRIP® BESSEY

No. 52LA96

Bar Clamps and Spreaders

IRWIN 1-HANDED QUICK-CLAMP® CLAMPS AND BAR CLAMPS/SPREADERS

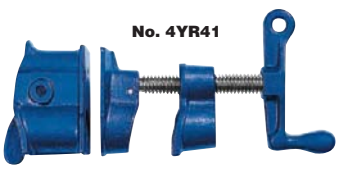
Manufactured with high-tension I-beams and high-tech resin. Quick-change screw to maneuver from clamp to spreader. Large, removable resin pads. Quick-release trigger.

BESSEY 1-HANDED BAR CLAMPS/SPREADERS

Turn a dial to change function from clamping to spreading. Large, flat clamping jaws have soft pads. Squeeze-molded handle for clamping/spreading.

BESSEY CLUTCH-STYLE BAR CLAMPS

2-pc. clutch plates and nickel-plated serrated rail with ergonomic wood handle help enable clamping in tight spaces. Powder-coated ductile cast-iron jaws have nonmarring pads. Double-Head Clamps provide 3-point clamping for extra stability.



BESSEY GSM SERIES BAR CLAMP SET NO. 44ZL53

Clamps have 2660-lb. nominal change pressure. Set includes 2 of Mfr. No. GSM20, 2 of Mfr. No. GSM30, and 2 of Mfr. No. GSM40.

KANT TWIST

Cantilever Clamps

T-handle and deep throat clamps have free-floating jaws that adjust to unparallel surfaces. They will not walk off center because there is no unsupported screw or loose pad. Copper-plated jaws and screws are ideal for welding. Clamps close completely. Stainless steel clamps are for corrosive and magnetic problem areas.

Face Frame Clamp

Face frame stiles can be tightened, aligned, predrilled, and fastened while the clamp is in place. Holds individual cabinet edges together while keeping the faces along the joint flush. Integrated pilot hole drilling guide on one end flips out of the way so you can drive screws to connect the cabinets without removing or repositioning the clamp. Features aluminum alignment plate, nonmarring felt pads, and ACME threaded screws.

L-, F-, Sliding-Arm Bar and J-Clamps

L-Clamps—Adjustable, rapid-acting sliding arm. All-steel, spring-tempered design. Hardened alloy steel spindles resist weld spatter. Adjustable swivel pads tilt to accommodate angular workpieces. Vibration-resistant.

F-Clamps—Heat-treated, spatter-resistant spindle and replaceable swivel-tilting pressure pad. Nos. 2JFU5 and 2JFU6 provide larger throat depth (reach).

Sliding-Arm Bar Clamps—Heat-treated, spatter-resistant spindle, swivel-tilting pressure pad, and a vibration-dampening design. Arc of the curve enables rail to hug workpiece. Fixed arm and pressure plate are tempered steel. No. 3YNA2 can be used at various angles for compressing and spreading.

Locking Clamps—Plier Style

IRWIN VISE-GRIP ★ WESTWARD

Nickel-plated, heat-treated alloy steel clamps have micro-adjustment screw mechanism.

LOCKING C-CLAMPS

For welding sheet metal or woodwork. Swivel pads help to protect work surfaces. Large capacity 9" clamp has extra throat width and depth for greater reach.

LOCKING CHAIN CLAMPS

Hold and lock around any size or shape—won't slip or crush thin-walled pipe. Adjust in either direction.

LOCKING CLAMP SETS

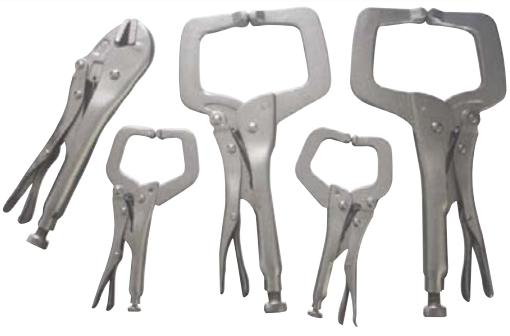
1-handed locking mechanism, easy-turning adjusting screw, and spring-loaded release lever.

5-Pc. Sets—No. 5MD28 includes (1) 10R® locking pliers, (2) 11R® C-clamps, and (2) 6R® C-clamps. No. 2FDD4 includes (2) No. 2FDC6 6-in., (1) 10-in., and (2) No. 2FDD1 11-in. locking C-clamps.

LOCKING SHEET METAL CLAMPS

For bending, forming, and crimping jobs.

LOCKING WELDING CLAMPS



Clamps pipe, bars, or other metal work for welding or riveting. Deep-throated design; U-shaped jaws increase visibility and working space.

Locking Clamps—Sliding Arm Style

BESSEY

Sliding-arm chrome-vanadium steel SuperGrips™ jaws automatically adjust to remain parallel with each other. Handles have pressure adjustment screw and plastic-coated release levers. Ergonomically designed to prevent kickbacks.

Standard SuperGrips™—Both models have a sliding-arm clamp jaw adjustment with grip-pliers design and removable nylon jaw pads.

Deep Reach—J-shaped jaws clamp over angle iron, channel iron, and other assemblies/obstructions.

Locking Pliers

All have guarded release trigger and adjusting screw. Heat treated alloy steel.

Fast-Release—1-handed release and locking functions with adjusting screw.

Curved Jaw—Use as wire cutter, pipe or speed wrench, clamp, pliers, or for holding small objects.

Long Nose—Nonslip grip at tip holds small work.

Straight Jaw—Lock to stud bolts for easy removal and to heavy-gauge wire for twisting.

V-Jaw—Ideal for twisting and turning applications.

Tongue and Groove Pliers

- Hardened steel
- Corrosion-resistant

Channellock®—Undercut tongue-and-groove design assures strong no-slip jaw action. Laser heat-treated right-angle teeth for greater durability. GripLock® jaw design accommodates many shapes.

Westward®—Full polish and clear lacquering coating process provides corrosion resistance.

Knipex®—Cobra® pliers are self-gripping and feature high-leverage design. Feature push-button that locks adjustment position.

Milwaukee®—Reaming head design for up to 2" pipe. Forged alloy steel and induction hardened jaws. Smooth transition grips and rust protection.

Safety Wire Twister Pliers

PROTO® WESTWARD®

Cut through tough stainless steel safety wire. Diagonal nose allows access in tight work areas. Automatic spring return pliers are ideal for aviation and other applications. Reversible pliers have right and left twist capability and meet SAE Aerospace Standard AS 567 twister requirements.

Description	Wire Size	Overall Length	Brand	Item No.

Spring Return

Thin Long Nose Serrated Jaw Pliers

Diagonal Cutter, Flush

Diagonal Cutter, Semi-Flush

ESD Safe Pliers and Cutters

Xcelite® KNIPEX Erem®
WESTWARD® PROTO®

For a wide range of electronic assembly requirements. Copper alloy rivet eliminates friction, while copper alloy joint maintains cutting edge and tip alignment. Plastisol, nonslip cushion handles, standard.

Mini Pliers Sets—Dual leaf spring design allows jaws to be maintained in open position. Fitted with slip-resistant electrostatic dissipative (ESD) cushioned grips. No. 2TJ50 includes 4¼" diagonal cutter with semiflush cut tapered head; 4¼" diagonal cutter with flush cut oval head; 4½" curved long nose with serrated jaw; and 4¾" long nose with cutter. No. 2TJ51 includes 4¾" diagonal cutter with semiflush cut tapered head; 4¼" diagonal cutter with flush cut oval head; 5¾" slim needle nose with nonserrated jaw; 4¾" slim needle nose with serrated jaw; 4½" transverse end cutter with flush cut; and 4½" angled cutter with flush cut.

Tweezers

Designed for toolmakers, repairmen, and electronic assemblers.

EREM

Tweezers are antimagnetic, acid-resistant, and temperature-resistant to 300°C.

ESD SAFE TWEEZERS

Meet the requirements for tools used in electrostatic-sensitive areas. Ergonomically designed soft foam handles. Stainless steel.

SLICE™

Professional-grade tweezers are hand filed with aligned tips. Nos. 31DA15, 31DA16, 31DA18, and 31DA19 are autoclave friendly. Nos. 31DA15, 31DA17, and 31DA19 are soft-touch rubberized.

Double Hinged Adjustment Arm

Cable Cutters

Note: Do not use cutters for ACSR unless specified.

High-Leverage—Offer strong cutting force with less pressure applied by the user. No. 3LY18 is Klein Tools'® Journeyman™ Series.

Ratchet—Hold cable in place while allowing 1-handed cutting. No. 1ED70 is a 2-handed ratchet cutter.

2-Speed Ratchet—Close rapidly to the outer surface, then ratchet normally to complete the cut.

BX/Flexible Conduit Cutters

Cuts BX cable, steel sheets, steel strapping, and bundling wire. No. 4A862 has a built-in stripping notch with plastic-dipped handles for easy gripping. No. 10D465 has high-frequency quenching and features a high-strength spring for cutting electrical cable. No. 11L580 has hand crank that easily cuts steel with a few quick turns.

Crimpers

DIELESS CRIMPERS

Feature a wire cutter in the nose and plastic-covered handles. No. 1ED63 is for small lugs and splices, and fits in tool pouches.

CRIMPERS WITH DIES

Nos. 49NV75 has a rotating, replaceable, color-coded dies for attaching lugs or connectors to wire and cable. Nos. 5KPH6 and 5KPN8 have pivot-action jaws and 2 die positions. Nos. 13H893 and 13H894 have revolving dies.

RATCHETING CRIMPERS

Put more crimping power into each squeeze. Kwik Cycle® crimpers feature a ratchet-action mechanism that releases after proper crimp force is applied. Compound-Action Ratcheting Crimper with narrow-span handles has a built-in ratchet with safety release for uniform crimps every time. Full Cycle Ratcheting Crimper has color-coded wire size markings.

BATTERY TERMINAL CRIMPER

Features an all-in-one integral crimp nest with no removable parts to lose or rotating dies to set. User can set crimp depth with simple-to-use adjustment screw.

Electric Cable Pullers and Accessories

Attach to 1" and larger conduit with no loose parts. Self-contained units have high-torque integral motor. Circuit breaker on motor switch stops the puller motor if it becomes overloaded.

ELECTRIC CABLE PULLERS

Gardner Bender—Deliver smooth power with no chains or sprockets to break. Can be assembled in multiple configurations, so that it can be mounted almost anywhere, even in tight corners. Powerful motor can start under full load.

Greenlee—No 31AD38 offers high and low speeds for intermediate and continuous pulling. High speed is for loads up to 1000 lb. and low speed is for loads up to 2000 lb. Portable handle, wheels, and dolly base increase mobility around industrial facilities and offer self storage. There are no loose pieces, minimizing lost parts and set-up time. Boom extends up to 8 ft.

Quick-adjust clamp easily connects to the outside of 1" or larger conduit sizes without need for adapters. Use with Greenlee 9/16" double-braided composite pulling rope. Turbo Puller No. 454N82 sets up in less than 60 seconds. 2-speed motor is designed for 6,000 –lb. loads. Right-angle sheave allows you to stand it out of the direct line of force. Nos 15X799, 15X789, and 15X797 use Greenlee ⅞" double-braided composite rope. Pulling speed ranges from 2000 lb. at 8 fpm (feet per minute) to 8000 lb. at 6 fpm. No 15X799 with mobile VersiBoom™ allows for one-person setup in less than 2 min. No. 4HEA6 features 6,5000 max. capacity.

SHEAVES

Aluminum alloy hook sheaves allow user to configure the direction cable and wire is to be pulled through conduit. Welded steel frames with forged steel closure-type hooks. Self-lubricated bearings.

Fish Tapes and Wire/Cable Pullers

FISH TAPES

Steel—Nonmetallic case will not dent or rust. Winder slide is included for rewind of tape.

Smart Mark™ —Laser etched ft. and meter distance markings every 1 ft./0.3m (fist mark is at 2 ft./0.6m). Speed Flex® leader lets you fish farther and faster.

Magnum Pro Steel—Corrosion-resistant tape.

Flex-O-Twist®—Tape slips through lateral locking and vertical bends.

Fiberglass—Nonconductive tape has low-friction coating and noncoiling properties.

Nylon—Curl-resistant nylon tape has 200 to 250-lb. tensile strength.

FISH LINE

Center feed assures payout without tangling. Can be pulled into the run with the wire, making it easy to add wires at a later date. Strong, light-weight nylon is mildew-resistant.

FISH STICKS

Push or pull wires over long distances, including subfloors, crawl spaces, and attics.

FISH RODS

Fiberglass rods provide added rigidity when multiple sections are threaded together. Glow-in-the-dark fishing stick No. 1FAH7 provides high visibility in dark spaces and includes three 5-ft. pieces for a total of 15 ft.

Vacuum/Blower Power Fishing Systems

FISHING SYSTEMS

Vacuum/Blower Power Fishing System—Everything necessary to blow or vacuum fish line, poly line, or measuring tape.

Li'L Fisher® Vacuum/Blower Power Fishing System—Compact unit has vacuuming and blowing capabilities, moving line through the conduit run. Power unit detaches from canister for easy cleaning. Includes unit and hose only.

CONDUIT PISTONS

Fit all types and sizes of conduit, ½ through 2" (including rigid, IMC, and EMT).

POLY LINE

Tangle-resistant line pulls rope through conduit with power fish tape systems.

Note: Not for pulling wire or cable.

ACCESSORIES

Conduit Measuring Tape—Measurements are permanently printed at every foot—from 0 to 3000 ft.—to measure lengths of conduit runs. Waterproof polyester has 130-lb. breaking strength.

Note: Dispenser available; go to Grainger.com®

Gel and Cream Lubricants—Adhere to cable and wire without dripping and are compatible with all insulation types. Clean up using only soap and water.

Accessory Kit—Includes 85-lb. x 2150-ft. fish line, pistons for ½", ¾",1, 1¼", 1½, and 2" conduit, adapter cones for ½" to 1" and 1¼" to 2½" conduit, adapter nozzle for measuring tape.

Pipe and Conduit Rack, Wire Carts, and Caddy

MOBILE PIPE AND CONDUIT RACK

Rack has 7 individual storage compartments. Folds and stacks for easy storage and transport. 100-lb. capacity.

WIRE CART

Large-capacity cart can be used vertically or horizontally; a built-in wire guide permits horizontal dispensing. Tubular-steel welded construction. Features 5 reel axles with spring-clip retainers and includes 2 positions for axle storage. Can configure for large reels with no loose parts. Handles 6" spools. Can pass through 28"W openings.

HAND TRUCK/WIRE CART

Includes five ⅝"-dia. spindles for storing and dispensing up to fifteen 500-ft. reels of #14 THHN wire. Has storage space for 3 spindles and clips when not in use. Lay flat when dispensing, stand upright to use as a hand caddy. Cap.: two 1000-ft. (305m) spools up to 22" (558.8mm) dia. x 16⅜" wide; three 2500-ft. (762m) spools up to 14" (355.6mm) dia. x 16⅜" (416mm) wide; ten 500-ft. (152m) spools up to 7" (177.8mm) dia. x 8" (203.2mm) wide; and fifteen 500-ft. (152m) spools up to 7" (177.8mm) dia. x 5⅜" (136.5mm) wide. Can roll through 23"W openings.

Expander Kit—Expands the capacity of No. 2MDN8 by up to 60%. Bolts on without drilling holes. 41"H x 12⅝"W. Includes 2 supports, 3 spindles, and mounting hardware. Dispenses up to 24 spools up to 7" dia. x 5⅜"W; 16 spools up to 7" dia. x 8"W; 5 spools up to 12" dia. x 16⅜"W; 3 spools up to 14" dia. x 16⅜"W; or 2 spools up to 22" dia. x 16⅜"W.

6-SPINDLE WHEELED WIRE CADDY

Holds 6 spools of wire up to 18" dia. Steel welded frame and large 8" wheels with front locking caster for easy movement under heavy load.

KLEIN TOOLS IDEAL. WESTWARD®

Bending Equipment

ELECTRIC BENDERS

The 555® Series, commonly referred to as "triple nickel", are portable units bending ½" to 2" dia Rigid, IMC, and EMT conduit up to 180°. Built-in bend charts guide for accurate bends. Operate with a remote pendant control. Combos include bender and shoe listed on same line.

PROGRAMMABLE BENDER

Intellibender® offers conduit capacity: ¾" rigid, 1 to 2" rigid, EMT, or IMC. Sensors automatically adjust for conduit dia. and type. LCD interface.

MECHANICAL BENDERS

Standard—Ratchet action and built-in 0° to 90° bending gauge. Capacities: ½", ¾", and 1" IMC and rigid conduit. Welded frame and wheels. Handle not included. Use 5 ft. of 1" rigid conduit for handle.

Heavy-Duty—Independent ratchet mechanism simplifies both conduit bending and shoe changes. Each shoe has its own "swing-away" clamp to lock pipe in place. Conduit capacities: ¾" to 2" EMT, ½" to 1¼" IMC, ½" to 1½" rigid, and ½" to 1½" aluminum. Includes frame and heavy-duty undercarriage with wheels, 5 shoes, 2 EMT follow bars, EMT follow bar roller, roller, and roller pin.

Little Kicker® Offset Bender—Bends offsets for ½" EMT.

GREENLEE. WESTWARD®

Punch Driver Sets and Knockout Punches

Hand Pump Hydraulic Driver—Use hydraulic force to punch 10 times faster than traditional wrenches.

Slug Buster® Punch Sets—Punch mild steel, aluminum, fiberglass, and plastic. Operate manually, with ratchet, hydraulic, or battery drivers. Slug is creased and split as punch is drawn into the die, falls free from die and stud.

Slug Splitter® Punch Sets—Punch stainless steel and heavy-ga. mild steel. Operate with ratchet, hydraulic driver, or battery-powered knockout driver.

SPEED PUNCH™ Kits—No thread design eliminates cross-threading. No. 30HK31 includes hydraulic pump unit. No. 30HK30 has battery-powered knockout driver.

Intelli-Punch™—Pressure-sensing technology accurately detects punch completion and automatically retracts the ram. Head rotates 360° to punch at any angle. Powerful 11-ton punching with maximum cycle time of 8 sec. Gator Eye® compatible with i-Press™ software to monitor tool performance.

Standard Round Punches—Punch mild steel, aluminum, fiberglass, and plastic. Operate manually, with ratchet, or hydraulic or battery driver.

Slug Buster SC® Punches—Self-centering feature eliminates the need to use die alignment marks.

Metal Stud Punch
No. 4A735

Stud Punches

Metal Stud Punch—Automatically centers holes on standard studs. Self-stripping design eliminates punch hang-ups. 1 11/32" punched size dia.

BX Stud Punch—Manually punches a square hole and rolls the edges over for smooth installation.

Plumber Stud Punch—Punches a 2 5/8" dia. hole and removes slug. Use to install 2" waste water vent pipes.

Insulated Tools

Wiha Tools—Flame-retardant, permanent epoxy-bonded handles are impact tested for all-temperature use. Chrome finish, soft grip. Dynamic joint provides 40% easier cuts and longer tool life.

Westward®—Made of chrome vanadium steel with drop-forged induction-hardened cutting edges and flame-retardant, ergonomic grips.

Knipex®—Cold impact strength is tested at -25°C. Polished, dual-component tools come with hard/soft hand grips. Insulated slip guard avoids spark-over or current passage from the bare plier to the operator's hand and withstands knocks without breaking or splitting. Certified to 1000VAC.

Greenlee®—Dual-layer insulation provides for maximum protection. Guards protect hand from accidental contact with energized surface.

Klein Tools®—Grips consist of 2 layers; inner layer is bonded to the tool. U.S. tool steel is forged, machined, and tempered with induction-hardened cutting edges.

Tether-Ready Tools

When working at heights, it's imperative to secure hand tools to a fixed point to prevent injuries caused by dropping. Proto® SkyHook™ Tether and Transfer systems provide positive control of hand tools at height, secure tool transfers, and a free range of motion. SkyHook™ switch connector tethers to the tool on a short lanyard and is compatible with screw-gate carabiners. Allows hands-free tool transfer. SkyDock™ attachment anchors SkyHook connector to the wrist, belt, apron, or station. Tools can be tethered with shrink loops, tool collars, lanyards, or bungees for use with the system.

Easy hands-free tool transfer

Keep tools securely connected to wrist or belt

No. 24AL34

Tethered Ratchets and Sockets

Sockets attach securely to ratchets using the Positive Control Pin Detent System that requires a separate tool to attach or remove the socket. Sockets cannot be removed without specific intent. Pin detent will engage correctly regardless of the direction the socket is placed on the square drive.

Tool Lanyards

- Third party certified with 2:1 safety factor
- Tools not included

Squids® lanyards are designed to help reduce the risk of dropped tools. With features like hi tensile strength webbing and reinforced stitching, they are made to hold up to harsh environmental conditions.

AMPCO® Nonsparking, Nonmagnetic, Corrosion Resistant Safety Tools Information

OSHA's new Hazard Communication Standard now requires nonsparking tools with flammable liquids. For our full offering of nonsparking hand tools go to Grainger.com® and search for "nonsparking tools."

Note: Static sparks can ignite flammable vapors, liquids, dusts and residues. The alloys used to make Ampco Safety Tools are highly conductive and must be grounded if there is concern for static-electric charge. AMPCO® and other copper based tools should not be used in direct contact with acetylene and some explosives such as amatol, azide salts, lead azide and DBX.

NONSPARKING

OSHA, NFPA, MSHA and other Standards Developing Organizations require and recommend the use of nonsparking tools where flammable vapors, liquids, dusts or residues are present.

NONMAGNETIC

Prevent accidents and protect property in military, medical, and electronics manufacturing locations. Excellent for use in highly sensitive magnetic equipment and in clean room environments. Meet ASTM F2503 and ASTM A342 standards.

CORROSION RESISTANT

Chemicals, acids and salt water over time diminish the effectiveness of steel tools. Ampco Safety Tools provide durability, longevity and personnel safety in severe corrosive environments.

Nonsparking Tool Kits

Kits contain nonsparking tools that should be used wherever there may be flammable or combustible dusts, liquids, powders, or residue present. It is recommended that nonsparking hand tools are kept in specially designed kits and inventoried routinely. This process helps to ensure that steel tools are not used accidentally by first responders.

Battery Tools

No. 24Y877
Diagonal Cutting Pliers

No. 24Y884
Ratchet

No. 24Y881
3/8" Drive Socket

- Meets NFPA 70E standard

Insulated, nonsparking hand tools protect against hazards of mechanical sparks, friction and impact sparks. Charging batteries produce hydrogen gas which is extremely flammable and is not easily detected by humans. These tools are exceptional for battery manufacturers, electrical safety consultants, and maintenance personnel who maintain battery systems, as well as those requiring uninterrupted power systems (UPS) and battery rooms for mission critical operations including government, hospitals, hazardous industrial processing and controls, data centers, computer rooms, and network operations.

AMPCO MR

MRI Nonmagnetic Tools

Magnetic steel tools have the ability to be unexpectedly launched through the air causing serious injuries and significant damage to expensive MRI equipment. Using MRI-certified nonmagnetic tools helps protect employees and equipment for maintenance and repair work.

Milwaukee RIDGID

Closet, Urinal, and Drain Augers

Auger helps for unclogging toilets, floor traps and aids in blockage removal. Flexible cable resists kinking and has an Integrated locking device, holding cable in place for easy telescoping extension. Milwaukee units feature electronically controlled rpm and torque power for tough clogs in tight traps. No. 31XN16 combination auger has left-hand wound cable with C-cutter head.

WESTWARD

Hand Spinners

Clean drain lines up to 1½".

Air Drain Cleaning Guns

Milwaukee

Clears clogged drains while leaving fixtures and drain covers intact. Power air flushes water out of pipes, removes grease and sludge from pipe walls. For 1" to 4" drain lines and can clear up to 35 ft. while Provides variable pressure dial control, allowing maximum force to clear up drain lines up to 35 ft. or less forceful power on delicate pipe systems.

Water Jetters

RIDGID

Propels a highly flexible hose through soap, sludge, and grease blockages. Two pulse actions push the hose through difficult bends and traps. Corrosion-resistant pump with forged brass head minimizes leaks. Pressure control value allows quick and easy pressure adjustment while power scrubbing, flushing out debris, and restoring drain lines back to free-flowing capacity. No. 13C596 includes two-wheeled cart, easily fits through most standards size doors and maneuvers with ease.

Drain Cleaning Machines

RIDGID ROTHENBERGER pipetool technologies at work WESTWARD

Drum Machines—Have high-torque, long-running motors that combine with durable cables and cutters to eliminate blockages. Inner drum minimizes the potential of the cable flipping. Universal motor automatically slows cable and increases torque when met with obstructions.

Sectional Machines—Feature high-speed cutting action that allow you to drill through drain blockages quickly. Push the handle down and the cable spins at 710 rpm. Release the handle and the cable stops instantly.

Note: To order additional cable see page 865. Additional drums and cable sizes are available; call 1-800-GRAINGER (472-4643). Accessories available at Grainger.com®.

CAMERA REELS

Waterproof, 3-pin SeeSnake® reels feature abrasion-resistant wrapped inner core with integrated power/video signal. Hardened stainless steel camera head spring assembly provides optimum durability. In-line transmitter is located behind camera head. Scratch-resistant lens cover is made of sapphire crystal. Rugged, high-intensity light provides exceptional viewing. Include footage counter on monitor and fiberglass push rod. Reels have metal frame, polyethylene drum, and centering guides. They're designed to create a custom inspection camera system based on specific applications, and work with monitors on this page. Self-leveling cameras provide clear images that stay upright.

MONITORS

Laptop Interface monitors work with SeeSnake® reels to provide recording, monitoring, and reporting. Clean keys control pad lets you keep gloved hands off your laptop while controlling camera recording and operation. Battery power allows you to inspect when AC power is not available. Include SeeSnake HQ monitoring/recording software, AC power cable, and battery charger. SeeSnake HQ software lets you edit, archive, and deliver reports in print, on DVD, or online.

INSPECTION CAMERAS

Rigid®—Handheld Inspection Camera No. 26C165 features pistol grip, 3 ft. RCA cable (video out), and 180° image rotation. 17mm aluminum camera head and cable are waterproof up to 10 ft. Includes 2.4" color LCD screen, 4 adjustable LEDs in camera head, hook, magnet, mirror, and case. Pipe Inspection Systems Nos. 26C163 and 26C164 include camera reel and CA-300 inspection camera. Feature monitoring capability and interchangeable drums. No. 26C163 includes rechargeable Li-Ion battery, 2 ball guides, and reel No. 6EEE0. No. 26C164 includes rechargeable Li-ion battery, 2 ball guides, and reel No. 6DNY3.

Milwaukee®—High-resolution color LCD and automatic shutoff. 12V lithium ion battery and 30-min. quick charger included. Replacement battery and charger sold on page 681.

ROTHENBERGER—Multifunction ROSCOPE® 1000 technology features 720 x 480 pixel resolution (JPEG) and 5-pin connection for previous Rothenburger modules to be used. Function keys are arranged for single hand use. Includes headset connection for personal audio commentary, Li-ion battery for 3 to 5 hr. battery life, and SD card slot for storage.

Pipe and Utility Locating Equipment

ROTHENBERGER pipetool technologies at work RIDGID

Pipe/Cable/Sonde Locator—Locate inline transmitters, remote transmitters (sondes), and energized direct buried cables. Push-button readings up to 15 ft. depending on soil conditions and signal strength. Features weatherproof membrane buttons, speaker, low battery warning, and manual gain control.

NaviTrack Scout® Sonde/Line Locator—Sends signals out in multiple directions to maintain contact with transmitters for fast, easy locating at depths of more than 15 ft. Use it to locate SeeSnake® camera systems, so you can find the blockages that the camera is seeing, as well as to trace bare utility lines. Includes advanced search function, advanced map function, and depth measurement. Automatic or manual gain control.

SeekTech™ Line Locator—Lightweight, rugged receiver traces frequencies from 10 Hz to 35 kHz through just about any terrain. Target line and guidance arrows help quickly identify distortion.

SeekTech™ Line Transmitter—Energizes metallic lines for tracing with a locator. An easy-to-read LCD and an audio signal provide feedback that allows confirmation of a good circuit before beginning a trace.

RIDGID ROTHENBERGER WESTWARD GEDORE PROTO

Chain and Strap Wrenches

Chain Tongs—Turn large-diameter pipe during heavy-duty applications. Designed and sized to provide extra leverage. No. 4CPE4 has a single-end tong. Double-end jaw styles can be reversed.

Chain Wrenches—Double jaw provides ratchet-like action in either direction.

Strap Wrenches—RIDGID® tools have a woven nylon polyurethane-coated strap. Westward® tools have a reinforced neoprene rubber strap.

Universal Chain Wrench—Forged steel handle has deep milled teeth. 6200-lb. chain capacity.

Cordless Press Tools

FORCE LOGIC™ delivers enhanced productivity by allowing you to cut, fasten, and connect using one interchangeable battery platform. Compact and light, these tools work on most major brands of fittings. In-line design provides access to nearly anywhere you can fit your arm. REDLINK™ technology lets the tool automatically complete each press once engaged. A green light indicates full cycle has been completed. Reliable, rechargeable REDLITHIUM™ battery provides outstanding run time. Brushless motor for 50,000 cycle calibration intervals and faster cycle time. Include 2 batteries and charger. Nos. 53AY77 include 3 attachable jaws. No. 53AY75 includes 5 attachable jaws.

Tubing Benders

Geared—For bending aircraft-grade stainless steel and all other metal tubing of bending temper. Calibrated angle markings from 0° to 180°. Worm gear with 50:1 ratio. Crank handle has revolving hand grip.

Ratcheting—High-geared mechanical ratios to bend heavy-wall steel tube, stainless steel tube, and hard copper water tube (types K and L). Produce uniform bends up to 180°. Calibrated at 15° from 0° to 180°.

Compound—Bend copper, brass, steel, and aluminum thin-wall tubing, soft wire, and rod 180° in a single action. Calibrated angle markings from 0° to 180° for left, right, and offset bends. 90° start angle.

Lever-Type—Make smooth, tight radius bends in soft copper and aluminum tubing up to 180°. Open side slips over tube at any point. No scoring or flattening of tubing. Calibrated to show angle of bend. Nonslip grip handle.

Foot-Operated—No. 20UX03 programmable tube bender shapes material while reducing delays with extremely fast automatic bending. Runs on 220V with single-phase power and bends up to 2.5" tubing and 2' schedule 40 pipe. Stores up to 170 internal programs of 10 bends each and has unlimited storage memory. Touch screen or foot-petal operates the bender when not in manual mode. No. 20UX05 low pressure system runs on 220V with 3-phase power bends pipe up to 206° without stopping or ratcheting. Foot-operated petal lets you control the bender at variable speed. Feature digital auto-stop lets you choose the desired bend degree for easy and accuracy. Handles a maximum capacity of 3" schedule 40 pipe, 3" square, and 3.5" round tube.

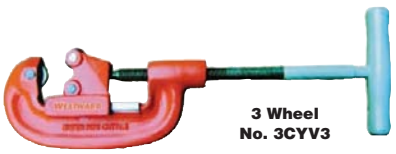
Flaring and Swaging Tools

Imperial WESTWARD RIDGID ROTHENBERGER Milwaukee



Flaring Tools—Use single flare tools in most non-high pressure applications. Use double flare tools in high-pressure applications such as automotive, AC, and refrigeration.

Swaging Tools—For joining copper and other thin-walled tubing. Eliminate need for coupling. Precision tapered. Hex body for use with wrench.

Tube Expander Kits—No. 4A524 creates joints in soft copper, aluminum, and soft steel tube. Eliminates fitting and reduces solder consumption. Can be used to recalibrate damaged tubing. Comes in plastic case. No. 38EY29 is for expansion of PEX-a and ProPEX® tubing for termination to fitting. Built-in auto rotation provides accurate, one-handed expansion, precision expansion with rapid return, integrated magnesium housing, and D-handle design for durability. Tool-free head change compatible with Milwaukee® and Uponor heads.

Valve Exercisers and Pipe Cutters

WHEELER REX

Portable Valve Exercisers—Frame is designed to absorb all torque to help protect the operator. With fingertip controls, digital counter, and 2" ball hitch coupling. Auxiliary connections allow use as a hydraulic power source for other tools.

Manual Tube Cutters

- For additional tube cutter replacement wheels, see Grainger.com®

Midget—Use in restricted spaces on small-dia. hard and soft copper, aluminum, brass, and plastic.

Quick-Acting Release—For copper, aluminum, and brass.

Ratcheting—Cut copper, brass, stainless steel, plastics, and PVC. Facilitates work in tight areas.

Screw Feed and Enclosed Screw Feed—Enclosed screw feed cutters for thin-wall conduit have grooved rolls for close-to-flare cuts, fold-away reamer, and spare cutter. Hi-Duty® tools are for copper, brass, aluminum, and thin-wall steel conduit. No. 6X858 also cuts steel and stainless steel.

Telescoping—Feature grooved rollers with flare cutoff groove and fold-away reamer. Enclosed-feed cutting action for aluminum and steel with a special cutting wheel for copper.

Pipe- and Tube-Cutting Machines

EZ Cutter—Cuts copper, brass, aluminum, thin-walled steel, and plastic-coated pipe. Include foot switch and pipe cutter wheel. No. 6RRU6 also includes 2 roller supports and 2 stationary supports.

Portable Electric Pipe Cutter—Cuts Schedule 40 steel pipe, galvanized pipe, and rigid conduit. 2 included ball transfer stands keep pipe level during cutting. Requires Model 700 Power Drive threader No. 1AC02, sold separately on pages 872.

Hydraulic-Powered Pipe Cutters—Cut larger dia. cast iron, tile and concrete pipe. Like the hand-operated cutters, hydraulic cutters are not rotated around pipe. Remotely operated hydraulic pumps provide the required power. A 2"–3" minimum clearance required to wrap cutter chain around pipe. Cutters include pump, hose and case.

Copper Tube Cutting Machine—Cuts, deburrs, and cleans copper tube and fittings. Includes reamer, 6 cleaning brushes, storage rack, and quick-change collet. Can be mounted on tripod stand No. 1VTV2, sold separately on page 873.

M12™ Cordless Copper Tube Cutter—Cuts copper tubing, wet or dry. Runs on a 12V lithium ion battery; fuel gauge displays the remaining run time. Includes 1 battery, charger, and case.

Transport Cart—Engineered to help move compatible electric pipe cutters to and from the jobsite. 250-lb. load capacity. 14¾" W x 15" D x 42¾" H".

ROTHENBERGER Malco

PEX II Wire Tools and Clips

This tool lets you layout an in-floor radiant heating system. It secures PEX (polyethylene cross-linked tubing) to a wire grid with propriety Malco® Clips. Features 25-clip capacity magazine. Smooth stapling mechanism quickly feeds and installs 12-ga. wire clips with a single one-handed pump of the ergonomic, nonslip handle. Wire Clips are for PEX tubing from ⅜" to ⅝" inside diameters. Heavy-duty clips will not jam, break, or damage PEX.

RIDGID ROTHENBERGER pipetool technologies at work WESTWARD

Manual Pipe Threading Machines

MANUAL PIPE THREADERS

Deluxe Plumber's Kit

For black, galvanized pipe, IMC, and heavy-wall conduit up to 1". Includes ½", ¾", and 1" quick-change die heads, 1¼" steel pipe cutter, 10" water pump pliers, 14" heavy-duty pipe wrench, and pipe tape.

Super Cut

Slim, compact design with ratchet angle of 22.5°. Features simple insertion and removal of die heads, retainer locking, optimized cutting geometry, and easy operation in hard-to reach places with offset lever. Convenient, lockable reversal of the ratchet direction.

600 Power Drive

Heavy-duty motor for threading ½" to 1¼" pipe and conduit. Includes ½" and 1¼" right-hand die heads. Use with RIDGID® 11R die heads and 12R replacement dies.

700 Power Drive

Drive large-geared threaders and cut pipe threads with drop-head dies through 2". Motor with spur gear reduction. RIDGID® model 12R die heads fit without adapter.

MANUAL PIPE THREADING ACCESSORIES

Universal Threading Machine Die Heads

¼" to 2" universal die head and 2½" to 4" receding die head allow cutting of tapered or straight right hand NPT/NPSM or BSP/BSPP threads. For use with No. 4CW39 threading machine, see page 873. Features automatic release for repeatable number of threads through-the-head oiling. Automatically opens when pipe is threaded to proper length.

Self-Opening Die Head

Feature through-the-head oiling. Open automatically after completion of the proper thread length. No. 4CW40 is for use only with No. 4CW93. No. 5A195 uses RIDGID® universal right-hand pipe or bolt dies ⅛" to 2".

Note: Automatic-open feature does not function below ½" size.

Quick-Opening Die Head

Uses universal right-hand pipe or bolt dies. (Included in Nos. 3Z987, 3RY43, and 3FE64, sold on page 873.)

Nipple Chuck Kit

Chuck and 5 included adapters accept ½" to 2" prethreaded pipe ends or studs to be cut to size and threaded down. For use with threading machines Nos. 3FE64, 3Z987, 3RY43, and 4CW39, see page 873. Includes wrench.

Roll Groovers

Model 918—Mounts on Nos. 3FE64, 3Z987, and 4CPC4 power drives, see page 873. Requires 300 power drive and clearance for turning handle. Includes 2" to 6" (schedule 10 and 40) roll set, 8" to 12" schedule 10 (8" schedule 40) roll set, tools for roll set change, and carrying case for roll sets.

Model 916—Integral depth-adjustment screw is separate from feed mechanism.

Model 975—Used for in-place applications or mount to a RIGID 300 power drive. Works with Nos. 3FE64 and 3Z987, see page 873. Auto tracking holds pipe into unit. Requires 6½" clearance to travel around pipe, minimum 2½" of exposed pipe for grooving.

Model 915—Easy roll set changeout, cast-in handle for transport. Ratchet (included) has 90° bend in handle. Depth setting gauge. Includes ½" ratchet wrench to feed screw.

Pipe Threading Stands and Vises

Pipe Threading Machine Stands—Wheel stands feature 16" wheels. No. 2ZB62 features equipment cabinet for storage and includes 2 internal shelves and a large external shelf. For use with RIDGID® Pipe Threading Machines Nos. 3RY43, 3FE64 and 4CW39, sold on page 873.

Roller Head Pipe Stands—Roller heads support pipe weighing up to 2500 lb. The rollers allow the pipe to be turned while work is in progress. Additional stands are recommended for longer and heavier lengths of pipe. Nos. 22XP99 and 3FE65 allow height adjustment from 32" to 55".

V-Head Pipe Stands—Allow height adjustment from 28" to 52".

Pipe Freezing/Thawing and Soldering Guns

RIDGID ROTHENBERGER

Superfreeze® Pipe Freezing Unit—Make repairs without shutting down water systems. System acts as a mini-refrigeration unit that circulates refrigerant to its aluminum freeze heads. Self-contained unit uses no consumables. Pipe capacity: ½" to 2" steel, ½" to 2½" copper tube.

Pipe Thawing Unit—Electric current clears frozen metal pipes in minutes without digging or breaking through walls. Two 25-ft. cables clamp on to provide continuous heat for 4 ft. to 150 ft. of ½" to 1½" dia. pipes. Adjustable current output.

Flameless Soldering Gun—Electric soldering gun has 2 power settings; sweats joints on copper tube up to 3". Includes 12-ft. cable.

Oil Gauging Tape Measures

Lufkin® USTAPE WORLD CLASS TOOLS SINCE 1876

Single Duty for Use on Derricks—Open reel with extra large winding drum that provides rapid line recovery.
- ¼"W Chrome Clad® blade

Single and Double Duty for Oils—Open reel with heavy-duty frame. Blade is recessed beneath multiple layers of nickel and chrome electroplating for strong wear and corrosion resistance. Tape reads right to left.
- ½"W Chrome Clad® blade with black markings

Plumb Bobs—Designed for submersion in oils and viscous liquids. Use to determine verticals. Innage method gives actual depth of the liquid in the tank.

Hand-Wind Measuring Tapes

BLADE TYPE

Fiberglass—Lightweight, inexpensive blades are rust-resistant and will not conduct electricity, making them an excellent choice for use in corrosive environments and in areas with electrical hazards.

Steel—Heavier, durable steel blades will not stretch. Provide a more accurate measurement than fiberglass. Excellent for surveying and engineering applications.

REEL TYPE

Both open and closed reels have a standard 1:1 rewind, as well as a 3:1 gear rewind.

Open—Open reels can be easily cleaned of dirt and debris, making them an excellent choice for outdoor, dirty, or dusty environments. Replacement blades are available at Grainger.com®.

Closed—Closed-reel tapes have a compact profile that makes them well suited for indoor applications, particularly in tight spaces.

KESON MAKE YOUR MARK

ROLATAPE PROFESSIONAL SERIES

WESTWARD®

Mechanical Measuring and Measuring/ Marking Wheels

ROLOTAPE RT SERIES

Feature durable aluminum wheel and telescoping handle for storage.

KESON MP SERIES

Have metal frames with a centerline design for wheel balance.

KESON RRT SERIES

Feature a gearshaft center-aligned geared counter with a handle brake and reset.

ROLATAPE 32 SERIES

All-steel construction provides heavy-duty strength and durability.

WESTWARD®

Made of high-impact polycarbonate material.

KESON RR SERIES

Easy-to-read magnified 5-digit counter, measuring up to 9999' 11" without resetting. 3-pc. handle with cam lock adjusts to comfortable height.

Electronic Measuring Wheels

KESON RR SERIES

Features an easy-to-read magnified 5-digit counter that measures up to 9999 ft. 11" without resetting. 3-pc. handle with cam lock adjusts to comfortable height.

Laser Distance Meters

Precise laser technology accurately measures distances to, in, and around all types of surfaces, equipment, and structures by transmitting and receiving laser reflection. Ideal for when greater accuracy is required for quick measurements. For indoor and outdoor use.

Bosch—Meters provide fast, easy, accurate measurements with a full range of features including; real-time distance, area, volume, indirect lengths and angles. Select models offer Bluetooth® connectivity.

Milwaukee—Designed to provide the easiest measurements from all orientations. Screens offer maximum visibility in low light conditions. Impact-resistant overmold provides protection from tough jobsite conditions. Side-shot button allows an easier, more ergonomic experience when measuring in all directions. No. 489K09 includes memory storage for 3 reading. Nos. 489K10 and 489K11 include memory storage for 30 readings.

Leica DISTO™—With ranges of up to 650 ft. and better than ±1/16" accuracy, per ISO standards, these units can be used in all areas of construction and MRO. All are ruggedly built and designed for site conditions. Multiple units incorporate view screens for outdoor use, and tilt sensors to help acquire additional calculations in hard-to-reach areas.

Fluke—Fast and easy to use, improves accuracy, and reduces measurement errors. No. 24Y894 has a stake out function for marking off defined measured lengths and tripod mode for long distance measuring. Stores up to 20 readings.

Leica Accessories—Target plates are made of gray plastic with reflective coatings to increase the effective range of the meter on nonreflective surfaces.

Rotary Laser Levels

All kits include batteries, instruction manual, and carrying case.

LEVELING TYPES

Horizontal or Vertical Leveling: Rotary lasers that include vertical leveling can be rotated onto their side for vertical alignment and plumb applications.

Electronic and Pendulum Self-Leveling: More accurate results than manual lasers, and have an out-of-level indicator or alarm.

Manual-Leveling: External leveling screws and level vials are used to manually level the laser.

BEAM COLORS

Red Laser Beams: Cost effective and ideal for indoor use, most visible in low light situations.

Green Laser Beams: More visible than red beams, particularly in brighter light situations.

GRADE CAPABILITY

Single Slope: Laser can be tilted on one axis in order to achieve sloped grading.

Dual Slope: Laser can be tilted on both the X and Y axis to achieve a grade with dual slope.

Slope degree can be manually calculated or inputed in lasers with 'automatic slope' capability.

Sheave, Industrial, Mining, and Pipe Alignment Lasers

JOHNSON

No. 2CGJ8

Sheave Alignment—Use 3 precision-ground magnetic targets and 1 precision line laser to assist with belt and sheave installation.

Industrial Alignment—Lasers are used to assist with installing and aligning heavy equipment, conveyors, and paint lines.

Mining Lasers—MSHA (Mining Safety and Health Administration) approved.

Pipe Laser—Waterpoof laser with easy grade input.

Optical Levels and Transit Levels

- For additional laser and optical laser level accessories, see Grainger.com®

OPTICAL LEVELS

DeWalt® Auto Level—Magnetically dampened compensator for optimum range and accuracy. Heavy-duty leveling base is fast and easy to set up and level. 360° horizontal circle for precise measuring of horizontal angles.

DeWalt® Builder's Level—Protected leveling vial for jobsite durability. Heavy-duty leveling base is fast and easy to set up and level. 360° horizontal circle with vernier scale for precise measuring of horizontal angles.

Johnson Automatic Levels—Wire-hung compensator with reinforced housing has a large aperture for crisp images. Durable scope and bubble vial. Horizontal circle with easy-to-read black-on-white graduations. Large, stable base.

Johnson Builder's Levels—Has a horizontal circle graduated to single degrees and lens with protective sun shade. Horizontal tangent screw for precise movement control. Top-mounted leveling vial with large, easy-to-turn leveling screws. Suitable for light construction work.

TRANSIT LEVELS

DeWalt® Transit Level—Transit capability allows user to determine vertical angles. 360° horizontal circle with vernier scale for precise measuring of horizontal angles. Protected leveling vial for jobsite durability. Heavy-duty leveling base is fast and easy to set up and level.

Johnson Builder's Transit Levels—Graduated circle reads to single degree and to ¼-degree by vernier. Vernier arc reads 0° to 45°. Clamp and tangent screws for positive leveling action when used as a level.

Levels

Box Beam—Extruded aluminum box beam profile. Solid acrylic vials with easy read green vial fluid. Rubberized shock protecting end caps.

Box Beam, Magnetic—Extruded aluminum box beam profile. Strong holding rare earth magnets. Solid acrylic vials with green vial fluid. Rubberized shock protecting end caps.

I-Beam, Top-Reading—Aluminum frame with green acrylic vials. Top-read window and protective end caps.

I-Beam, Magnetic—All models have a full-length, strong holding magnetic strip.

Big J I-Beam—Oversized aluminum frames, and oversized acrylic barrel vials with green vial fluid.

Big J I-Beam, Magnetic—Magnetic edge holds level securely to ferrous surfaces. Rubberized, antishock, antislip end caps protect frame.

Box Level Set—Rare Earth magnets allow hands-free work with metal applications.

Bamboo Hardwood Levels—Easy-to-clean laminated bamboo frames have excellent tensile strength and durability. Won't absorb moisture, and resist heat and extreme cold without cracking or warping. Feature 6 acrylic vials, shock-resistant rubberized end caps, and metal binding frame.

Plastic Levels—Structo-Cast® plastic frame is nonconductive and will not scratch fine wood or painted surfaces.

Laser and Electronic Levels

Include batteries, carrying case, and instruction manual.

Laser Torpedo Levels—Levels have aluminum frames with acrylic vials and rare earth magnets. No. 1YRR9 has a rotating swivel head with laser beam that projects a point, or a vertical or horizontal line. Reads plumb, level, 45°, and cross check. No. 1YRT1 projects 3 continuous beams reading plumb, level, and 90°. Includes a leveling base.

Digital Electronic Levels/Inclinometers—No. 1TLH7 has large LCD that simultaneously displays level and angle. Beep sound signals plumb and level. Feature automatic digit inversion, hold function, magnetic base, ¼-20" tripod thread, low-battery warning, and automatic shutoff. Angle displays in degrees; inclination displays in degrees or percent. Features lockable arm and laser beam. Magnetic base. Nos. 1TLH8 and 1TLH6 provide 4 x 90° readings of level, and tilt in degrees or percent slope with audible alert. No. 1TLH8 has a laser beam. Display can rotate up to 180°.

TORPEDO LEVELS

Glo-View® Magnetic Rare Earth

Glo-View® vial enhances readability in dim lighting. 2 V-groove working edges and 3 rare earth magnets. High-strength polymer frame.

Contractor/Industrial

Features 3 acrylic 360° reading vials (level, plumb, and 45°). Level vial is also top-reading. Easy-viewing SurroundView® vials.

Wall Sensors, Scanners, and Stud Finders

MultiScanner® x85 OneStep®— Detects temp. changes in water-filled hydronic radiant heating. The ultra-bright LCD screen, SpotLite® Pointer, and audio tone indicate target location.

MultiScanner® i520 OneStep®— Locates both the center and edges of wood or metal studs. The ultra-bright LCD screen, SpotLite® Pointing System, and audio tone indicate target location. ACT™ technology directs users back if starting was over a stud.

StudSensor™ Pro LCD—Features SpotLite® Pointing System with LCD indicator and audio signal. Also features TruCal® instant calibration.

StudSensor™ Pro SL—Stud Scan mode locates the edges of wood or metal studs up to ¾" (19mm) deep. DeepScan® mode doubles the scanning depth to 1½" (38mm). SpotLite® Pointing System shines a beam of light on the wall to identify the target.

MetalliScanner® m40—Locate ferrous and nonferrous metal. Use Pinpoint Scan to locate small metal objects. Use Wide Scan to detect metal in walls or concrete.

4-in-1 Multi-Function Detector— Measures moisture levels from 8% to 22%. Detects and locates studs, live AC wires, and metal.

Stud Finder Plus™ Stud Finder— Locates metal studs or nails with indicator magnet. Has built-in level vial.

FATMAX® Stud Sensor 300™—Designed with auto calibration, AC detection for live wires up to 2"D, and marking channel. OnePass™ technology locates stud centers. Deep scan senses metal up to 3" through material

Stud Sensors—No. 24A379 has visual indicators and indicates edges of stud. Nos. 31CN13, 24A377, and 24A378 feature AC detection, for live wires up to 2"D. Nos. 31CN13 and 24A377 are designed with sequential LEDs and audible beeps, indicating edges of stud. No. 24A378 features OnePass™ technology locating studs, and a marking channel.

GMS 120 Multi-Scanner—Finds magnetic and nonmagnetic metals, power cables, wood, and plastic pipes. Includes 9V battery and hand strap.

D-Tech 150 Wall Floor—Has wide band range, detecting ferrous and non-ferrous materials up to 6" D. Displays exact location of object and provides 7 detection modes. Includes (4) AA 1.5V batteries and case.

Construction Calculators

All calculators come with batteries, slide covers or doors, paperless tape, auto shutoff, and user's guides.

MATERIAL ESTIMATORS

All calculators work in feet-inch-fractions, decimals, metric, linear, area, volume, and right angle solutions.

Advanced, Desktop, and Contractors Calculator with Trig—Provides circle, arc, dms, blocks, panels, and footings.

Material Estimating Calculator— No. 2WJE6 estimates materials and costs for concrete, fences, decks, bricks, tile, flooring, gravel painting, drywall, and paneling. No. 9XG03 designed for metric measurements. Stores user-defined materials and sizes in the memory. Provides instant calculation also for bulk bags, BTUs, flooring, and tile.

DIGITAL PLAN MEASURES

Basic Handheld Plan Measure— Calculates linear, area, and volume in imperial and metric scales.

Advanced Handheld Plan Measure— Features expanded custom scales with optional PC interface.

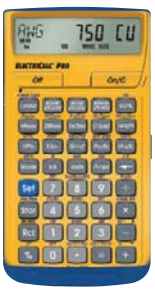
ELECTRICIANS AND PIPE TRADES CALCULATORS

Come with protective case with cover.

Electricians Calculator—Provides wire and conduit sizes, voltage drops, and is updatable for code changes.

Pipe Trades Math Calculator— No. 4MHJ3 calculates right angles, offsets, complex rolling offsets, fitting angles, bends, slopes percent grades, drops, parallel pipe cutbacks, feet-inch fractions, trigonometry, weight/volume conversions, flow rates, and pressures. No. 22UN69 calculates dimensional math, fractions (ruler, proper, improper, and mixed), unit conversions, ratios and proportions, trigonometry/trig and plane geometry (right triangles/angles, circular, and polygonal shapes). Works with exponents, square roots, and reciprocals.

CALCULATED INDUSTRIES



MEASURING AND CONVERSION CALCULATORS

Feet-Inch-Fraction-Metric Dimensional Calculator—Provides calculations and material estimating for linear, area, volume, circles, and arcs.

Unit Conversion Calculator—Features 400 built-in standard to metric unit conversion combinations.

Workstations

FATMAX® Mobile Workstation—4-in-1 unit includes toolbox, part bins, portable tray, and large lower bin. Structural foam construction with front locking latch.

Workmate® Project Centers—Can be used as a work-bench, tool stand, sawhorse, and working vise. Steel frame with adjustable jaws for clamping.

Sawhorse Legs—Legs on Nos. 8UYY8 and 8PXG9 are welded steel and attach to a 2 x 4 to make any length sawhorse needed. They have gripping teeth and set-up requires no screws or nails. Nos. 23TL83 and 23TL81 were designed for maintenance workers and contractor tradesman. They include a fast and easy width adjustment feature.

Staplers and Tackers

STAPLE GUNS

Attach thin materials to a harder or thicker substrate or framework.

STAPLE AND NAIL GUNS

Use both staples and brad nails.

TACKERS

Outward Clinch Tacker—Turns staple legs outward for pipe wrap, duct board, and corrugated applications.

Hammer Tackers—Use to attach roofing paper, felt, plastic sheeting, and house wrap, or to install flooring.

WESTWARD® MARSHALLTOWN The Premier Line KUSHLAN PRODUCTS, LLC

Concrete Mixers

WESTWARD® WHEELBARROW MIXERS

Mixers feature metal blades and a gear locking system. No. 10N693 features a heavy-duty frame and removable handles for compact storage. No. 10N694 has a welded steel frame, torsion bar suspension, and easy-to-use dump mechanism.

MARSHALLTOWN MIXERS

Wheelbarrow Mixer—Hand-tow mixer includes stand and has removable handles for easy storage. Tires are made of flat-free rubber.

Tow-Behind Concrete Electric Mixers, Nos. 18F334 and 18F335—25-rpm mixers feature reinforced square tubular frame with steel channel yoke; wheel- and hand-brake tilting mechanism; and any-position frictional hand brake.

KUSHLAN WHEELBARROW MIXERS

21-rpm electric mixers feature 8" power cords and 5/16"-thick, easy-clean polyethylene drums that resist dents, cracking, and rust. Welded steel frames. Steel mixing blades. No. 2DCL1 holds up to 200-lb. bags of premix concrete. 13¼" x 3" flat-free tires.

KUSHLAN PEDESTAL-MOUNTED MIXERS

21-rpm electric mixers swivel 360° and can be discharged in any direction. Drums can be adjusted to the correct angle for particular mixes. Welded steel frames are easily broken down without tools. 8" power cords included.

No. 22DA24—This mixer is designed with polyethylene drum, heavy-gauge steel tubing frame, and telescoping handles.

No. 2DCL7—Drum holds ten 80-lb. bags of premix concrete. Driven by a 20:1 gear box with a chain sprocket drive system. Aggressive mixing blades. 16" x 4" flat-free tires.

No. 2DCL5—This mixer has a steel frame that's easy to move from place to place. Food-grade liner extracts easily from basket. 10" x 2¼" flat-free tires.

ACCESSORIES

Mixer Stand No. 6LCX9 converts mixer to a stationary unit.

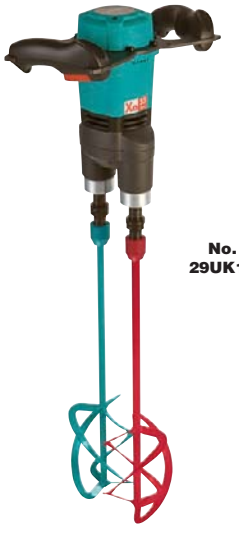
Collomix®



Handheld Concrete Mixers

HEXAFIX® coupling lets you change the mixing paddle quickly without tools. Feature reduced noise and electronic speed control. Easy-to-operate with straight back and ergonomic grip handles. Double-action trigger has safety lock-off to prevent unintentional machine start-up. No. 29UK09 can be used with cement, plaster, and ready-mixed mortar. No. 29UK11 is for plaster, mortar, screed, concrete, and quartz-filled epoxy resins. Counter-rotating mixer No. 29UK12 has no counter-torque, making it easy to move in heavy and viscous material. Ideal for miscellaneous mortars, slightly moist mixes, plaster, screed, coverings, filler, filled and unfilled epoxy resin, cement, and bitumen mixes.

CITGO LUBRICANTS | K&W | MAG 1 | Mystik LUBRICANTS

RENEWABLE LUBRICANTS | S.A.M. Snowplow Aftermarket Manufacturing | Sta-Lube | Valvoline™

Hydraulic and Lubricant Oil

CITGO

CITGEAR® SYN HT 220 Hydraulic Oil—Features lower coefficients of friction than conventional mineral oils.

Pacemaker®—Contains a defoamer and is readily separable from water.

TRANSGARD®—Protect tractor transmissions, axles, and hydraulic pumps. Friction and heat transfer characteristics.

MAG 1®

Chatter suppression with precise clutch and wet brake operation; resistance to thermal degradation; and rust and corrosion protection.

K&W

Trans-X® Posi-Trac®— Designed to quiet chattering differentials.

RENEWABLE LUBRICANTS BIO-SYNXTRA

For powershift transmissions, final drives, PTOs, hydraulic, and brakes. USDA BioPreferred Designated.

SNOWPLOW AFTERMARKET MANUFACTURING

S.A.M. Hydraulic Oil—Nonfoaming, anti-wear formula with antifreeze additive.

VALVOLINE®

Tractor Hydraulic Fluid—Extreme pressure and antiwear properties, plus rust, corrosion, and oxidation resistance.

AW—Zinc-based, nondetergent lubricant with rust and foam inhibitors.

Unitrac™—Reduces wet brake and PTO chatter and provides antiwear, oxidation, ferrous rust, and copper corrosion protection.

Antifreeze/Coolants

PEAK

Note: Consult the vehicle manufacturer's specified coolant recommendation.

Peak® Green—Universal formula for older automotive and light-duty diesel applications offers protection against rust and corrosion. Compatible with all conventional (green) antifreeze.
- IAT formula

Full Force®—Proprietary universal low-silicate formula for automobiles and heavy-duty diesel engines helps protect cooling system metals, including aluminum, against rust and corrosion.
- IAT formula

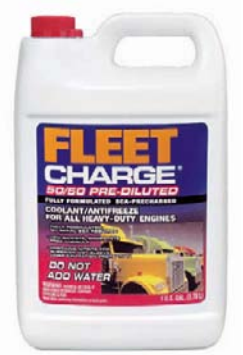
Long Life®—Extended-life coolant technology is designed for use in all automobiles and light-duty trucks, regardless of original antifreeze color, make, model, or year. Phosphate- and silicate-free formula meets respective European and Japanese standards. Offers up to 150,000 mi./5 yr. protection when a complete cooling system flush and fill is performed.
- OAT formula

Global® LifeTime®—Formulated to help protect a vehicle through its entire service life when complete cooling system flush and fill and specified maintenance are performed. Proprietary inhibitors provide maximum rust and corrosion protection in all automobiles and light trucks regardless of make, model, year, or original antifreeze color.
- OAT formula

FINAL CHARGE® Global Extended Life—Globally formulated coolant offers protection for all heavy-duty diesel, gasoline, and natural gas engine cooling systems—without SCAs (supplemental coolant additives). Long-term elastomer compatibility can extend service intervals. Offers protection up to 1 million mi./8 yr./20,000 hr. on-road, off-highway use.
- OAT formula

Note: Cannot mix with FINAL CHARGE® NOAT Extended Life formula.

FINAL CHARGE® NOAT Extended Life—Advanced nitrated global formula helps protect cooling systems in heavy-duty diesel, gasoline, and natural gas engines. Eliminates the need for chemically charged filters and SCAs, and can extend service intervals. Offers protection up to 750,000 mi. on-road, 8 yr./15,000 hr. off-road.
- NOAT formula



Note: Cannot mix with FINAL CHARGE® Global Extended Life formula.

Fleet Charge® SCA Precharged—Antifreeze/coolant for heavy-duty diesel, gasoline, and natural gas engines helps protect all cooling system metals and components against corrosion. Formulated with advanced technology supplemental coolant additives to protect for the life of the engine when maintained with a high-quality SCA filter system.
- SCA formula

Note: Cannot be mixed with any other type of coolant.

Antifreeze/Coolants

Note: Consult the vehicle manufacturer's specified coolant recommendation.

Prime®—Low-silicate conventional product helps prevent rust and corrosion on all cooling system metals, including aluminum. Designed for use in cars and light- and heavy-duty trucks and equipment.
- IAT formula

Cor-Guard™—Proprietary extended-life technology is designed for improved corrosion protection and to help cooling system efficiency. Offers up to 150,000 mi./5 yr. protection when flushed and filled as directed.
- OAT formula

DEX-COOL® Extended Life—Long-lasting inhibitors help protect against rust, corrosion, and temperature extremes. For use in cars and light-duty trucks with aluminum radiators using extended-life coolant (ELC), including those that require DEX-COOL.
- OAT formula

Command® Heavy-Duty Nitrite-Free Extended Life—Long-lasting, premium inhibitors provide up to 600,000 mi./12,000 hr. protection against temperature extremes, rust, corrosion, scale, and premature water pump failure. Intended for use with any OAT formula, heavy-duty ELC in diesel-powered commercial vehicle engines or stationary engines.
- OAT formula

Command Heavy-Duty Extended Life—Intended for use with any NOAT (nitrited organic acid technology) formula, heavy-duty ELC in diesel-powered commercial vehicle engines or stationary engines, with aluminum and other engine metals. Offers protection in demanding conditions for a service life up to 600,000 mi. or 12,000 hr., when an extender is added at 300,000 mi./6000 hr. (Mfr. model HD300 extender sold separately.)
- NOAT formula

Command Heavy-Duty Extended Service Interval SCA Precharged—Designed to help protect heavy-duty engines and cooling systems in normal to severe duty cycles and extreme hot or cold temperatures, and to eliminate the initial SCA (supplemental coolant additive) precharge on new vehicles and recharged systems. Compatible with conventional heavy-duty coolants and all filter technologies.

ZEREX

Antifreeze/Coolants

Note: Consult the vehicle manufacturer's specified coolant recommendation.

Original—Traditional universal ethylene glycol-based formula is compatible with major American coolant brands.
- IAT formula
- 150,000 mi./3000 hr./5 yr.

HD Pre-Charged—Offers protection against liner pitting and hard-water scale deposits in heavy-duty diesel engines. Proprietary inhibitor chemistry helps protect all cooling system metals, including aluminum, against corrosion. Universal coolant can also be used in gasoline engines and light-duty vehicles. Compatible with major American ethylene glycol-based coolant brands.
- IAT formula
- 150,000 mi./3000 hr./3 yr.

MaxLife™ High Mileage—Universal antifreeze/coolant for automobiles and light-duty trucks over 75,000 mi. Maintains a stable temperature in all climates and driving conditions, to help extend vehicle life. The fluid helps protect against cold weather freeze-ups and hot weather boil-overs, and lubricates and protects gaskets and seals.
- IAT formula
- 150,000 mi./3000 hr./3 yr.

Extended Life HD—Proprietary heavy-duty formula is meant to protect diesel engines from liner pitting and hard-water scale deposits. At max. service life, add Extended Life Extender No. 4NPP7 to stretch drain interval to 600,000 mi./14,000 hr./6 yr.
- OAT formula
- 300,000 mi./7000 hr./3 yr.

DEX-COOL®—Silicate- and phosphate-free formula is automaker-approved for use in GM and SAAB vehicles that require OAT DEX-COOL, and in GM and SAAB vehicles.
- OAT formula
- 150,000 mi./5 yr.

G-05®—Low-silicate, low-pH, phosphate-free formula is designed to minimize inhibitor depletion and protect all cooling system metals, including aluminum, against rust and corrosion in gasoline- and diesel-fueled cars, light trucks, and heavy-duty vehicles. Meets European standards; approved by Daimler Chrysler for worldwide applications.
- HOAT formula
- Light duty: 150,000 mi./5 yr.
- Heavy duty: 300,000 mi./3 yr.

Asian Vehicles—Silicate-free, phosphated chemistry is designed to meet Asian manufacturers' requirements to protect cooling systems against freeze-ups, boil-overs, and rust and corrosion.
- HOAT formula
- 150,000 mi./5 yr.

Automotive Maintenance and Repair Supplies

Brush-On Electrical Tape—Seals out moisture around hard-to-tape electrical connections. Use anywhere a dependable waterproof connection is required. Ideal for repairing and bonding applications.

Ultra-Seal Corrosion Preventive Sealant—Forms a nonconductive barrier that helps keep moisture and grit out of electrical connections and termination points, supporting electrical system integrity and performance.

High-Temperature Metal Repair—QuikSteel fills cracks, holes, and pits, and withstands direct flame.

Metal Tank Repair Kits—Use on gas or diesel fuel tanks, oil pans, transmission housings, radiators, reservoirs, and portable tanks. Includes 2 oz. cement, saddle soap, alcohol swab pad, screen, and sandpaper. No need to drain tank.

Exhaust System Repair—Cold weld steel resists high temperatures. Repair exhaust manifolds, catalytic converters, crossover pipes, mufflers, and tailpipes. Includes 2 oz. cement, screen, and sandpaper.

Muffler and Tailpipe Sealant—3M™ Dynetex® is a single-component, nonslumping sealant that repairs holes and leaks in mufflers, tailpipes, and around joints.

Pipe Sealant with PTFE—Helps stop leaks on threaded metal pipe fittings and hydraulic fittings.

QuikSteel™ Epoxy Putty—Bonds to metal, plastics, glass, fiberglass, wood, brick, and ceramics. Withstands temperature up to 500°F.

Security Seal—This antisabotage marker can be applied to recently serviced joints and bolts.

Autobody Sealers, Adhesives, and Fillers

Seam Sealers—Synthetic rubber base is designed to seal interior and exterior joints and seams. Sealer adhesion can be primed and painted on metal, glass, and aluminum.

Super Silicone—One-component paste cures to a tough, rubbery solid and is used for for sealing automotive trim, drip rails, and vinyl roof top fabrics.

All-Around Autobody Sealant—Easy-to-apply water-based seam sealer is designed for sealing interior and exterior autobody joints and seams.

Super Weatherstrip and Gasket Adhesive—This strong, flexible, rubbery adhesive is used to bond weatherstripping and for holding paper, cork, or rubber gaskets in place during installation.

General Trim Adhesive—Bonds automotive materials such as carpeting, vinyl, fabrics, and plastics to metal and other hard, impervious surfaces.

Super Trim Adhesive—High-strength and high-heat-resistant contact adhesive for vinyl tops, heavyweight liners, and hood silencer pads.

Spray Trim Adhesive—Attaches to items such as upholstery cloth and trunk liners to metal and other surfaces.

Plastic and Emblem Adhesive—This strong, quick-drying adhesive is good for bonding plastic or metal emblems, interior rigid plastic, tail light lenses, vinyl side moldings, and upholstery.

Rear View Mirror Adhesive—Two-part structural acrylic system permanently bonds rearview mirror bracket to windshield glass.

2-Part Repair Adhesive—No. 2KVD1 is a strong, epoxy that bonds within minutes of application. Used to join parts made of plastic, metal, glass, fiberglass, and wood. No. 2KVB5 adhesive is a semirigid urethane with fast-acting gel and cure time, making this excellent for wide gap filling capabilities. Used for rebuilding tabs and fixing broken eyelets.

Panel Bonding Adhesive—Two-part epoxy is used to bond steel, aluminum, SMC (Sheet Molded Compound), and FRP (traditional fiberglass) door skins, roof skins, quarter panels, and box sides.

Auto Body Primers

No. 4YLA9

- Aerosols spray at any angle

Maximize top coat adhesion, appearance, and protection while reducing the appearance of surface imperfections. VOC and MIR Compliant.

Filler—High-build formula fills in imperfections on metal, wood, and fiberglass surfaces.

Sandable—Provide a rust-inhibitive base for most automotive lacquers and enamels. Can be immediately recoated, top coated, or sanded once dry.

Self-Etching—Etches and primes in a single step to promote maximum top coat smoothness and adhesion.

Engine—Bonds to bare metal, protects against rust, and resists heat up to 500°F

High Heat—Specially formulated for use on automotive engines and other surfaces that reach up to 2000°F.

Rusty Metal—Provides optimal protection on heavily rusted metal surfaces.

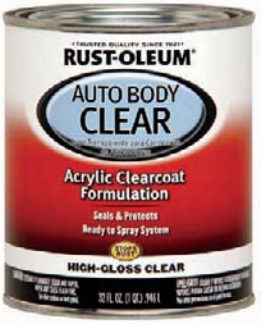
Bondo® Auto Body Repair

Body Filler and Repair Kit—Nonshrinking formula repairs dents, patches rust holes and leaks, and fills in chips. Spreads easily and sands in just 20 min. No. 3RAR1 includes body filler, red cream hardener, self-adhesive metal body patch, and spreader.

Fiberglass Resin with Hardener—Use alone or with fiberglass tape, cloth, or mat to repair fiberglass boats, snowmobiles, jet skis, bathtubs, and showers.



Bondo-Glass®—Repairs dime-size or smaller rusted-out metal holes and shattered fiberglass body parts.

Bondo-Hair® Long-Strand Fiberglass-Reinforced Filler—Recommended for use on up to 1" rust holes, shattered fiberglass and dents where extra strength is required. Ideal for vehicle restoration.

Fiberglass Mat and Fiberglass Cloth—Provide extra reinforcement for large repairs. Can be used with fiberglass resin or two-part adhesive.

Dynatron™ Dynalite Body Filler and Creme Hardeners—No. 3RAR3 is a lightweight, nonsepa-rating body filler that has good featheredge capabilities. Nos. 6KHA9 and 2CTR1 are creme hardener agents that mix easily and quickly and are designed to be used with all 3M™ Body Repair Fillers.

Specialty Spray Paint

Automotive—General purpose indoor/outdoor aerosols provide a protective barrier to help prevent rust and corrosion. Can be applied over bare and primed metal surfaces. Use on autos, trailers, RVs, and auto accessories. VOC/MIR Compliant.
- 12 oz. net wt.

Plastic—Renews and restores a variety of indoor and outdoor plastics with no primer needed.

Trim & Bumper—Renews and protects weathered or discolored bumpers and moldings. Closely matches the OEM matte black finish found on the trim, moldings, rearview mirror covers, bumpers, and rub strips of most vehicles. Spray from any angle.

Fabric and Vinyl—Use on vinyl or fabric car seats, dashboards, upholstery, door panels, and similar surfaces. Fast-dry formula contains actual vinyl for maximum flexibility.

Lens Tint—Creates a "black out" look on taillights, side markers, and turn indicators; allows the natural color to show through when the lights are engaged. Recommended for off-road use only. Spray from any angle.

High-Performance Wheel—Stops Rust® weather-resistant formula protects against corrosion; restores original appearance.

Caliper—Designed to customize brake calipers, drums, rotors, and springs on cars and trucks. Cleaner removes contaminants to help prepare surfaces for painting. Paint is formulated to resist the high temperatures and brake dust of harsh braking.
- Resist heat up to 900°F

Autobody Sanding Block Kit, Discs, Rolls, and Pads

Finishing Block Sanding Kit and Refills—The ergonomic design provides maximum control and comfort. The steel reinforcement plate helps improve finishing results, with reduced sanding effort.

Gold Sanding Discs and Rolls—Multipurpose grain is ideal for all automotive finishes as well as wood, metal, fiberglass, and painted surfaces. The "anticlog" coating prevents loading to increase cutting performance.
- Pressure-sensitive adhesive paper backing

G2 Abrasive Disc—Designed for automotive and marine finishes, wood, metal, fiberglass, and painted surfaces. The durable backing resists tearing and provides ultimate durability. Anticlog coating prevents "loading" of abrasive surface. Feature "Quick-Change" hook-and-loop holding system.
- Film backing

G2 Waterproof Sanding Sheets—Made with a specially treated, waterproof backing for increased "wet" performance and flexibility.
- Film backing

Scuffing Pads—Nonwoven synthetic flexible pads are ideal for scuff sanding and finishing of automotive and marine finishes, wood, metal, and fiberglass.

WESTWARD PROTO POSI LOCK PULLER, INC. OTC

Manual Jaw Pullers

These pullers enable you to remove and install parts for fast, effective repairs. The pullers are forged from quality steel, heat treated, and subjected to rigorous tests which exceed their rated capacity.

Nonreversible jaws have deeper jaws for fan blades and blower wheels.

OBD II Auto Scanners

OTC Evolve Professional Diagnostic Tool— Diagnoses drivability issues on virtually any vehicle produced in the last 30 years. Dual Wi-Fi® allows you to check and test components while moving freely around the vehicle with secure connection. Includes wiring diagrams for most vehicles, model years 1986 to present, available directly on the tool. Comes with one-year, renewable diagnostics subscription, which provides updated vehicle coverage. Once subscription expires, all vehicle coverage remains with the tool but the wiring diagrams will no longer function.

- Bravo software and Android™ operating system
- Includes rugged tablet with 10.4-inch screen

OTC Encore Professional Diagnostic Tool— Performs diagnostics and auto-identifies vehicles to help diagnose issues. Touch screen display provides codes and related information, and can also browse the Internet for related info. Comes with one-year, renewable diagnostics subscription, which provides updated vehicle coverage, tests, and resets. Once subscription expires, all vehicle coverage remains with the tool but new coverage updates will cease.

- Android™ operating system
- Rubber overmolded grips
- 8GB internal storage
- Integrated Wi-Fi® and Bluetooth®

Trilingual OBD II ABS and Airbag Scan Tool— Features multilingual menu and definitions with English, Spanish, and French displayed on the LCD. Shows ABS and Airbag codes for most 1996–2013 GM, Ford, Chrysler, Toyota, Honda, Nissan, and Hyundai vehicles. Also monitors battery, alternator, and charging systems. Automatically populates vehicle data for most 2000 and newer vehicles. USB cable included.

OBD II Auto Scanner with CodeConnect®— Displays Diagnostic Trouble Codes (DTCs) and also helps troubleshoot with top-reported fixes specific to vehicle make, model, year, and engine. Also monitors battery, alternator, and charging system.

OBD II Scan Tool Kit—Performs On-Board Diagnostics (OBD) and can relearn and reprogram new or existing replacement sensors.

- OBDII TPMS Device
- Wall Mount Battery Charger
- Carrying Case
- USB Cable
- Bluetooth OBDII Dongle
- RJ45 Cable
- Lithium Battery
- Installation CD
- Relearn Magnet
- Instruction Manual

OBDII PocketScan—Reads OBD II DTCs from the on-board computers of 1996 and newer cars and light trucks. Helps determine the cause of Check Engine lights. Allows the user to clear the DTCs and turn off the Check Engine light once repairs are made.

Battery & Starter/Charger System Tester— For use with OTC Encore and Evolve scan tools. Performs battery and system tests on 6V and 12V automotive batteries, including regular flooded, enhanced flooded, AGM, EV, and start-stop. Creates health reports. Communicates wirelessly with Encore and Evolve software version 2.10 via Bluetooth®.

SB Connectors and Contacts

Tin-plated electrolytic copper contacts offer low resistance and high conductivity. Annealed barrel ensures even crimping. Connectors are male/female, with 1-pc., impact-resistant polycarbonate housings. Solid barrel contacts are flared for easy insertion of stripped wire or cable, and supported by tempered stainless steel leaf springs to maintain constant pressure and vibration resistance.

Wheeled Battery Chargers

DSR RACE-DRIVEN TECHNOLOGY

ProSeries chargers are designed for professional battery maintenance and emergency starting.

Automatic—Features precision timer-controlled or 40A continuous manual operation (requires monitoring). A microprocessor controller charges all battery types, performs tests and deep discharge recovery, and charges and aids with safe battery maintenance.

Wheeled Battery Chargers

ASSOCIATED

- "Safe in any weather" operation

Manual and Automatic—Clamp bars provide a storage spot for additional safety. Fan cooling mechanism prevents overheating and extends product life. Each model has an automatic electric timer and auto reset circuit breakers.

Smart—Fully automatic smart devices can safely charge, test, perform deep discharge recovery, and maintain most types of automotive batteries, and identify weak or defective batteries. Proprietary technology lets you use the unit as a stable power supply to support the battery electrical system during diagnostics or vehicle reflashes. No. 45RK19 features quick-disconnect DC leads to change from standard clamp cables to an extra-long NATO plug.

Wheeled Battery Chargers

Microprocessor-controlled chargers boost, charge, and maintain batteries in fleet garages and shops. They are designed for rugged use and extreme engine starting, with reverse hookup protection, a heavy-duty transformer, and steel case with handle. Float mode monitoring automatically maintains best battery charge. Multistage charging provides added precision and safety and helps extend battery life.

Portable Jump Starters

Quick and convenient, these jump starters are ideal when vehicle batteries need to be recharged in emergency situations. Some units, including No. 444N23, also include USB ports for charging tablets and smartphones. All units, except No. 417Z01, feature reverse connection warnings or alarms.

QUICKCABLE

Portable Power and Jump Starters

Easy to use portable power packs include a variety of different features. No. 49EK06 is a basic battery charging pack ideal for most cars and pickup trucks, while No. 49EK07 also includes an air compressor and air gauge for tire emergencies. No. 49EK08 is a workhorse unit that is ideal for tow trucks and rescue vehicles, and No. 49ED10 can also charge 24V batteries and features polarity and voltage safeguards and an integrated USB port for charging tablets and phones.

ASSOCIATED

Portable Power and Jump Starter

Powerful starter has a battery status indicator, two 12V vehicle adapters, a 5VDC USB port, and LED working light with DC leads. It has an LED power indicator, high-visibility 8-ft. coiled cord, OBD-II connector with cigarette lighter input, and in-line fuse.

Power Inverters

▪ Inverter output voltage: 115VAC

Convert 12VDC battery power to 120VAC and remote power use. Color-coded, insulated connectors allow a wide variety of AC electrical devices to be DC-powered.

Truck Series Power Inverters and Chargers

Engineered to extend the life cycle of electrical charging and starting systems, and power a wide range of appliances and devices. Systems pair a battery charger converter and power inverter for convenient service in long-haul and work-truck applications. Charger converters help maintain batteries at optimal charge in varied weather.

Note: Find Tundra installed battery chargers, inverters, and installation kits on Grainger.com®; search under "tundra battery chargers and inverters."

Modified Sine Wave—Provide high efficiency and allow for high-accuracy functioning of most appliances and tools.

Pure Sine Wave—Help produce a more efficient and cleaner current for use with highly sensitive loads, such as desktop computers, ballast-driven lighting, medical equipment, or highly precise measuring/monitoring devices.

Automotive Primary Wire

▪ 100-ft. spool length

Plastic insulated, bare copper stranded primary wire for low-voltage, transportation applications. High-heat, cross-linked, wire provides resistance to chemicals, abrasion, and moisture. Meet SAE J1128 and RoHS Compliant.

LINCOLN

Manual Grease Guns

- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.
- Cartridge or bulk grease loading

Flip-over follower on select guns provides a superior seal for easy filling.

Lever models have a cast iron pump head, precision-fit plunger, and extra-heavy follower spring to withstand rough duty. No. 6Y889 has a dip-coated sleeve on the lever handle and bleeder valve on the head.

Pistol models have a die-cast aluminum head. No. 6Y895 features plated steel handle and barrel with flip follower. Extension swivels 360°.

PROTO®

Manual Grease Gun

- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.
- Cartridge or bulk grease loading

Versatile pistol-grip gun offers 3-way filling and is teather-ready, with a heat-shrink loop attachment. It features a heavy-duty 1.7mm thick seamless aluminum barrel to avoid dents, lightweight aluminum head, heavy-duty flexible 18" nylon hose, and 6" metal spout for easy use.

WESTWARD®

Manual Grease Guns

- Cartridge capacity 14½ oz. (except No. 4BY82 uses 3-oz. cartridge)
- Bulk capacity 16 oz. (except No. 4BY82 4-oz. capacity)
- Cartridge or bulk grease loading

Feature die-cast aluminum head and handle. No. 4BY82 is a toolbox-size gun with dual discharge ports (front and top). No. 4BY74 comes with a handy filler nipple. No. 13X046 is ideal for use in cold weather and has a large inlet port with venturi action. Clear barrel models provide 100% positive grease identification and color-coded ends help identify which fluid is in each gun. Additional color options on Grainger.com®.

Milwaukee® DEWALT

Cordless Grease Guns

- Battery powered
- Cartridge or bulk grease loading
- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.

Feature air bleeder valves for quick priming. Flex hose nozzle extensions help access hard-to-reach fittings. Nos. 25DU72 and 25DU73 have variable-speed triggers for controlled grease flow and are suitable for grease types up to NLGI Grade 2. Nos. 45L187 to 45L189 have 2-speed design to select between max. pressure and max. flow rate. All except Nos. 6FKP5 and 4PKY9 have LED lights for low-light conditions.

LINCOLN

Cordless and Air-Operated Grease Gun Kits

- Cartridge capacity 14½ oz.
- Bulk capacity 16 oz.
- Cartridge or bulk grease loading

For grease types up to NLGI Grade 2. Silver-color tube.

Cordless—Nos. 49CT89, 49CT90, 30HL30, and 30HL31 feature stable 3-point stance. 1260 Series have an air purge valve and integrated hose holder.

1440 Series cycle indicator pin helps monitor grease output. 1840 Series with high-torque motor and high-capacity battery dispense up to 10 grease cartridges with a single charge.

Air-Operated—Variable-speed trigger. Advanced pump design helps eliminate priming problems. ¼" FNPT air inlet. Air operating range: 40 to 150 psi. 40:1 ratio.

ARO® ★WESTWARD Legacy

Heavy-Duty High Flow (Oil, ATF) Pumps

ARO® Thunder™ Pumps—Stall-free, ice-free air motor design. 85dB. Include 2" bung adapter. ¼" FNPT air inlet.

Westward® Pumps—Oil pumps come complete with bung nut. No. 3APF2 features all-metal, industrial-quality construction. With spigot and piping connectors. No. 3APE7 composite construction allows the pump to operate without using a lubricator unit in the air supply.

Pump Packages—Nos. 4ZT12 and 5TCU6 include pump, control handle, meter (pts.), drum cover, and 6-ft. hose. No. 4TZ12 also has a band dolly.

No. 45CT51's 3:1 pump transfers oils up to SAE 130 up to 30m; with 3.5m hose. No. 45CT52's 5:1 pump dispenses oils up to SAE 240 up to 50m; with hose reel. Both include steel trolley, air-operated oil pump, digital oil control gun, and miniature filter-regulator/lubricator combo with gauge.

Solvent-Based Parts Washers

Zep PROFESSIONAL

- All steel construction
- Spring-loaded lids with 165° fire link
- Directional spouts with On/Off control

Washers circulate solvents to remove grease and oil from automotive parts. Filters trap contaminants to extend solvent life. Model 5100 filtration systems have 50-micron polypropylene particulate filters with visible filter bowls. Dyna-Trap filter bags remove oils and greases from solvent. Filters remove particles down to 10 microns. Only the filter elements are disposed of. Fire links close lids automatically in the event of a fire. No. 43NR93 has baked-on enamel finish. No. 453D06 has powder-coat finish.

Solvent-Based Parts Washers and Chemicals

Graymills

- Powder-coated steel construction
- 115V/60 Hz

Manual washers feature fusible safety link that closes the lid in event of fire. The lid is spring-loaded on Clean-O-Matic™ models. For handheld brush cleaning, add optional Flow-Thru Brush No. 45NW41, available on Grainger.com®. Deluxe Drum-Mount and Clean-O-Matic washers comply with most freeboard compliance regulations. All units are ETL Certified for U.S. and Canada.

Solvent Drum Mount—Can be placed at jobsite for on-the-spot cleaning. Proprietary retractable pump reduces lifting height to minimize back strain. Include flexible metal flush hose, drain filter, and adjustable work light.

Handi-Kleen™—Tanks have bottom drains for easy cleanout. Seal-less machine tool-grade pump produces 400 gph of carefree operation. No. 3Z746 work shelf supports parts above fluid level and is removable for access to soak tank. Features flush hose and filter basket.

Clean-O-Matic™—Provide 3-way cleaning action delivered by directed steam, flush hose, or in-tank agitation. Include filtration system, 2400 gph cast-iron pump, and bilevel work shelves. No. 4KTX1 also includes casters. No. 4KTX2 is sized for engine blocks, transmissions, and compressors.

Aqueous—Heated washer converts soak-to-sink and back again for configurations tailored to your needs. Corrosion-resistant construction with thermostatically controlled heat up to 110°F and GFCI protection. Unit includes drain screen, in-line canister filter, flow-through brush, flexible stay-put flush hose, and low-liquid protection.

Parts Washer Chemicals

BIO-CIRCLE Environmental Solutions · B'laster · CRC · Graymills · Oil Eater · ZEP Professional

Bio-Circle®—Solvent-free, bio-remediating parts cleaners and degreasers safely remove grease, oil, and grime from all steels and most aluminum alloys. Cleaners are nontoxic, nonflammable, VOC-free, and safe on skin.

B'laster®—Safely and quickly removes oil, grease, and grime from metals, most plastics, and painted surfaces without leaving any residue.

CRC®—Aqueous, industrial-strength degreasing solutions are PH-neutral, VOC-free, noncorrosive, nonflammable, and biodegradable. For parts cleaning in preventative maintenance and repair facilities, industrial manufacturing plants, automotive repair shops, and metal fabrication facilities.

Graymills—Parts washer solvents are for cleaning in Graymills parts washers. Biodegradable aqueous cleaners remove organic and inorganic soils including grease, oil, epoxy, paint, plating salt, and rust. Bioremediating aqueous cleaners are pH-neutral to help the microbial process in Graymills Bioremediation parts washers.

Oil Eater®—Powerful formulas dissolve grease and grime from almost any surface; feature anticorrosion chemistry. Original formula parts cleaner is a versatile, alkaline-based product. Orange-scented solution is a highly concentrated water-based alkaline cleaner.

ZEP—Odorless parts washer solvents are safe to use on all metals. Thy leave a light oil film to protect against rust and corrosion. Solvents with citrus are fortified for extra cleaning power. Recirculating spray wash powder detergent for hot vat or recirculating spray wash cabinets removes grease and industrial soils.

Hydraulic Bottle Jacks

Internally protected from overjumping and overloading.

Air/Manual—Manual function allows normal operation anywhere, even without an air supply. Recommended air supply: 90 to 175 psi (at least 3 HP recommended).

In-Line Pumps—Feature a heat-treated extension screw that allows for low pick-up height adjustment and maximum lift height. Centered pump and ram for easy positioning.

Side Pumps—Use vertically (not upside down) or at angles not more than 5° from vertical position. Nos. 3ZC56 and 3ZC57 feature low profiles.

Telescoping—Provide a high lift with a minimum collapsed height.

A/C RRR Machines

ROBINAIR

Refrigerant (RRR) Machine for Hybrid and Nonhybrid Vehicles— Efficiently recovers, recycles, evacuates, leak tests, and recharges R-134A refrigerant. Automatic features include leak testing, refilling, and oil draining.

No. 407K04 recovers 95% of refrigeration in vehicle A/C system and programs +/-1/2 oz. of programmable charge.

No. 38UP51services hybrid vehicles with high voltage electric compressors.

No. 38UP52 has ability to add printer and refrigerant identifier.

No.52ET95 has the capability of charging without continual monitoring.

1234YF Recovery, Recycle, Recharge (RRR) Machine—Integrated refrigerant identifier samples R1234YF refrigerant in an A/C system before recovery. Fully automatic operation, services both standard and hybrid vehicle A/C systems without continual monitoring. Include automatic internal tank refill, oil drain, and color display. No. 416L15 has a 2.5 reservoir capacity. No. 44ZY98 has an optional USB port, audio jack, and 2.4 reservoir capacity.

A/C Flushing—Eases flushing of condensers, evaporators, and lines. Features pulsing action to loosen corrosion, dirt, and debris, while unit injects air bubbles into liquid stream for greater cleaning action. Includes adapters to mate with ¼" flare and ⅜" quick-disconnect fitting kits.

SUPERCOOL ROBINAIR

Air Conditioning Maintenance Tools

Vacuum Pumps—Quickly dry A/C systems after repair. Include ½" ACME and ¼" SAE suction ports.
- 115VAC, 60 Hz
- For R134A refrigerant

Manifold Gauge Sets—Check high- and low-side pressures on automotive A/C units.

Maintenance Tools—No. 40L413 Removes contaminants, moisture, and acid from A/C systems using R134A and R12 refrigerants.

No. 4LTX3 detects all CFC, HFC, HCFC refrigerants, and blends. Includes digital leak size indicator, audio leak alarm, low-battery indicator.

Air/Hydraulic	4020	**19XY20**

No. 3GZU3

No. 19XY20

Transmission Fluid Exchanger

ROBINAIR

- 12VDC

Quickly exchanges fluid through the transmission oil dipstick in less than 20 min. Works with all types of automatic transmission fluid for most foreign and domestic vehicles. Has digital keypad, and low fluid alarm with indicator light. Includes two 32 qt. reservoir tanks.

Description	Mfr. Model	Item No.
Transmission Fluid Exchanger	92500	**1DZK3**

Automotive Filters

Protect your air intake systems, fuel pumps and injectors, engines, and other systems against damaging contaminants. These professional-quality filters are built to provide consistent, efficient operation over their entire service life.

BALDWIN FILTERS

Note: See our full offering of automotive filters, filter accessories, gaskets, seals, and o-rings on Grainger.com®. Search for "Automotive Mechanical."

Windshield Wiper Blades

Note: Find more wiper blades on Grainger.com®. Search for "Windshield Wiper Blades."

Trico Force™—Features an aerodynamic spoiler that cuts through excessive wind speeds of up to 135 mph caused by cross and truck winds, and general traffic turbulence.

HD® 67 Series—These wide saddle blades are designed for use on heavy-duty trucks, RVs, and buses

Exact Fit®—Provide the exact same fit as original factory blades for vehicles with conventional metal wiper blades.

Tech®—Feature Memory Curve Steel® beam that provides uniform pressure for a clean wipe.

30 Series—Have a precision-cut rubber edge for outstanding wiping action and conforms to highly curved windshields of later-model vehicles.

Ice®—Helps protect wiper components from damaging ice and snow. Heavy-gauge PTFE-infused wiper element resists tearing in subzero temperatures.

Chill®—Feature a protective rubber boot to help prevent snow and ice from clogging the wiper, producing a clean wipe every time.

Tailgate Spreaders

Connect to trucks, utility vehicles, tractors, and other vehicles. Integrated steel augers. Sealed, heavy-duty 12V electric drive motors and transmissions. Rustproof spinners.

Pelletized Ice Melt, Seed, and Fertilizers—Has 20-ft. insulated harness with On/Off switch and a manual flow gate with 10-ft. cable to adjust the flow rate.

Rock Salt and Nonpelletized Ice Melt—No. 2FGV4 has 20-ft. insulated harness with On/Off switch, manual flow gate with 10-ft. cable for adjusting flow rate, and a feed auger. No. 49XE20 has digital, variable-speed controller that allows easy control of spread width. Includes polyethylene lid. Nos. 36RM29 and 36RM31 are prewired for an optional vibrator kit (sold separately). No. 36RM31 includes variable-speed controller for adjusting flow rate.

Sand/Salt or Bulk Salt—Dual variable-speed controls adjust flow rate and spread width independently. Top screen stops rocks or large chunks from getting jammed in the auger. Built-in vibrator can be turned off and on. Mounting kit with straps included, except No. 49XE27 (mount is available separately). Material stays dry and safe while driving: Nos. 49XE21, 9X603, 9VPY0, 36RM30, 36RM32, and 36RM33 have a fitted hard lid; No. 4CAD4 has a fitted tarp. Nos. 36RM34 has a dual-action polymer lid.

Tire Balancing Beads

Dyna Beads

Reusable ceramic beads eliminate the need for spin balancing or rebalancing for the life of the tire. The beads reposition themselves as the tire wears to help maintain a smooth, vibration-free ride.

Wheel Boots and Locks

No. 39C428

No. 39C431

The Enforcer™—Locks are designed for parking enforcement and long-term vehicle storage security. Simple to remove by key holders.

The Protector™—Works as a powerful theft deterrent that offers a comparable level of security to standard car wheel boots. Secured with a push lock.

No. 39C433

TNT Trailer Lock—Thick wall, steel construction lock can be installed on either side of vehicle by reversing wheel clamps.

Description	Use With	Mfr. Model	Item No.
The Enforcer Wheel Clamp Type 1	18 to 24" Wheel, Adjustable	CI00530	**39C428**
The Enforcer Wheel Clamp Type 3	26 to 35" Wheel, Adjustable	CI00560	**39C430**
The Protector Anti-Theft Wheel Lock	0 to 13" wide, Adjustable	CI00520	**39C431**
TNT Truck/Trailer Lock	Single or Dual 22½ to 24½" Wheels	CI00513	**39C433**

Loose Wheel Nut Indicators

Use these convenient indicators to improve the safety by providing a visual indication of nut movement where it is critical, such as on commercial vehicle wheels. Can also help to identify if a wheel is overheating.

Roadside Emergency Kits

Includes	Brand	Item No.
Roadside Emergency Kit		
(3) Warning Triangles, 2¾ lbs. 10BC Fire Extinguisher, (3) 30 Min. Lightsticks, and Metal Carry Case with Handle	Cortina	2EHE6
(5) 20 min. Flares, (2) Light Sticks, Flashlight with Batteries, (2) Shop Cloths, Safety Vest, Rain Poncho, Jumper Cable, Combination Tool Set, (2) Emergency Blankets, (4) Hand Warmers, (2) Water Pouches, (2) Candles, (10) Matches, (6) Latex Gloves, (2) First Aid Cream Packets, (6) Alcohol Wipes, (6) Antiseptic Wipes, (4) Insect Sting Wipes, Cold Pack, Large Wound Pack, Resealable Pouch, Carrying Case	Cortina	407K09
(3) 20 min. Flares, Light Stick, Flashlight with Batteries, Shop Cloth, Reflective Triangle, Safety Vest, Rain Poncho, Jumper Cable, Combination Tool Set, Emergency Blanket, (35) Regular Bandages, (10) Alcohol Wipes, (6) Antiseptic Wipes, (4) Insect Sting Wipes, (2) First Aid Cream Packets, Large Wound Pad, Cold Pack, (4) Latex Gloves, Resealable Pouch, Carrying Case	Cortina	407K11
Booster Cable, Flashlight, (2) AA Batteries, Glow Stick, Siphon Pump, (2) Nitrile Gloves, Rain Poncho, Help Sign, First Aid Kit, Carry Bag	Victor	34NL94
Roadside Emergency Kit w/ Warning Triangle		
(1) Metal Box With Handle, (3) Highway Warning Triangles, (1) 2¾ lb. Refillable Fire Extinguisher, (3) Flares	Cortina	3JPD6
Booster Cable, 12 oz. Tire Sealant, Flashlight, (2) AA Batteries, Slip Joint Pliers, 2-In-1 Screwdriver, (10) Cable Ties, Electrical Tape, Rain Poncho, Info Guides, First Aid Kit, Carry Bag with Integrated Warning Triangle	Victor	34NL95
Booster Cable, 12 oz. Tire Sealant, Tire Inflator with Instruction Manual, Flashlight, (2) AA Batteries, (25) Cable Ties, Help Sign, (2) Knit Gloves, Elastic Tie Down, Blanket, 2-In-1 Screwdriver, Rain Poncho, Info Guides, First Aid Kit, Carry Bag with Integrated Warning Triangle	Victor	34NL96
Transportation Spill Kit		
10 Pads, 3 Socks, 1 Disposable Bag, 1 Tie, 10 Wipes	Oil-Dri	4WXR7

EATON BUSSMANN SERIES

Automotive Fuses and Circuit Breakers

ATM FUSES—0.64"L X 0.43"W
- Fast-acting
- 1kA IR

Universal color coding. Enclosed element protects against shocks, sparks, and corrosion. For late-model vehicles. Illuminated versions glow when fuse is opened.

FMX AND FMX LOW-PROFILE—1"L X 0.47"W

Meet OEM demand for smaller components, and offer high-amp protection in compact packages.

MAX FUSES—1.7"L X 1.2"W

Used to protect circuits in wiring harness. For domestic and imported vehicles.

AGA FUSES—¼" DIA. X ⅝"W
- Fast-acting

Size rejects insertion of other fuse types.

ATC FUSES—¾"L X ¾"W
- Fast-acting
- 1kA IR

Feature enclosed element. Illuminated versions glow when fuse is opened.

UCB AND CBF SERIES CIRCUIT BREAKERS

UCB series replace ATC fuses.

Back-Up Alarms

VELVAC · WOLO · Buyers · Grote

Standard—Compact alarms provide a cost-effective warning solution with exceptional durability and protection against moisture, dust, and vibration.

Self-Grounding—Eliminates potential corrosion points. Epoxy sealed from moisture, dust, and vibration.

Self-Adjusting—Constantly measures ambient noise and adjusts sound level. Eliminates the need for constant manual adjustment and helps prevent intentional alarm disconnection.

Forklift Lights

Lights are designed to project a blue spot on the floor or ground as a visual warning to pedestrians that mobile equipment is near. They can be installed on the front or back of a forklift, sweeper, or other material handling equipment for safety alerts going forward or backing.

Heated LED Rectangular Headlights

J.W. SPEAKER

LED headlights have a thermally conductive grid that deices lenses in response to the ambient temperature, to help improve visibility without requiring action by the driver. Headlights feature improved light output, glare reduction, and light placement to meet the demands of on-road trucking. The tough, die-cast housing offers protection from salt spray for efficient thermal management.

Portable Searchlights

- Horizontal axis rotation: 370°
- Vertical axis rotation: 135°

Powerful lights are designed to provide intense illumination for automotive, first responder, work truck, marine, military, and outdoor applications. They are UV- and saltwater-resistant. Remote control and mounting options include wireless handheld (H/H) or dash-mount, hardwired dash-mount, and handheld portable wired remote. Mounted searchlights are available with permanent mounting or portable magnetic-mount.

Portable Canopies, Shelters, and Tent

GA GRAINGER APPROVED

- UV blocking

CANOPIES (TOP AND FRAME)

Instant Canopies—Heights for Nos. 11C555, 11C554, and 22EC65 adjust in 3⅛" increments, up to 1 ft. Water, flame, and mildew resistant. Optional Side Wall Kits are sold separately. Optional Combination Door, Side Walls, and Floor Kit is available for Nos. 5NY99 and 11C555. Nos. 5NY99 and 5DFL9 include roller bag and anchor kit. No. 5DFL9 has reflective tape located at key points for higher visibility in low-light conditions. Can be used as an emergency shelter. Optional Solid Wall Kit is sold separately.

Multiuse Canopies—Powder-coated steel frames. Optional Solid Wall Kits for Nos. 11C539 and 11C541 are sold separately. No. 11C543 has 8 legs and 2" dia., 20-ga. frame. No. 11C544 has 10 legs and 2" dia., 20-ga. frame.

Event Canopy—Easy-to-set-up canopy has 2" powder-coated steel frame. Includes 8 white leg covers, 8 foot pads, and elastic ball straps to secure the top/cover to the frame system.

SHELTERS (INCLUDE WALLS)

Peak-Top No. 11C547—Has a powder-coated steel frame. Includes roof cover, bungees, 6 foot pads, and 6 stakes.

Peak-Top No. 4XMA6—Features strong, commercial-grade aluminum frame with twist-lock button sliders that lock the frame in place. Includes a heavy-duty 500-denier polyester top and a double-handled roller bag for easy portability.

Peak-Top No. 11C540—Has a white draw-string cover, 8 legs, and a wall kit with 2 solid and zippered end walls and 2 sidewalls with screened windows. Zippered door is 7.5 ft. W x 6.5 ft. H.

Peak-Top, Heavy-Duty No. 11C542—8-leg A-frame design has interchangeable corner brackets. Features 4-pc. roof truss system that doubles the roof load capacity to a maximum of 3800 lb. Includes bungees, 8 foot pads, 8 stakes, and reinforced wire. Each of the 2 sidewalls contain 3 windows with roll-up window covers. Front and rear door walls have dual zippers and can be rolled up and secured with hook-and-loop straps. When side and end walls are not in use, 4 valances can be attached for a more decorative look.

Dome-Top No. 11C546—Sheds snow and has extra-long walls to protect vehicles and other contents year-round. Front wall has double-zippered, 6.5 ft. W x 6.5 ft. H door. Includes bungees, buckles, 4 brackets, and 8 stakes.

PARTY TENT

Spring-lock powder-coated steel tube frame is easy to assemble; adjustable feet let you set up on uneven ground. Front and back roll-up doors and zippered side doors provide easy access. Vented roof and roll-up windows permit free air circulation. Large windows let in plenty of light. Side wall can be raised to create more space or a sun block, using included 3-pc. side tubing, 3 ropes, and 3 helix pegs. Includes wheeled carry bag for easy transport.

SIDE WALL KITS

Attach to canopies to create shelters.

COMBINATION DOOR, SIDE WALLS, AND FLOOR KIT

Tub-style floor prevents water and pests from entering. Fast, easy clip system attaches to the inside top frame and legs of the canopy. Side walls have nylon zippered screen windows for ventilation. Cover of screened door can be rolled up for additional ventilation. Door features YBS zippers. Includes carrying bag and stakes.

Portable Gas and Diesel Generators

Dayton®

- Electric-start models include dry battery
- 2-yr. warranty
- For outdoor use only
- CARB Compliant

Maintenance-free, brushless alternator provides high-quality power (5 to 6% total harmonic distortion) and extended life. High amp surge capacity is ideal for starting high amp tools. Quiet muffler reduces engine noise. Low oil shut-off protection. All models except No. 2ZRP6 include wheel kits. Nos. 2ZRP8, 2ZRP9, and 6FYA4 include hour meter and idle control. All models are CSA Listed.

Economy Series No. 6NCL1

Deluxe Series No. 6NCL9

Industrial Series No. 6NCK7

Portable Gas Generators

HONDA GENERATORS

- 3-yr. residential and commercial warranty
- For outdoor use only
- CARB Compliant

Powerful commercial-grade OHV engine runs on regular gasoline—no need to mix with oil. Cast-iron cylinder sleeve for added engine durability. Oil Alert® feature automatically shuts down engine if oil pressure reaches an unsafe level. 120/240V selector switch (except Nos. 6NCK7 and 54EP25) allows full generator wattage through the 120V outlets to power equipment requiring high initial startup. Full frame protection with isolation mounts for added durability. USDA-qualified spark arrestor/muffler.

Economy Series—Digital Automatic Voltage Regulator (DAVR) technology maintains voltage stability within ±1% to protect equipment being powered. All circuits have overload protection.

Deluxe Series—Voltage fluctuations are minimized by the iAVR power feature, which also allows high-amp-load starts with up to 10-sec. voltage increase above the maximum rating. Auto Throttle® technology helps boost run times and increase fuel efficiency, for a lighter unit that produces the same power as most competitive models. Electric start (battery included) with recoil start backup. Include reinforced standing legs, lockable folding handles, and wheel kit.

Industrial Series—No. 6NCK7 features CycloConverter technology and has GFCI protection on duplex receptacle only.

Nos. 6NCL0, 6NCL3, 6NCL8, and 22FD09 feature Auto Throttle technology to help increase fuel efficiency and boost run times, making unit lighter while still able to produce the same power as most competitive models. iAVR power feature minimizes voltage fluctuations and increases voltage above the maximum rating for up to 10 sec.; allows starting of high-amp-load applications. Circuits are GFCI-protected.

All except No. 6NCK7 include lockable folding handles, 2-wheel kit to ease transport, and hanging kit for lifting unit with a crane. Meet OSHA, LA-ETL, NEC, and ANSI Standards (except No. 54EP25 which meets OSHA and LA-ETL Standards).

Portable Gas and Diesel Generators

GENERAC

- Electric-start models include battery (except XD Series)
- For outdoor use only

GP Series—All models offer circuit breaker-protected outlets and never-flat wheels. Low-tone mufflers for quiet operation. 2-yr. limited residential warranty, except No. 493T12 has a 3-yr. limited warranty. No. 493T12 PowerRush™ Advanced Technology delivers over 40% more starting capacity by increasing the electrical current upon demand above rated output. COsense® feature on the OHV engine shuts off and warns user when Carbon Monoxide builds up and low-oil level shutdown protects the engine. Nos. 4FPU2 and 4FPU3 feature idle control and include lifting eye and wheel kit.

XC Series—These generators feature Generac's G-Force Engine, a full pressure-lubed engine with integrated filter, low-oil shutdown, and idle control. Designed for construction sites, they have 12-ga. steel tube frame, forklift-ready lifting pocket, chamfered-edge fuel tank, solid rubber wheels, oversized glove-ready touchpoints, and full Ground Fault Circuit Interrupt protected panel. Oil and first maintenance kit included. Battery included on electric start models. 3-yr. limited residential warranty. 2-yr. limited commercial warranty.

XP Series—Generac OHVI® engine has full-pressure lubrication, spin-on oil filter, low-oil protection, and idle control. TruePower™ technology provides clean, stable power. Rugged construction with impact-resistant cast-metal corners and oversized full-wrap frame tubing. Includes maintenance kit. 3-yr. limited residential warranty. 2-yr. limited commercial warranty.

XD Series—Yanmar LW Series direct-injection diesel engine is more-efficient than gasoline engines and offers long service life; low oil shutdown helps protect against dry-run damage. TruePower provides less than 6% total harmonic distortion for clean power. Durable welded steel frame has a lifting eye for easy transport. 2-year limited residential and commercial warranty.

Portable Gas Inverter Generators

HONDA GENERATORS

- CARB Compliant
- Capable of parallel operations
- 3-yr. residential and commercial warranty, except No. 20KP50 has 2-yr. residential warranty
- For outdoor use only
- Accessories available on Grainger.com®

Super Quiet Series generators have a powerful commercial-grade OHV engine that runs on regular gasoline—no need to mix with oil. The Oil Alert® feature automatically shuts down engine if oil pressure reaches an unsafe level. Eco-Throttle® system increases fuel efficiency by allowing engine to run only as fast as needed for the load. Totally enclosed body helps reduce noise. No. 6NCK8 has recessed wheels and folding handle for greater portability. Rear offset handle provides easier lifting. Nos. 6NCK9 and 20VG46 include battery. No. 20VG46 has iMonitor™ LCD readout to help monitor performance and service diagnosis. Includes wheel kit.

Portable Gas Inverter Generators

GENERAC

- PowerDial™ control integrates Start, Run, and Stop functions
- No. 491N33 is CARB Compliant
- Nos. 39FY96 and 599D42 meet EPA Standards
- Smart Parallel Kit available on Grainger.com®

iQ Series Inverter Generator features a Smart LED dashboard that shows fuel level, remaining runtime, wattage usage, and generator status. Economy Mode operation saves fuel and reduces noise. GP Series Inverter Generators are perfect for all applications from job sites to tailgating. Lightweight for easy transportation. Idle control automatically adjusts engine speed to save fuel and reduce sound emissions. Integrated USB ports make charging mobile devices easy and LED indicators alert you of low oil, overload, and ready-to-use.

Use a Smart Parallel Kit (sold separately) to connect 2 generators directly through the 120V outlets for double the power.

Portable Generator Accessory Installation Guide

To eliminate the risk of backfeeding the electrical utility during a power outage, isolate the circuits using generator power from the rest of the building. The National Electrical Code (NFPA 70, Article 702.6) mandates that a transfer switch be installed with all standby power systems, including portable generators. Select the circuits most needed during an outage and connect them to the transfer switch in combination with appropriate power inlet boxes and cords.

NOTE: Generac®, Reliance, and Square D generator accessories, including transfer switches, power inlet boxes, cords, and panels are available on Grainger.com®.

Guardian® Series Air-Cooled Automatic Standby Generators and Transfer Switches

GENERAC

- 5-yr. limited warranty
- Min. battery requirement: 525 CCA
- CARB Compliant
- See Grainger.com® for accessories

Aluminum enclosure protects against severe weather and corrosion. Fire rating allows for installation as close as 18" to building structures. Toolless fuel conversion provides easy switching between natural gas and LP fuels. New base eliminates sinking and allows unit to be placed directly on ground (increasing surface area by 9X). WiFi® comes standard on all units for constant monitoring and instant response if service is needed. Bundled unit Nos. 55KE64, 55KE65, and 55KE66 come with 100A, 16-circuit transfer switches. Bundled unit Nos. 55KE68, 55KE69, and 49LX92 come with 200A, whole house transfer switches. Unbundled unit Nos. 55KE62, 55KE63, 55KE67, 49LX82, and 49LX83 do not include a transfer switch.

Note: Transfer Switches (RTS Series) are necessary for operation. For accessories, transfer switches, and larger QT Series Air-Cooled Automatic Standby Generators, see Grainger.com®

Generator Sizing Guidelines

To start an electric motor, a generator requires **2 to 3 times** its nameplate amperage or wattage. If the electrical current demand on the generator is of long duration, **the system can overload.** As a preventative measure, **there are five steps to selecting the right size generator:**

1. Calculate total wattages of all appliances to be operated at once
2. Determine volt-amperes (wattage) requirement of motor
3. Find total watts and VA to get total requirements
4. To allow for anticipated future needs, add 25% to Step 3 total
5. Refer to data charts for the unit that meets your total load criteria

For further details read the full article, "Generator Sizing Guidelines" at **grainger.com/generator-sizing**

GENERAC

Protector™ Series Liquid-Cooled Automatic Standby Generators

Quiet-running generators with aluminum housing feature improved water ingress protection and electric connections to stand up to severe weather conditions. Options for additional features help address individual applications, such as advanced controls for instant monitoring. Include oil drain extension, radiator drain extension, battery charge alternator, flex fuel line, and fan/belt guards.

Note: Transfer Switches (RTS Series) are necessary for operation. For accessories, transfer switches, and larger QT Series Liquid-Cooled Automatic Standby Generators, see Grainger.com®

Commercial V-Twin Series No. 20KC43

BRIGGS & STRATTON

Gasoline Engines

Rotation is CCW. Mixer engine No. 12V818 features internal gear box with 6:1 reduction. For outdoor use only; not designed for recreational vehicle use.

XR550 Professional Series™—Dura-Bore™ cast-iron sleeve withstands wear and abuse. No. 12V872 is 4000 rpm; No. 12V817 is 3600 rpm; and No. 12V818 is 3600 rpm.

900 Series™—OHV design with Dura-Bore™ cast-iron sleeve and Dual-Clean™ air cleaner. 3800 rpm.

CR950 Series™—Features reliable performance with cast-iron Dura-Bore™ sleeve, Magnetron® Electronic Ignition, and dual ball bearing. 3300 rpm.

XR1450 Professional Series™—Provides high performance and extended durability with OHV design and Dura-Bore™ cast-iron sleeve. 3750 rpm.

XR2100 Professional Series™—3600 rpm engine designed for frequent use in demanding work environments. Features 21 gross torque (ft.-lb.), cast-iron sleeve, and pleated paper air filter. 3600 rpm.

Vanguard™ Horizontal Series—Includes TransportGuard™ fuel/ignition shut off system with commercial carburetor and canister-style air cleaner. 3600 rpm.

725EXi Series™—Walk-behind mower engine allows you to never change the oil. Just check oil and add. Features larger angled fuel neck and tool-less access to air cleaner for easy maintenance. ReadyStart™ starting system requires no prime and no choke. 3200 rpm.

Commercial V-Twin Series™ —5-step debris management system has chopping fan shreds debris and reduces oil temperature. Features oil pump, cast-iron sleeve, electronic ignition, cyclonic air filter, OHV design, and automotive-style starting with EFM. 27.0 gross HP, 3600 rpm.

Vanguard™ Vertical Series—Features float feed carburetor, Dual-Clean™ air cleaner, and Dura-Bore™ cast-iron cylinder sleeve. 18.0 gross HP, 3600 rpm.

KOHLER®

Gasoline and Diesel Engines

Command PRO® No. 6VMW2

For outdoor use only; not designed for recreational vehicle use.

COURAGE® UTILITY GASOLINE ENGINE

- CARB Compliant

Single-cylinder OHV model with cast-iron cylinder liner and in-line fuel filter. Engine oil can be added or drained from either side of the engine. 3600 rpm.

COMMAND PRO® GASOLINE ENGINES

Feature electronic ignition, hardened crankshaft journals, and a self-relieving choke carburetor. EPA Compliant.

6.6 to 7.7 Gross Torque—4-cycle, OHV engine. Cast-iron cylinder liner, aluminum block. 3600 rpm. Pleated paper encased filter with perforated metal/foam precleaner.

9.2 to 20.4 Gross Torque—Single cylinder, OHV engine. Nos. 16X887, 11M961, 11M962, and 11M963 are 4000 rpm. Nos. 11Z373 and 6VMW2 are 3600 rpm. All have low-oil shutdown feature. Pleated paper encased filter with perforated metal/foam precleaner.

- CARB Compliant

27.7 to 51.1 Gross Torque—V-twin cylinder, OHV engine. 3600 rpm. Dual-element air filter, except Nos. 24TM20 and 24TM21 have heavy-duty canister-style filters.

DIESEL FOUR-STROKE ENGINES

- Tier 4

All models feature direct fuel injection, fuel filter, full-pressure lubrication, and a reborable cast-iron cylinder liner. No. 11K750 is single cylinder with an internal oil filter, electronic shutdown fuel valve, control panel, and counterbalanced crankshaft. 3600 rpm.

HONDA ENGINES

GX Series Gasoline Engines

270cc No. 23PF68

- Horizontal shaft
- Dual-element air cleaner
- CARB Compliant
- 3-yr. warranty

Overhead Valve (OHV) commercial-grade engines offer greater fuel efficiency, automatic mechanical decompression system, and precise intake and exhaust control to ensure fast and reliable starts. Ball bearing-supported crank shaft and cast-iron cylinder sleeve provide greater durability and long life. Oil alert system helps prevent engine damage due to inadequate oil. Nos. 23PF70 and 23PF75 feature Cyclone Air Cleaner system that decreases the service intervals for air filter maintenance.

ARIENS SNAPPER

Commercial-Duty Zero-Turn Mowers

No. 55JE65

ZERO-TURN MOWERS

A wide cutting width and high-performance engines propel these mowers to finish large jobs quickly. Fully welded steel frames with side discharge.

Edge—This mower has a 660cc Kohler 6000 series engine and foot-operated deck lift. Features durable 34" stamped deck constructed of 12-gauge steel. High-back seat with springs with sealed ball bearings.

IKON XD—Commercial-grade mower has fully fabricated and foot-operated welded deck. Features 726 cc Kawasaki® FR691 engine. Hydro-Gear® EZT transaxles offer increased torque and load capacity. Two independent steering levers for easy manuverability. Padded high-back seat with arm rests and large tires. Dial-operated cut height with 13 cutting positions.

360Z—Designed to easily maneuver around yards easily, the 360Z includes commercially-inspired features such as a fully-welded steel frame, thick-walled front axle, easy access maintenance points and durable steel mower deck to ensure a great cut. Also features integrated rear cargo bed to provides on-the-go versatility and convenience.

Apex—Features a fully tubular steel frame, self-adjusting belt, high-back padded seat and armrests with a foot-operated deck lift. Designed with a powerful 23 hp 726 cc Kawasaki® FR691 engine. Also features 54" fabricated 10-gauge steel deck.

ACCESSORY

Mower Cover—Provides all-weather protection for lawn and tractor mowers. Shields against sun UV damage, rain, dust, birds, and tree sap. Elasticized bottom hem for a quick fit.

EGO POWER SYSTEM Makita greenworks

Battery-Powered Mowers

No. 49AY33

EGO™—Rechargeable electric mowers give you the power of a gas engine, without the noise or fumes of gasoline, and with the freedom of movement of cordless. 45-min. of cutting time on a single charge. LED headlights let you mow any time of day and 3-in-1 functionality lets you easily switch between mulch, bag, or side discharge functions. Easy push-button starting. Folds flat for easy cleaning and storage. Available in self-propelled versions.

Makita®—No. 54JK17 delivers 3600 rpm. Features 13 cutting height adjustments, smooth start ups, aerodynamic cover, and built-in ball bearings for required push force. The 13-gal. grass catcher bag features a grass level indicator. Extreme Protection Technology (XPT™) for improved dust and water resistance.

Greenworks Pro—Designed with Smart Cut technology to improve performance and extend run time. Digitally controlled brushless motor provides greater efficiency and higher performance. Unit has a 21" steel deck with 3-in-1 design for mulch, side discharge, or rear bag capability.

BRIGGS & STRATTON HONDA Power Equipment

Mulching Walk-Behind Mowers

No. 49U931

Mulching option leaves fine clippings on the lawn to retain moisture and provide nutrients while reducing removal time and expense.

Briggs & Stratton®—Tough, high-performance mowers are built to provide you with years of reliable service, with an easy-start engine and rugged 14-ga. steel deck. The adjustable cutting height helps you keep grass beautiful and healthy, and a 3-in-1 cutting system lets you easily change from mulch to bag to side-discharge.

Self-propelled mower No. 33RW85 has rear-wheel drive with a reliable disc-drive transmission.

Honda®—MicroCut® twin-blade system uses 4 cutting surfaces to make ultra-fine clippings for superior mulching and bagging. Offers 8 mowing heights from ¾" to 4". Roto-Stop® blade stop lets you step away from the mower to empty the bag or clear items out of the way without stopping and restarting the engine.

Self-propelled, hydrostatic cruise control transmission offers precise speed control from 2 to 4 mph, to change and maintain the right speed for mowing conditions. Rugged 21", 16-ga. heavy-duty steel deck with front bumper and edge guards. Includes 2½-bushel bag, mulching plug, and bag frame.

Battery-Powered Electric Trimmers

These powerful trimmers help you make short work of thick brush, without the noise, fumes, or expense of gas-powered models. Include 0.08"-dia. cutting line, but can be used with larger diameter line, as well. Line length can be easily adjusted via an integral bump feed. Higher amperage provides longer run times.

Note: For accessories including Batteries, Charger, Trimmer Spools, Trimmer Strap, and Trimmer Lines, see Grainger.com®.

Gas-Powered Brush Cutters and Mowers

Note: For accessories including Brush Blades and Trimmer Line, see Grainger.com®.

HANDHELD

ECHO®—Each brushcutter has bicycle-style "U" handle for control and easy access to the throttle and stop switch. Commercial-grade cutting heads with blade conversion kits, making them blade convertible. No. 447P92 features Speed-Feed® cutting heads and flex cable drive shafts. No. 447P92 is extremely lightweight and has a toolless adjusting U-handle that folds for storage. Brush blades sold separately.

Makita®—Features a fuel-efficient engine with automatic decompression for quick-and-easy starting. Oil fill port and drain plug are easy to access. Includes shoulder harness and brush cutter blade.

WALK-BEHIND

Billy Goat®—Cuts through weeds over 6 ft. tall, as well as saplings. Features 3-speed transaxle with reverse, reinforced blade spindle, and protected rear-mounted clutch and steel plow-style handles. Angled rear discharge deck eliminates packing and wind rows.

GENERAC®—Brush Mower No. 494C90 is designed with a 26" mowing deck with a heavy-duty brush blade for cutting extra tall and dense growth. Features a disc-brake power steering system for easy maneuverability. Gear-driven transmission locks in the ground speed leaving your hands free to steer the machine across uneven terrain. This mower also has puncture-resistant tires with lugged treads for improved traction. Brush Trimmer No. 494C89 has a powerful engine that's easy to start. Built with offset frame that makes trimming along foundations, fence lines, and other obstacles easy. Heavy-duty cutting cords are reliable and help prevent tangles. Cord included; changes are quick and easy.

Gas-Powered Blowers

ECHO®—Feature rotational control to help reduce operator fatigue. No. 44X133 has rubber top-handle grip with secondary handles for all-position operation and flared-end pipe for moving heavy or wet debris. No. 425W09 has a curved blower tube and shoulder harness attachment that helps reduce user fatigue. Easy access variable cruise control button located on curved handle. No. 44X141 is a combination blower, shredder/mulcher, and vacuum. 4-blade shredding mechanism provides 12:1 debris reduction. Includes 35"L intake tube for longer reach and zippered collection bag. Nos. 44X133 and 44X141 are CARB and EPA Compliant. No. 425W09 is CARB Compliant.

Makita®—Compact and lightweight model features a commercial-duty engine with variable speed control. Fuel system oil mix to gasoline is not required. Automatic engine decompression allows quicker and easier starts.

Gas- and Battery-Powered Backpack Blowers

ECHO®—Engines offer cruise control. Blowers allow wide-angle tube rotation for optimum mobility. Padded backrest and shoulder straps help minimize fatigue. L-style frame helps reduce impact damage, and Posi-loc™ tubes provide a secure connection. No. 44X139 has a vented back pad that allows air circulation in hot weather.

Makita®—Commercial-duty engine has decompression system for easy starts. Fuel system does not require oil to be mixed to gasoline. Compact, lightweight blower comes with adjustable joy-stick handle, wide backpack straps, and ventilated back panel. CARB Tier III and EPA Phase II Compliant.

EGO™—Quiet, lightweight Power Plus backpack blower has a powerful turbine fan for heavy debris-clearing power. Variable speed control and high-efficiency, brushless motor.

Greenworks®—Handheld blower creates high-velocity air speeds that handle tough tasks like clearing wet, heavy leaves, grass, and stubborn debris. Designed with a brushless motor that provides power and performance. Additional features include trigger starting, variable-speed control, turbo button and cruise control. Includes battery.

Handheld Electric- and Battery-Powered Blowers

Westward® Electric-Powered—Lightweight 2-speed blower/vac includes High/Low control switch and collection bag.

Makita® Battery-Powered—Quieter than gas-powered blowers have zero emissions. Lightweight design provides 30 min. of continuous run time on a single charge. Kit No. 52YW72 includes 36V Li-ion battery and charger. Charger actively monitors current, voltage, and temperature throughout charging process to optimize battery life.

EGO Power Plus—Rechargeable blowers have a convenient, cordless design with the power to match or exceed the performance of many premium gas-powered models. Quiet operation allows use in areas with noise restrictions. Provides 1 hr. of run time on a single charge. Weather-resistant construction. Extra batteries and chargers sold separately; higher-amperage batteries provide longer run times.

DeWalt®—Quiet, powerful, battery-operated blowers give you simple variable-speed operation. Ergonomically designed handles with trigger and speed control.

BILLY GOAT

Litter Vacuums

Suitable for leaf, litter, and debris removal in residential or commercial applications.

Residential/Light Commercial Duty—Feature a 5-blade serrated impeller, zipperless bottom-load mesh turf bag with fasteners for easy unloading. 12" wheels allow maneuvering in tight spaces. Clean up to 35,640 sq. ft./hr. No. 5NLG6 is for hard surfaces, No. 5NLG7 has a 1-speed transmission ideal for hilly turf applications.

No. 5NLG7

Commercial Duty—3-speed with a 6-blade impeller. Top-fill mesh turf bag slides out on rails to ease unloading. 14" wheels allow maneuvering over uneven areas. Micro-adjustable height control allows use on turf or hard surfaces. Cleans up to 45,000 sq. ft./hr.

Industrial Duty/Hard Surface—Feature cyclonic filtration with dust sock technology to help reduce dust in dry conditions. Shift-on-the-fly hydrostatic transmission features a variety of forward and reverse speeds for operating in wide open areas and to allow maneuvering in tight spaces. 4-latch bag system is easy to operate.

SWEEPEX

Rotary Broom Sweepers

Walk-Behind Sweepers—Compact sweepers have a powerful Honda engine and an oscillating broom head, as well as 3 forward gears and 1 reverse gear, for excellent performance on a variety of surfaces. Multifunction controls for travel speed, brush speed, pressure, and brush direction. Adjustable height allows comfortable use. Fold for easy storage. Include Multipurpose Brush Kit. Additional attachments sold separately for year-round functionality, see page 992.

Brush Kits—Dirt Brush Kits get at embedded and hard-to-remove dirt. Maintenance Brush Kits are ideal for sweeping ground coverings, such as brick pavers, which require special care.

Brush Extension Kit adds 5.5" to the broom sweep path, and helps with cleaning around corners and edges.

Debris and Leaf Collection—Debris Shields help protect the user from flying debris, such as rocks, sticks, and other scraps; Debris Collectors catch the debris, and direct it into the sweep path.

Leaf Collectors push and clear leaves from entryways, sidewalks, and parking lots.

Forklift Broom Attachments

SWEEPEX

Sweepers—Turn forklifts into cleanup equipment. Sweepers are attached to forklift tines and are suitable for wet and dry use, indoors and outdoors. 11"L virgin polypropylene bristles are easy to rotate and change. Mega Series requires Forklift Hitch No. 4AZZ9 for mounting to fork tines. Replacement brushes are available on Grainger.com®.

Accessory Attachments—Magnet Bars pick up nails and loose metal debris. Debris Containment Ends keep debris in front of sweeper. Edge Marker Kit allows driver to see exactly where sweeper is located. To attach the Pro and Mega Series sweepers to a skid steer unit, use No. 54EM87 Skid Steer Hitch with Pro Series sweepers and both No. 54EM87 Skid Steer Hitch and No. 54EM88 Adapter Plate for the Mega Series sweepers.

Snow Throwers and Accessories

- All snowblowers offer a powerful Ariens AX engine.

Single-Stage—Lightweight, easy to maneuver, and transport. Manual chute rotation and deflector control. Foldable handle bars allow easy storage.

2-Stage Compact—Features a freeze-resistant 3-blade, 12" impeller, heavy-duty cast-iron gear case with alloy steel gears, and L-3 severe duty gear oil. Steel chute rotates 205° to throw snow up to 40 ft. in almost any direction. Pin-lock axle provides either high-traction 2-wheel drive, or highly maneuverable 1-wheel drive. User-friendly controls. Fully welded and gusseted frame with welded structural truss reinforcement and folding tubular steel handlebars. Halogen headlight.

2-Stage Deluxe—3-blade, 14" steel impeller and auger carve out a 24" to 30"-wide path throwing snow up to 60 ft. A dual-belt auger drive continuously sustains engine power directly to the blower head, with no maintenance adjustments required. Feature a heavy-duty cast-iron gear case with alloy steel gears and L-3 severe-duty gear oil. High-performance final drive ratio ensures higher torque at wheels and provides superior traction through deep snow.

2-Stage Professional—Professional-duty snow throwers feature heavy-duty all-steel construction, and come with standard drift cutters and a 16" steel auger to handle even high drifts and hard-packed snow. A commercial-grade cast-iron Gear Case™ with alloy steel gears and synthetic gear oil. Steel chute rotates 200° to discharge snow in almost any direction, with an adjustable throwing distance up to 60-ft. Includes commercial-duty ½"-thick steel skid shoes and a clean-out tool with brush. Auto-turn steering provides increased maneuverability. Both snow throwers offer one-hand interlock and include built-in hand warmers.

2-Stage Professional Hydro Rapidtrak™—This rugged snow thrower features a maintenance-free hydrostatic drive system that uses synthetic oil and has no wearable components, with an enhanced thermal management system to help assure long service life. With a 16" serrated steel auger and 3-blade 14" steel impeller; throw snow up to 60 ft. Long-wearing commercial-duty ½"-thick steel skid shoes and a steel scraper bar provide consistent performance, while the infinite speed control can be adjusted to your needs and preferences. Cast-iron gear case with alloy steel gears comes prefilled with synthetic gear oil. Convenient one-hand interlock. Built-in hand warmers offer warmth as you work.

ACCESSORIES

Shear Bolt Kits—Intentionally designed to snap if the auger jams or clogs, and will rupture at the designed load limit to protect the auger gear box.

Maintenance Kit—Kit includes 32 oz. of Ariens® 5W30 engine oil, replacement spark plug, fuel stabilizer granules, and a spare ignition key.

Slicer Bar Kits—Use to cut large drifts and packed snow and direct snow into the auger; rotate bars down and out-of-the-way when not needed. Can be installed without tools.

Composite Skid Shoe Kit—Nonabrasive shoe protects decorative surfaces from snow thrower damage. Kit includes 2 skid shoes and installation hardware.

Snow Thrower Covers—Water-repellent, tear- and abrasion-resistant covers can stand up to rugged environments. 6mm bungee around the edges.

Protective Floor Mat—Park snow throwers on the raised-edge mat to help contain melting snow, and to help prevent gas, oil, and rust spots and scratches.

Front Weight Kit—Adds 10 lb. to the front of Ariens® snow throwers, to equalize weight distribution and hold the scraper blade closer to the ground to get a cleaner surface. Also enhances operator comfort and control.

Protective Cab—Installs quickly and easily, with no tools required, to protect against heavy snow and wind. Freeze-resistant clear windows. Does not require weight kit.

Snow Throwers

BRIGGS & STRATTON

Electric start snow throwers offer a Briggs & Stratton engine, use synthetic oil and have a 3-yr. limited warranty.

Single-Stage—No. 40LJ51 features an auger-assisted drive system with a thermal plastic urethane auger. Manual chute rotation and quick deflector.

No. 40LJ47 has a SnowShredder™ serrated, welded steel auger and 1-pc. all-steel auger housing with ball bearings. Features electric chute rotation and quick deflector, and a comfortable ergonomic handlebar.

Nos. 55JK85 and 55JK86 offer quick adjust deflector, a compact size, and quick height and distance adjustment.

2-Stage—FreeHand™ control and reversible skid shoes provide easy control. Friction disc transmission has 5 forward and 2 reverse speeds. The dash-mounted chute control and on-panel deflector control provide easy operation. Steel skid shoes.

Granular Ice Melting Compounds

Inhibitor system contains CMA (calcium magnesium acetate), a fast-acting, longer-lasting ice melter that is safer than calcium chloride. Nontoxic and noncorrosive when used as directed.

EcoTraction™

- Effective in all temperatures

Safe, eco-friendly granules provide better traction than sand and resist freezing and clumping. Excellent for areas with heavy foot traffic and great for vehicles on side roads. Highly visible green particles embed into ice and snow for long-lasting traction. Will not harm people or animals if accidentally ingested and will not damage plants, grass, or concrete parking surfaces. Designed to improve soil's nutrient reservoirs, infiltration rate, aerations, and water absorption.

Size	Coverage Area	Package Type	Mfr. Model	Item No.
10 lb.	Up to 2880 sq. ft.	Jug	ET4R	**19YX34**

2000 lb.	Up to 504,000 sq. ft.	Bulk Tote (Super Sack)	ET909X-T	**19YX36**

Premiere® Liquid De-Icer

- Effective to -20°F

Nonchloride formula inhibits corrosion and won't damage carpets, floors, or shoes. Safe for vegetation. Can be used before storms to prevent ice and snow from adhering to pavement.

Pretreat and De-Ice Backpack Sprayer

Internal pressure chamber provides operational pressure of 90 psi to deliver pretreatment and de-icing liquids. Poly tank has easy-fill 4" opening, built-in straining basket, and Viton® O-rings and seals. Poly wand has a continuous spray feature. 2 poly and 1 brass nozzle provide stream and fan spray pattern choices.

Tank Cap.	Mfr. Model	Item No.
4 gal.	61808	**11C538**

Walk-Behind Electric Sprayer De-Icer

- Spray width: 3 to 4 ft.

Delivers a consistent spray pattern of any de-icing liquid from the main nozzle or alternate spray wand. 60 psi pump has On/Off switch for selective lane or spot spraying on sidewalks, stairways, and hard-to-reach areas. Has a poly tank, heavy-duty powder-coated steel frame and handle, stainless steel axle, and 13" pneumatic tires. Includes 12V battery with 110V charger.

Tank Cap.	Mfr. Model	Item No.
12 gal.	SL-80	**12A764**

Push Liquid Sprayer

- Cover large areas with up to 12 gal. of liquid

Features a 24V lithium ion battery for up to 1.75 hr. of continuous spraying. Movable spraying arm/boom sprays to the front, left, or right. 6"W opening for easy filling and cleaning access. Includes 20"L extension wand with shut-off, poly tank, and powder-coated steel frame. Can be used with insecticides, herbicides, liquid ice melts, and liquid fertilizers. Operating pressure: 40 psi. Spray/flow rate: .4 to .5 gpm.

12 gal.	97900	**415J03**

Handheld and Shoulder Spreaders

Handheld broadcast spreaders feature 1-hole drop. Durable polypropylene construction resists corrosion. Shoulder spreader is ideal for areas where full-size spreaders can't go. Keeps product protected from weather. Trigger-controlled gate opening.

Push Broadcast and Drop Spreaders

Broadcast spreaders spray in a designated pattern from the unit. They can have a 'deflector' that limits the spray reducing where the output goes. Drop spreaders drop the item directly below the spreader for greater control of location (this could help prevent harm to the environment, surfaces, vegetation, concrete, etc.). 1-hole and 3-hole drop models are best for spreading finer materials such as grass seed and fertilizer. Spreaders with high-output (HO) drop are best for larger granular materials such as ice melt. Stainless steel axles resist corrosion. Drop spreaders are for sidewalk and other controlled spreading applications. Garden seeder helps prep rows for planting and accurately plants seeds at the right intervals.
